## Mankind Pharma acquires Rivotril brand for India, reinforcing focus on chronic CNS therapies

- *Acquires exclusive rights to manufacture, market and distribute Rivotril in India*
- *Adds a clonazepam Textbook brand with strong clinical legacy and specialist recall*
- *Strengthens Mankind Pharma's strategic focus on chronic and CNS therapies*
- *Creates a platform for future expansion through potential line extensions*

New Delhi, March 18, 2026: Mankind Pharma Limited today announced that it has acquired the brand Rivotril from Roche for the Indian market, with exclusive rights to manufacture, market and distribute the product across the country. Rivotril is the innovator/ reference brand of clonazepam and is widely prescribed for the management of neurological and psychiatric conditions. Often regarded as a Textbook brand in its category with a strong clinical legacy, Rivotril further strengthens Mankind Pharma's presence in the central nervous system (CNS) therapy segment and complements its existing neuro portfolio.

The acquisition builds on Mankind Pharma's growing focus on chronic therapies, where the company has steadily expanded its presence through new launches, in-licensing partnerships and portfolio additions across key therapeutic areas. Chronic therapies now account for a rising share of the company's overall business as they continue to scale specialty segments and deepen engagement with specialists and key opinion leaders. Furthermore, the addition of Rivotril, an innovator brand with great recall amongst specialists, will strengthen its CNS portfolio and expand treatment options for patients managing neurological conditions.

**Atish Majumdar, Senior President, Sales & Marketing, Mankind Pharma Specialty Business, said:** *This acquisition is aligned with our strategic focus on strengthening our presence in chronic therapies and specialty therapies. Going forward, we see strong opportunities to build on this platform through potential line extensions, addressing the evolving needs of patients and physicians in the CNS therapy area. Leveraging our large field force and nationwide distribution network, we are well positioned to build the brand and support physicians in delivering better outcomes for patients across India."*

Mankind Pharma will leverage its nationwide distribution network and large field force to support wider access to Rivotril across healthcare institutions and prescribers in India. The company currently engages with over 5 lakh doctors and has built a strong prescription share in the Indian pharmaceutical market, enabling deep penetration across urban and semi-urban markets.

### About Mankind Pharma

Mankind Pharma (BSE: 543904 | NSE: MANKIND) is one of the largest pharmaceutical company in India, which focuses on the domestic market with its Pan India presence. Mankind operates at the intersection of the Indian pharmaceutical formulations and consumer healthcare sectors with the aim of providing quality products at affordable prices. The company is a leading player in the domestic pharmaceuticals business present across acute and chronic therapeutic areas including anti-infectives, cardiovascular,

gastrointestinal, antidiabetic, neuro/CNS, gynecology, VMN and respiratory, among others with a strategy to increase chronic presence going ahead. In the consumer healthcare business, the company operates in the condoms, pregnancy detection, emergency contraceptives, antacid powders, vitamin and mineral supplements and anti-acne preparations categories, among others, with several category-leading brands. Following the acquisition of Bharat Serums and Vaccines Limited, Mankind Pharma has further strengthened its leadership in the domestic women's health segment. Mankind's distribution network includes a robust field force of 17,700+ professionals, and a reach extending to over five lakh doctors across urban and rural markets. The company has 32 manufacturing facilities in India manufacturing a wide range of dosage forms, including tablets, capsules, syrups, vials, ampoules, blow fill seal, soft and hard gels, eye drops, creams, contraceptives and other over-the-counter products. Mankind has a consistent track record of product innovation through 6 dedicated R&D facilities backed by more than 730 scientists.
