Tech Mahindra acquires Alys for ₹2.21 crore

Mumbai: Tech Mahindra on Wednesday acquired Brazilian-based IT services firm Alys Serviços Técnicos LTDA for ₹2.21 crore as part of its partnership with Orange Business via its wholly-owned subsidiary. Alys was newly incorporated in Jeteropolis, State of Rio de Janeiro, Brazil, on May 27 and holds about 270 employees and has operations in Brazil supporting the LATAM region. **OUR BUREAU**

Tiger Analytics to set up AI delivery centre in Patna

Chennai: US-based Tiger Analytics, an AI and advanced analytics company, has announced plans to set up an AI Centre of Excellence (CoE) in Patna, Bihar. The centre will act as an AI delivery hub that empowers local talent to build advanced enterprise AI solutions for global Fortune 1,000 companies. Tiger Analytics, which has a significant presence in Chennai, has committed an investment of ₹12 crore for the centre that will have a team of 200. **OUR BUREAU**

Vinay Vaidya is Flipkart's Senior V-P for tech

Bengaluru: Flipkart has appointed former Tata Digital Chief Technology Officer Vinay Vaidya as Senior Vice-President for technology, as the e-commerce major strengthens its leadership team to build AI-driven supply chain and marketplace capabilities. He will lead technology and platform development, while driving innovation in logistics and AI-powered capabilities, the company said on Thursday. **OUR BUREAU**

'Lack of deep-tech ecosystem deprives start-ups of ₹1 lakh cr research fund'

CAPITAL CRUNCH. PM-EAC member Neelkanth Mishra acknowledges challenges to risk capital access in India

Vallari Sanzgiri
Mumbai

The absence of a deep-tech ecosystem in India hinders attempts to provide the ₹1 lakh crore Research, Development and Innovation (RDI) fund to deserving start-ups, according to Neelkanth Mishra, Member of the Prime Minister's Economic Advisory Council, during a fireside chat at the Internet and Mobile Association of India (IAMAI) event.

Speaking at the launch of the AI Council of India in Mumbai, Mishra acknowledged the challenges to risk capital access in India, extending the same to the disbursement of the government's flagship deep-tech financing initiative.

"We can't deploy the money we have. There are

“We can't deploy the money we have. There are good people, but it's not enough to absorb that ₹1 lakh crore”

NEELKANTH MISHRA,
Member, Prime Minister's Economic Advisory Council

good people, but it's not enough to absorb that ₹1 lakh crore," said Mishra, who sits on the RDI fund's second-level fund manager selection committee.

DEEP-TECH SHORTFALL
He attributed this shortfall to a deep-tech ecosystem that is yet to mature, creating a gap between venture capitalists (VCs) and quali-

fied start-ups that deserve financial support.

Despite the risk appetite among start-ups, VCs have no visibility into the deep-tech community or its benefits in terms of ROI, resulting in more investment flowing into better understood ventures like e-commerce.

Taking the example of chip designers, Mishra said, "I notice that there are chip

design companies coming up in India. Some of these companies require \$100 million, \$400 million, or more to develop. [But] that ecosystem doesn't exist.

Our venture capitalists are still building that muscle, the ability to understand which founder is faking it and which is real."

When asked to list one constraint that matters most to India's AI future, Mishra listed capital as well as talent.

He attributed the 'brain drain' in India's talent pool to a lack of opportunities and proper compensation.

"If they want to do cutting edge work, they have to go outside. It's also about money. We can't afford to pay them," said Mishra, urging the community to accelerate the build-up of the risk capital universe, to stop the brain drain.

Further, he asked India to focus on building a intended research ecosystem.

"The moment you have high-quality research happening, the confidence of venture capitalists who invest in Indian start-ups will begin to grow as of now, unfortunately we do not have cutting edge research and especially," he said.

From a global perspective, Mishra pointed out the US to be leading in risk capital, possibly 10 years ahead of India. At the same time, he noted that China, despite its state-directed investment has "already lost the race."

Overall, Mishra was optimistic of India's ecosystem evolving over the next few years allowing start-ups easier access to much-needed funds for start-ups, encouraging institutions like IIT to act as feeder points for funding.

Lightstorm's subsea cable to link India's East Coast to Malaysia and Singapore

Vallari Sanzgiri
Mumbai

LANDMARK DEAL

Plugging the cable into the larger grid can power and connect over 80 data centres across Hyderabad, Chennai, Kolkata, Mumbai, Delhi and Bengaluru

Lightstorm announced a multi-million dollar deal to launch a new 12-fiber-pair subsea network that directly connects India, Singapore and Malaysia with consortium partners Microsoft, Singtel and Tata Communications.

The I-2SEA submarine cable system, expected to be up and running by the end of 2029, I-2SEA will be among the earliest next-generation systems to come online on the India-Singapore route.

GROWING DEMAND

The system will be designed specifically for AI, cloud, and hyperscale workloads and deliver one of the lowest-latency routes between Singapore and Hyderabad, supporting the growing demand for AI training.

"Based on whether you're calculating from the East or West Coast up to Singapore or Malaysia, the latencies with this cable will be about 10-15 per cent lower than any other cable that is currently [running in this Asean route]," Amajit Gupta, Group CEO and Managing Director, Lightstorm, told *businessline*.

The company projects the Singapore-Hyderabad network to be 10-15 per cent faster and the Singapore - Mumbai connectivity to be 15 per cent faster when using Lightstorm's network in India.

As the project spans approximately 3,600 km with four landings stations, I-2SEA is one of the largest single subsea project in India in recent times.

Plugging the cable into the larger grid can power and connect over 80 data centres across Hyderabad, Chennai, Kolkata, Mumbai, Delhi, Bengaluru and others at "super low speeds," said Gupta.

FOUR STATIONS

The project plots four landing stations, two of which will be at Machilipatnam and south Chennai and integrated into Lightstorm's 30,000 km terrestrial network, extending connectivity into over 80 data centres across India. Further, direct high-capacity connectivity between India, Singapore and Malaysia will be increasingly strategic for regional digital growth, as per Microsoft.

The system utilises optimal route planning combined with a deep cable burial strategy that targets three-metre depth across the entire network for the buried sections. This gives the I-2SEA cable system high level of protection and high uptime.

Aside from the four major players, the I-2SEA system is being developed under a Joint Build Agreement with NEC Corporation as the system supplier and ACPL (Continent Pte Ltd) as the marine installation partner and Telecom Malaysia will act as the landing partner in Malaysia.

JioBlackRock Asset Management plans to launch one fund every month

Mithun Dasgupta
Kolkata

JioBlackRock Asset Management plans to launch at least one fund every month, on an average, for the next two years.

The asset management company, a 50:50 joint venture between Jio Financial Services and global asset management firm BlackRock, wants to be "very digital" in terms of distribution going ahead.

After completing one year of operations, the fund house currently has an asset under management (AUM) of around ₹18,000 crore,

The fund house has an AUM of around ₹18,000 crore, comprising around ₹12,500 crore in debt

comprising around ₹12,500 crore in debt. It currently manages 15 funds — 6 fixed income funds, 4 index funds, 3 active equity funds and 2 hybrid funds.

"SEBI has already approved a balanced advantage fund. For such funds, the distribution contribution is always higher than direct contribution. So, once with all

the distribution we are able to open all the schemes, we will launch this balanced advantage fund. We are ready with the strategy. We will be launching in a few months the first few exchange traded funds (ETFs).

In the GIFT City, we will be launching two funds initially and then over the next two-three years, we will keep launching a few schemes," Rishi Kohli, Chief Investment Officer, JioBlackRock Asset Management, told *businessline*.

"We want to launch at least one fund every month, on an average, for the next two years. So, the plans are very aggressive," Kohli said.

Adani Enterprises launches ₹10,000-cr QIP

Our Bureau
Ahmedabad

Adani Enterprises Ltd on Thursday launched its ₹10,000-crore qualified institutional placement (QIP), setting a floor price of ₹3,034.68 per equity share for the issue, a discount of 4.5 per cent from its Thursday's closing price of ₹3,177.50, as the flagship Adani Group company looks to fund expansion projects, pare debt and pursue acquisitions.

According to the preliminary placement document filed with stock exchanges, it plans to utilise the net pro-

ceeds to fund capital expenditure at subsidiaries, including setting up a polyvinyl chloride plant and payment of the concession fee for the six-lane Chennai Outer Ring Road tolling, operation, maintenance and transfer project.

INORGANIC GROWTH

The proceeds will also be used to repay or prepay outstanding borrowings of Adani Enterprises and its subsidiaries, including Mundra Solar PV Ltd, Adani Airport Holdings Ltd and Kutch Copper Ltd, besides funding inorganic growth through acquisitions and investments.

Visa unveils payment passkey in India

Press Trust of India
Mumbai

Digital payment authentication must move beyond passwords and one-time passwords (OTPs) as AI-driven commerce gathers pace, a top Visa official said on Thursday. "Authentication cannot remain dependent on passwords or one-time codes designed for an earlier digital era. It must become secured by design, invisible to the consumer, and resilient against increasingly sophisticated fraud," Suresh Sethi, Group Country Manager for India and South Asia for Visa, said.

The payments major launched its 'payment passkey' solution in India. This enables consumers to authenticate online card payments using capabilities already built into their mobile devices, and helps satisfy the two-factor authentication requirement in India.
