October 2026: Aero Nomad Airlines has partnered with AeroHub and Aeroplay to introduce wireless in-flight entertainment as part of its IFE rollout. With this launch, Aero Nomad Airlines will offer passengers a fully wireless, bring-your-own-device (BYOD) onboard entertainment platform.

The deployment features AeroHub as the wireless onboard entertainment platform provider, with Aeroplay Entertainment delivering curated IFE content. The solution enables passengers to stream content directly to their personal electronic devices such as smartphones, tablets and laptops, offering a smooth and immersive entertainment experience via the onboard Wi-Fi network, with access facilitated through a QR-based entry point.

Passengers can explore a mix of Hollywood and international movies, television, and games. The system also integrates destination information and passenger engagement features. The platform is designed to offer a scalable, hardware-light solution aligned with Aero Nomad Airlines' focus on enhancing the passenger experience through digital services.

Sameer Sirdeshmukh, Vice President, AeroHub, said, *"We are pleased to partner with Aero Nomad Airlines as it adopts a more agile approach to inflight entertainment. For regional and growing carriers, wireless IFE offers an opportunity to enhance the passenger proposition while avoiding the weight, hardware and maintenance requirements associated with conventional embedded systems. AeroHub is designed to give airlines the flexibility to scale their entertainment offering in line with network growth and evolving passenger expectations."*

Subir Arora, Senior Vice President, Aeroplay Entertainment, said, *"The future of inflight entertainment is increasingly being shaped by flexibility, relevance and the ability to refresh content more efficiently. Our collaboration with Aero Nomad Airlines and AeroHub brings these priorities together, with a content strategy built around regional relevance, diverse passenger preferences and a continuously refreshed catalogue. This approach enables airlines to deliver a competitive entertainment proposition while responding more effectively to changing traveller behaviour."*

The deployment reflects a broader shift across the aviation industry, particularly among regional and emerging carriers, towards wireless IFE as airlines seek to balance passenger experience with operational efficiency. By reducing reliance on heavy onboard hardware and complex maintenance infrastructure, wireless platforms are emerging as a flexible alternative for carriers looking to introduce or expand IFE while keeping aircraft weight, deployment timelines and lifecycle costs under greater control.

About AeroHub:

AeroHub is a leading provider of next-generation portable inflight entertainment (IFE) solutions, offering airlines a cost-effective alternative to traditional seatback systems. Battery-powered and requiring no aircraft modifications, it enables rapid deployment and flexibility. AeroHub streams a wide range of content including video, audio, games, and digital magazines directly to passengers' personal devices. It also offers features such as a moving and PA/pause integration, all within a single hardware and software solution that enhances passenger experience and optimizes operational efficiency.

About Aeroplay Entertainment:

Aeroplay Entertainment is a leading in-flight entertainment and passenger experience partner dedicated to moving airlines beyond the traditional concept of 'content onboard.' Aeroplay specializes in creating a connected, personalized, and measurable passenger engagement ecosystem by delivering premium global content across seat-back IFE and Wi-Fi-enabled platforms.
