# Bank of Maharashtra Q1 net up 23% on higher net interest income

**BETTER PERFORMANCE.** The profitability comes despite a rise in provisions for NPAs

**Our Bureau**  
Mumbai

Bank of Maharashtra (BoM) reported a 23 per cent year-on-year increase in Q1 FY26 standalone net profit at ₹1,593 crore on the back of healthy growth in net interest income (NII) and sharply lower provision for standard/restructured assets.

The Pune-headquartered public sector bank had recorded a net profit of ₹1,293 crore in the year-ago period. The profitability in the reporting quarter comes despite a rise in provisions for non-performing assets (NPAs).

For FY26, Nidhu Saxena, MD and CEO, gave an overall credit growth guidance of 17 per cent (18-19 per cent),

## Healthy growth

	Q1FY26 ₹ cr	Q1FY25 ₹ cr	% change
Net profit	1,593	1,293	23.20
Net int income	3,292	2,799	17.61
NPA Prov	719	586	22.70
GNPA (%)	1.74	1.85	
NNPA (%)	0.18	0.2	

maintain CASA (current account, savings account) deposits above 50 per cent of total deposits and target a net interest margin (NIM) of 3.75 per cent (4 per cent).

To counteract the pressure on NIMs due to the cut in lending rates following the 100-basis points reduction in repo rate, Saxena said the bank very consciously cut high-cost bulk deposits and relied more on low-cost CASA deposits.

NII was up 18 per cent year on year at ₹3,292 crore

(₹2,799 crore). NIM nudged a shade lower to 3.95 per cent (3.97 per cent).

## REDUCED NPAs

While provisions for NPAs rose 23 per cent to ₹719 crore (₹586 crore), provision for standard/restructured assets saw a sharp 67 per cent decline to ₹112 crore (₹344 crore).

Income tax provisions were higher at ₹110 crore (₹50 crore).

Gross NPAs improved to 1.74 per cent of gross ad-

vances (1.85 per cent). Net NPAs too improved a shade to 0.18 per cent of net advances (0.20 per cent).

Total deposits rose 14.07 per cent to ₹3,05,046 crore. Low-cost CASA deposits improved to 50.07 per cent of total deposits (49.86 per cent).

Saxena said, "Within the retail segment, the major contribution is coming from home loans. And last year, in Q4, the core home loan growth was 31 per cent. Overall, retail portfolio was growing at 29 per cent. We have maintained that kind of high double-digit growth in home loans... And the other contribution is coming from gold loans — with a 58 per cent growth. So, these two elements have actually contributed to a good retail growth."

# Flat trend likely to continue for the rupee

**Akhil Nallamuthu**  
bl. research bureau

The rupee gained one-fifth of a per cent on Tuesday and ended at 85.82 against the dollar. Thus, the local currency recouped the losses it made in the recent sessions, which were largely due to a recovery in the greenback.

## WEEKLY RUPEE REVIEW.

The recent surge in the dollar began after the jobs data was released in the first week of this month. Subsequently, the series of tariff threats from the US President Donald Trump is also aiding the dollar in gaining on the back of risk aversion in the market.

Not just the dollar, this also helped push the treasury yields up, a positive for the dollar.

The 10-year US Treasury yield is currently at 4.42 per cent compared with 4.20 per

GETTY IMAGES

cent at the beginning of this month.

But the downside in the rupee was arrested following the release of domestic inflation data.

India's Consumer Price Index (CPI) index for June stood at a lower 2.1 per cent compared to 2.82 per cent in the preceding month. Also, the Wholesale Price Index (WPI) inflation for June was down 0.13 per cent versus the expected increase of 0.39 per cent in the previous month.

That said, the chart shows

Last week, the rupee fell off a trendline resistance at 85.35, where the 50 per cent Fibonacci retracement of the previous uptrend coincides

some uncertainty with respect to the trend.

## TECHNICAL CHART

Last week, the rupee fell off a trendline resistance at 85.35, where the 50 per cent Fibonacci retracement of the previous uptrend coincides. While the domestic unit made a low of 86.05 on Monday, it has now recovered to 85.82.

Thus, the range of 85.25-86.00 remains valid. The broader range is 85.00-86.10. So, until either of the boundaries of the broader range is

breached, the path of the next trend will remain uncertain.

The nearest support below 86.10 is at 86.60, and the immediate resistance above 85 is at 84.60.

The dollar index, which marked a low of 96.38 on July 1, has now appreciated to 98. While the up move is too early to call it a bullish reversal, the prevailing price action hints that the dollar might have some more room to the upside.

The nearest key barrier is at 99.50 and 100. If the dollar index decisively breaks out of 100, the near-term outlook can turn positive. In such a case, the rupee might slip below the support at 86.10. However, if the dollar index resumes its fall, the rupee could rise to 85.55 and 85.25.

## CURRENCY OUTLOOK

As it stands, the near-term outlook for the rupee is likely to be range-bound between 85.25 and 86.

# HDFC Life Q1 net up 14.4% on higher renewal premium

**Our Bureau**  
Kolkata

Private life insurer HDFC Life Insurance reported a 14.4 per cent year-on-year increase in its standalone net profit to ₹546.46 crore in the first quarter of this fiscal, buoyed by a strong 18.6 per cent y-o-y growth in renewal premium.

The life insurer had registered a net profit of ₹477.65 crore in the first quarter of FY25.

During Q1FY26, net premium income grew 15.64 per cent year on year to ₹14,466.09 crore (₹12,509.62 crore).

The first-year premium

rose 8.15 per cent at ₹2,550.20 crore, whereas renewal premium increased 18.59 per cent to ₹7,602.96 crore, backed by growing back-book and high persistency ratio.

Overall annualised premium equivalent grew 15.54 per cent to ₹3,230 crore, while value of new business (VNB) during the period rose 12.7 per cent at ₹809 crore. VNB margins improved to 25.1 per cent (25 per cent).

Commenting on the results, Vibha Padalkar, MD and CEO, HDFC Life, said Q1FY26 began on a strong note, with healthy growth across topline, VNB and steady margins.

## bl.interview

**Mithun Dasgupta**  
Kolkata

The clear message that the insurance industry got from the government is that bancassurance is a key distribution channel and it has no intention of meddling with the current architecture of the model, Vibha Padalkar, MD and CEO, HDFC Life Insurance, told *businessline*.

She said she is hopeful that the agency channel should grow faster than the bancassurance over the next three years for HDFC Life.

*Edited excerpts:*

## HDFC Life Insurance

reported a 14.4 per cent growth in profit to ₹546.46 crore. What contributed to the growth?

For the company, ₹1,630 crore was the back-book surplus during the quarter, that we made from the policies we sold in the past. Our renewal premium grew around 19 per cent. And because of that, the back-book profit was generated during the period.

Now, the new business offset that profit by ₹1,330 crore, because whatever policies we sold in Q1, I have to account for the expenses as I incur them; thereby generating ₹550 crore profit. Some of it is also shareholder profit. So, the secret ingredi-

If you look at our new business premium growth, we grew about 11% vs 8% of the private sector and 5% including LIC

**VIBHA PADALKAR**  
MD and CEO, HDFC Life Insurance

ent really is renewal premium has been very strong.

**Net premium income witnessed a growth of 15.64 per cent to ₹14,466.09 crore. Are you satisfied?**

Our net premium income

growth was way better than the industry. If you look at our new business premium growth, we grew about 11 per cent vs 8 per cent of the private sector and 5 per cent including LIC.

So our mantra is doubling it every four to four-and-a-half years, which translates

to 17-18 per cent growth. But the macro environment and overall consumption are fairly low and lacklustre.

And we have a very large base-effect. In Q1FY25, our new business premium grew around 31 per cent. So, on a two-year CAGR basis, the growth comes to 21 per cent.

**Is there any clarity on IRDAI or the government's views on the bancassurance model? What is your perspective?**

There was nothing from IRDAI. It was just speculation. It's not like they have discussed anything with the industry participants.

The clear message that we get from the government is

that bancassurance is an important distribution channel. It has six times more touch points than all the insurance companies put together.

And without touch points and last-mile connectivity, you are not going to be able to sell insurance.

If you want insurance for all by 2047, then having large material curbs on bancassurance is going to be disruptive to that objective. So they have no intention of meddling with the current architecture of bancassurance. However, at the same time, they are saying that mis-selling will have to be looked at, not only by bancassurance, but by all channels concerned.

# ManipalCigna Health Insurance aims to grow footprint in TN

**Our Bureau**  
Chennai

Standalone health insurer ManipalCigna Health Insurance has outpaced the sector with a 30 per cent growth in premium in Q1 FY26, the highest among standalone health insurance (SAHI) players, the executives of the insurance firm said here on Tuesday.

Citing General Insurance Council (GIC) data, they said that the insurer has deepened its commitment to Tamil Nadu by accelerating the adoption of its new product ManipalCigna Sarvah. Sarvah contributed 52 per cent of the company's new business in Tamil Nadu during January-May 2025 with penetration higher in Chennai, they added.

With 18 offices, a network of over 1,500 empanelled hospitals and over 7,000 advisors, ManipalCigna has covered more than 11 lakh lives in the State in FY25, said Sapna Desai, Chief Marketing Officer, ManipalCigna Health. Over the last three years, the company has settled claims worth ₹101 crore in Tamil Nadu and plans to expand presence in the State with 10 more branches and add over 10,000 advisors across South India in FY26.

"Tamil Nadu presents a strong opportunity for expanding health insurance access, especially in semi-urban and emerging markets. With Sarvah, we have addressed real and recurring healthcare needs through a solution that is simple, affordable and predictable," said Ashish Yadav, Head - Products and Operations, ManipalCigna Health Insurance.

## RIISING PREMIUMS

Speaking about rising health insurance premiums, Yadav noted that once the Ayushman Bharat Health Account unique health identity scales, the industry expects onboarding to be more seamless. This will also help in more individual-specific premium setting, he added.
