# STT GDC to Invest \$3.2b to Expand Data Centre Capacity in India

The investment will nearly triple firm's IT load capacity, says the company

Our Bureau

New Delhi: ST Telemedia Global Data Centres (STT GDC) on Friday announced an investment of \$3.2 billion (₹26,000 crore) to expand its data centre capacity in India by 150 megawatts over the next five to six years.

This will nearly triple the Singapore-headquartered data centre company's IT load capacity to meet the demands of India's thriving digital economy, it said in a statement.

STT GDC India, in which Tata Communications holds a minority stake, has 28 data centres across 10 cities, with a combined capacity of more than 318 megawatt of IT load. It has about 1,000 enterprise customers. "This strategic investment reflects STT GDC's confidence in India and the growth of its digi-

tal economy, as well as aligning with the burgeoning demand for digital infrastructure, driven by the surge in data consumption, cloud computing, digital transformation and growing adoption of AI applications," the company said.

It added that the investment would solidify its market leadership in the country where it currently holds a 28% market share by revenue. "At STT GDC, we want to play an active role in co-investing and contributing to India's long-term success by investing in the foundational digital infrastructure that will help further accelerate Digital India," said Bruno Lopez, group chief executive at STT GDC. "We are excited about the opportunities ahead and are confident in our ability to contribute significantly to India's digital transformation."

# India Biggest Market for Meta, Driving Incredible Growth Across Apps: Exec

Social media giant's AI investments in the country transforming people's engagement with platforms: Nicola Mendelsohn

Anumeha Chaturvedi & Vinod Mahanta

NICOLA MENDELSONH  
VP, Global Business Group, Meta

India is all in on our short-video format Reels. 50% of the content that you see on Instagram is powered by AI and so much of that through Reels as well.

It was the "strongest ever" for Meta globally and things are more "exciting" than ever for the company in India, said Mendelsohn. "Some of the most exciting work that we're doing when it comes to WhatsApp is happening right here in India, and it's truly world-leading. WhatsApp is being used by consumers, not just in touch with their friends and their families in India, but it is also being used increasingly to connect with businesses in new and innovative ways," she said.

"I'm seeing the kind of work that entities in the aviation and bus transport spaces are doing on the platform. If you can have a whole ticketing system through WhatsApp, and you can now use voice to suggest things, in a country where not everybody is literate, it means that you're actually leapfrogging," she added.

There is a constant stream of product people from all around who are coming to India to learn, embrace and innovate, Mendelsohn said. "India is all in on our short-video format Reels. 50% of the content that you see on Instagram is powered by AI and so much of that through Reels as well. Almost all our advertisers here are using products powered by AI here and for every rupee invested, on average, the businesses are getting about ₹1.76 so that is really high returns on the investment," she said.

here building and developing on our platform on LLaMa, businesses that are now able to send out over a million personalised messages. More people are willing to be educated in new and exciting ways. And India is leading the way on this as well," she added. She said given the geopolitical uncertainties, advertisers are factoring in uncertainty in their plans. "And what they've been telling me all this week is that Meta is the best place to help them grow. That's why you're seeing the strength of the partnerships that we're having here, and it's across all the different aspects of our business as well," she said. "The business leaders in India are very innovative, and are really leaning into things like AI in particular. I met the Flipkart CEO this week. Flipkart used Meta's AI-powered Advantage+ Shopping campaigns to deliver 3.5x revenue when compared to business-as-usual campaigns. This is all very humbling to know," she said.

# India Pips US to become 2nd Largest 5G Smartphone Mkt

Our Bureau

NEW DELHI: India has overtaken the US to emerge as the second-largest market for 5G smartphones after China in the first half of 2024, with affordable models of Xiaomi, Vivo, Samsung and others driving the trend, a Counterpoint Research report said.

Global shipments of fifth generation network-enabled smartphones increased 20% year on year in the first half of 2024, the research firm's data showed. Applied 5G handset shipments globally accounting for more than 25% share, driven by the iPhone 15 series and 14 series, followed by Sam-

sung with more than 21% share on the back of strong shipments of the Galaxy A series and S24 series. Xiaomi took the third spot, with India being its major driver.

Xiaomi registered a triple-digit growth rate in India while also registering a double-digit growth rate in the MEA (Middle East and Africa), Europe and China markets, as per Counterpoint.

For Vivo also, India was the major growth driver along with China and emerging Asian economies. Among the top 10 brands, Motorola grew the fastest, posting strong growth in the Caribbean and Latin America (CALA), India, MEA and North America markets, the research firm said

in its report. "5G handset shipments have been growing steadily and, with the increased availability of 5G handsets in the budget segment, the emerging markets have witnessed high growth in this segment," said Prachi Singh, senior analyst at Counterpoint Research.

Consumers in emerging markets are looking at 5G handsets as an upgrade to their devices, even in the lower price segments, Singh said. CALA was the fastest growing region, registering 5% YoY growth, driven by high growth in key countries like Mexico and Brazil.
