Maruti Suzuki Annual Integrated Report 2025-26

The Next Million, New Momentum: Every Engine of Growth in Motion

New Delhi, 8 August 2026: Maruti Suzuki India Limited ("Maruti Suzuki") has released its Annual Integrated Report 2025-26, themed "The Next Million, New Momentum".

Click here to access the [Annual Integrated Report 2025-26]

The theme reflects the momentum created by multiple growth drivers operating simultaneously, accelerating the Company's journey into the next phase of growth. The report highlights how the revival of the small car segment, the strengthening of the Company's SUV portfolio, its multi-powertrain strategy, focus on capacity expansion and robust export performance have created fresh momentum for growth.

The Company registered its highest ever annual sales of 24.22 lakh vehicles and record exports of 4.47 lakh vehicles in FY 2025-26. Having achieved the 2 million sales mark for the third consecutive year, the Company, supported by all the key growth drivers in place, is optimistic about reaching its next million-vehicle milestone earlier than anticipated.

Mr. R. C. Bhargava, Chairman, Maruti Suzuki India Limited said, "*I am happy to inform you that these GST reforms have given a new impetus not only to the automobile industry but to several sectors of the economy… We are in the process of making as accurate an estimate as possible of the likely growth of the car market in the next five years. Presently, we are estimating that the car industry would grow to 6.1 to 6.3 million units by FY 2030-31 and that the share of the small car market would grow significantly faster than its pace of growth in the last five years."*

On India's journey towards Net Zero, he added*, "In India we need to use multiple technologies to achieve our goal of moving to net zero. We strongly believe that biogas can be generated in large quantities from locally available resources. This form of energy would substitute for imported CNG and be clean and renewable with zero import content. In addition, there would be many valuable byproducts… Maruti Suzuki Board has approved that we start four biogas plants in the 1st phase, at a cost of Rs.561 crore, and once we have learnt more about the process and technology, we hope to invest substantial amounts of money in the production and distributions of biogas. It will provide zero emission fuel and reduce the pressure on CNG and on burning coal for generating electricity."*

Mr. Hisashi Takeuchi, Managing Director & CEO, Maruti Suzuki India Limited said, "*Reflecting our confidence in the medium-term outlook, we accelerated our capacity expansion plans. During FY 2026-27, we added 500,000 units of manufacturing capacity. Customer expectations continue to evolve rapidly. The Company has plans to introduce 7 SUVs in the next 5 to 6 years to further strengthen SUV portfolio."*

He added, "As India progresses towards becoming a developed nation by 2047, the automobile industry has both a responsibility and an opportunity to contribute meaningfully to this journey. Through manufacturing, exports, technology development, employment generation, skill creation and sustainable *mobility, Maruti Suzuki remains committed to supporting India's aspirations. The next million sales of vehicles represent far more than a volume milestone. They represent greater access to mobility, stronger manufacturing capabilities, wider adoption of cleaner technologies, deeper localization and broader value creation for society."*
