Rationale and key rating drivers

Reaffirmation of ratings for MAS Financial Services Limited's (MFSL) long- and short-term instruments reflects its strong business growth, supported by a diversified portfolio and comfortable capitalisation levels. Ratings also consider MFSL's established track record in lending, and expertise of its promoters and senior management team. CARE Ratings Limited (CareEdge Ratings) highlights the company's diversified funding profile and its use of direct assignment (DA) transactions, which have enabled it to expand its assets under management (AUM) on a relatively lower net worth base while maintaining adequate liquidity.

However, these strengths are partially mitigated by MFSL's moderately concentrated customer base and geographic footprint, with exposure to relatively higher-risk segments. Ratings are further constrained by moderate gearing levels and relatively lower seasoning of its personal loan's portfolio.

CareEdge Ratings has withdrawn the rating of non-convertible debentures (NCDs; ISIN INE348L07217 and INE348L07225), considering full redemption of facilities.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors: Factors that could individually or collectively lead to positive rating action/upgrade:

- Significant and consistent scale-up of operations while improving geographical diversification and maintaining healthy asset quality.
- Improving financial performance with consolidated return on total assets (ROTA) remaining above ~3.0% on a sustained basis.

¹Complete definition of ratings assigned are available at www.careratings.com and other CARE Ratings Limited's publications.

Negative factors: Factors that could individually or collectively lead to negative rating action/downgrade:

- Weakening asset quality, with consolidated net stage 3 (NS3) of above 2% on a sustained basis.
- Overall consolidated gearing exceeding 4.5x or AUM (including co-lending and assignments) to net worth exceeding 6.5x on a sustained basis.
- Significant decline in profitability with consolidated ROTA remaining below 1.0% on a sustained basis.

Analytical approach: Consolidated

CareEdge Ratings has considered the consolidated financials of MFSL, including its subsidiary, MAS Rural Housing and Mortgage Finance Limited (MRHMFL), in which MFSL holds 63.74% shareholding as on March 31, 2026. Consolidated approach is considering common promoter and managerial support, business linkages and operational linkages such as shared branding. Consolidated companies are listed under Annexure-6.

Outlook: Stable

The 'Stable' outlook reflects CareEdge Ratings' expectation of consistent and profitable business growth in the near-to-medium term while keeping asset quality parameters under control.

Detailed description of key rating drivers:**Key strengths****Long-standing track record of promoters and experienced senior management team**

MFSL's promoters have an established track record of over two decades in the lending business. MFSL initially started its lending activities in Gujarat and currently has its footprint in 13 states. As on March 31, 2026, the company's network included 208 branches at a standalone level and 103 branches of its housing finance company (HFC) subsidiary in addition to 224 non-banking financial company (NBFC) partnerships.

The company's operations are headed by Kamlesh C Gandhi, Chairman and Managing Director, with 31 years of experience in financial services sector. Promoters' shareholding stood at 66.65% as on March 31, 2026. MFSL's senior management team comprises experienced professionals who have been in the lending business and have been associated with the company since its inception.

Comfortable capitalisation with diversified resource base

The company has consistently maintained comfortable capital adequacy levels over the years, supported by steady profit accretion (with an average three-year return on net worth [RONW] of 14.25%) and its ability to raise capital periodically. As of March 31, 2026, the company reported a capital adequacy ratio (CAR) of 22.84%, including a tier-I CAR of 21.50%, compared to a CAR of 24.72% and tier-I CAR of 22.58% as of March 31, 2025. CareEdge Ratings expects the overall capitalisation to remain adequate in the medium term, aided by the company's ability to securitise its portfolio.

MFSL has consistently assigned a portion of its loan portfolio (with off-book assets comprising ~21% of AUM as of March 31, 2026), which, and internal accruals, has supported resource mobilisation and AUM growth while maintaining a relatively lower net worth base. The company's consolidated gearing and AUM-to-net worth ratio stood at 3.43x and 5.09x, respectively, as of March 31, 2026 (March 2025: 3.47x and 4.88x). CareEdge Ratings expects consolidated gearing to remain below 4.5x and the AUM-to-net worth ratio below 6.5x on a steady-state basis.

Over time, MFSL has developed a fairly diversified funding profile, maintaining relationships with over 45 banks, non-banking financial companies (NBFCs), and other financial institutions. Its borrowing mix includes term loans (62.66% as of March 2026), cash credit & overdraft (14.28%), pass-through certificates or PTCs (0.47%), capital market instruments (22.59%). This diversified funding base enables the company to raise funds in a timely manner and at competitive rates, providing significant financial flexibility.

Diversified loan portfolio

MFSL reported relatively moderated portfolio growth of 19% in FY26 and 20% in FY25, compared to a three-year compounded annual growth rate (CAGR) of 24% from FY21-24, reflecting a cautious stance on disbursements amid softening asset quality trends. As on March 31, 2026, the company's consolidated AUM stood at ₹15,303.86 crore, up from ₹12,867.91 crore as on March 31, 2025. The portfolio composition remained largely stable, with micro enterprise loans accounting for 37% (unchanged from

FY25), small and medium enterprise (SME) loans at 34% (FY25: 35%), two-wheeler loans at 7% (FY25: 6%), commercial vehicle loans at 7% (FY25: 8%), salaried personal loans at 8% (unchanged), and housing finance loans at 6% (unchanged).

MFSL continues to assign a portion of its loan portfolio to other lenders through securitisation and co-lending arrangements, with off-book exposures constituting ~21% of consolidated AUM as on March 31, 2026, compared to 20% as on March 31, 2025.

CareEdge Ratings expects the share of off-book portfolios to be maintained at up to ~25% of consolidated AUM.

Moderation in asset quality parameters; supported by a demonstrated track record

In line with broader industry trends, MFSL witnessed incremental slippages in FY26 and FY25, leading to a marginal increase in asset quality indicators. As a result, the consolidated gross stage 3 (GS3) and net stage 3 (NS3) ratios (on an AUM basis) stood at 2.47% and 1.54%, respectively, as on March 31, 2026, (2.35% and 1.56% as on March 31, 2025) compared to 2.17% and 1.48% as on March 31, 2024. The credit cost slightly increased to 1.39% in FY26 from 1.18% in FY25 due to higher write-offs and increase in LGDs of Micro Enterprise Loans. As a result, the provision coverage ratio (PCR) for GS3 assets improved to 38.39% as on March 31, 2026, from 34.61% a year earlier.

On a standalone basis, total net stressed assets (including net NPAs, restructured accounts, ECLGS exposure, and repossessed assets) stood at 1.86% of net advances as on March 31, 2026, compared to 1.84% as on March 31, 2025. Similarly, net stressed assets as a proportion of net worth increased to 7.15% from 6.84% in the same period. However, the company's on-time repayment for its on-book portfolio remained stable at 94.35% as on March 31, 2026, broadly in line with 94.26% as on March 31, 2025 (94.33% in the previous year). While CareEdge Ratings has noted a slight uptick in non-performing assets, overall asset quality remains adequate, supported by the company's established collection track record.

Stable earnings profile

MFSL reported steady disbursement growth in FY26, with consolidated disbursements increasing to ₹14,379 crore from ₹12,173 crore in FY25. However, the company exercised caution by moderating disbursements in the SME and Commercial vehicle loan segments.

Consolidated profit after tax (PAT) stood at ₹376 crore in FY26, reflecting a year-on-year growth of 20% over ₹314 crore in FY25, considering higher direct assignment (DA) income. However, return on managed assets (ROMA) improved slightly to 2.38% in FY26 from 2.35% in FY25. Profitability at the consolidated level was supported by improvement in net interest margin (NIM) to 5.73% in FY26 from 5.49% in FY25 due to favourable loan mix and higher investment income. Profitability was impacted by increase in operating expenses to 3.13% in FY26 from 2.65% in FY25, driven by branch expansion, investments in technology and increase in fees and commission expenses (considering change in accounting for co-lending). Credit costs also increased marginally to 1.39% in FY26 from 1.18% in FY25, mainly due to higher write-offs and changes in ECL provisioning requirements. CareEdge Ratings expects MFSL's ROMA to remain range bound in the near-to-medium term.

Key weaknesses

Moderately concentrated customer profile and geographical presence

As on March 31, 2026, MFSL's wholesale lending segment accounted for ~32% of its total AUM. Top 10 exposures constituted 28% of the company's tangible net worth (TNW) and ~5.32% of the consolidated AUM. While the current credit profile of these exposures is considered moderate, deterioration in their quality could have a material impact on MFSL's overall asset quality. Although the company expects a gradual reduction in indirect lending through partner non-banking financial companies (NBFCs) in the medium term, performance of these large exposures will remain an important risk factor to monitor.

MFSL's geographic presence remains concentrated, with Gujarat contributing 43.09% of the portfolio as on March 2026, followed by Maharashtra (17.93%), Rajasthan (10.37%), Karnataka (8.43%), Tamil Nadu (7.83%), Delhi (4.65%), Madhya Pradesh (5.09%), Telangana (1.54%), Haryana (0.51%), Chhattisgarh (0.45%), and other states accounting for ~0.11%. Top three states together comprised 71.90% of the loan portfolio as on March 31, 2026, stood similar to 72.00% a year earlier, with Gujarat forming a significant share owing to the promoters' strong familiarity with the region.

A notable portion of MFSL's lending conducted through partner NBFCs has supported geographic diversification into other states. Going forward, CareEdge Ratings expects this regional concentration to gradually moderate as the company continues to expand its footprint across both existing and new geographies.

Exposure to relatively riskier segments

MFSL's portfolio exposure to unsecured lending segments, including micro enterprise loans and salaried personal loans, which together constituted 31% of total AUM as on March 31, 2026, compared to 29% as on March 31, 2025 (31% in the previous year). The salaried personal loan segment remains relatively unseasoned, indicating elevated credit risk. The portfolio also includes products such as two-wheeler and commercial vehicle (CV) loans, which contribute to 14% of AUM, while yield higher returns, carry relatively higher asset quality risks.

As of March 31, 2026, ~68% of the AUM was sourced directly, compared to 66% in the previous year, with the remaining 32% sourced through partner NBFCs (34% as on March 31, 2025). However, the risks associated with NBFC partnerships are partly mitigated through measures such as maintaining cash collateral and obtaining corporate or personal guarantees from partner NBFCs.

CareEdge Ratings expects the share of the SME and wheels (two-wheeler and CV) portfolio to increase in the near-to-medium term.

Liquidity: Adequate

MFSL's liquidity profile remained adequate, with asset liability maturity (ALM) profile showing no cumulative mismatches across time buckets as on March 31, 2026. MFSL's standalone debt repayments including interest (up to one year) stood at ₹5,790 crore against expected portfolio inflows of ₹8,429 crore (excluding interest receivables) and unencumbered cash and bank balance of ~₹938 crore as on March 31, 2026. The company also has access to unutilised bank limits of ₹1,989 crore as on date, which provides additional comfort to the liquidity.

Assumptions/Covenants

Not applicable

Environment, social, and governance (ESG) risks

Although MFSL's service-oriented business model limits its direct exposure to environmental risks, credit risk may arise if operations of any asset class of the portfolio are adversely impacted by environmental factors.

Social risks in the form of a cybersecurity threat or customer data breach or mis-selling practices can affect MFSL's regulatory compliance and reputation and hence remain a key monitorable.

MFSL's Board comprises eight Directors, with four Independent Directors and also includes two female Directors.

MFSL has been assigned a score of 65.6 of 100 by CareEdge ESG Ratings ([press release](#)) on December 30, 2025. The score highlights its strong position in managing ESG risks, through superior disclosures, policies, and performance.
