MICRO TECHNOLOGIES SECURITY SOLUTIONS FOR GAS DISTRIBUTION PSU

- ✦ Order From State-owned Natural Gas Distribution Giant
- ✦ For Supply Of Vehicle Tracking Systems (Micro VTS)
- ✦ Micro VTS To Save Operational Cost Of PSU's Vast Fleet

Mumbai, April 22, 2013

Micro Technologies (India) Ltd, (MTIL: BSE 532494 & NSE: MICROTECH) a leading global developer and marketer of security devices and solutions today announces that it has received orders from India's leading natural gas distribution corporation for the supply, installation and maintenance of vehicle tracking systems for the operations and maintenance of light commercial vehicles (LCV). An official communication to this effect was received by the company from PSU which has the distinction of pioneering the natural gas distribution network in Mumbai and its neighboring areas.

Micro Technologies' cutting-edge security solutions, time-tested quality products certified by renowned national and international testing bodies, their track records and effectiveness and the company's ability to manage big projects were the main reasons for the big corporations and PSU to engage this leading security solutions provider. It may be recalled that Micro Technologies is already empanelled by PSUs, Maha Navaratna PSUs and leading companies and banks both in the public and private sectors.

Announcing the contract, Ms. Geetha V, Head- Business Development of Micro Technologies said, " We have the vast expertise in meeting the security needs of PSUs and we are already providing similar Vehicle Tracking Systems to a few of leading PSUs. We will be able to leverage our experience in offering the most effective security solution to the growing fleet of this PSU and help it save cost significantly. Identification of driving behavior like harsh driving & breaking, Optimization of Utility of Vehicles are specially customized for this project"

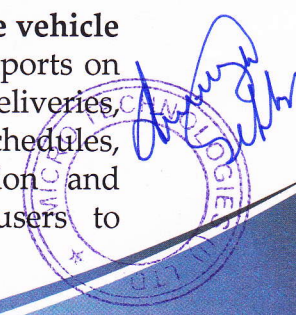

Micro Vehicle Tracking System, a web based vehicle tracking and management system using GIS, GSM /GPRS/SMS is an ideal and effective application for automated vehicle location, fleet tracking and truck tracking. Installation of Micro VTS helps the users to track their vehicles 24x7 globally. **It also ensures optimal utilization of vehicles by enabling the user to view where the vehicle is stopped and for how long.** It also furnishes timely and useful reports on transit thefts, deviations from defined routes, missed pickups or deliveries, unsafe or **harsh driving habits**, consignment tracking, delivery schedules, inaccurate fuel and mileage records, excessive fuel consumption and maintenance costs. Thus installation of Micro VTS helps the users to significantly save on the maintenance costs.

Unique Features of Micro VTS:

Micro VTS is a GPS based innovative system for vehicle monitoring and tracking. VTS hardware embedded in vehicle is integrated with web based interface called as Micro FMS using GIS, GSM /GPRS/SMS. The tracking solution furnishes timely and useful reports on transit thefts, deviations from defined routes, missed pickups or deliveries, unsafe driving habits, consignment tracking, delivery schedules, inaccurate fuel and mileage records, excessive fuel consumption and maintenance costs. It is facilitated with web map on demand tracking; It comes with many useful features like:

- ✓ **Advanced GIS Interface:** Enables the user to get the GPS based location of the vehicle on map
- ✓ **Location Identifier:** To get the GSM based location of the vehicle
- ✓ **Battery Backup:** In case the vehicle battery is disconnected, then Micro VTS will be automatically switched to the provided internal battery backup facility
- ✓ **Battery Alerts:** SMS alert in case internal / vehicle battery gets low or in case internal/vehicle battery connected /disconnected
- ✓ **Device Protection:** An SMS alert in case anyone attempts to tamper the device

About Micro Technologies (India) Ltd.

Established in 1992, MTIL is a leading global developer and marketer of security solutions. It is an ISO 9001, 14001 & 27001 company. MTIL has already received certifications from prestigious national and international testing organizations like PESO, ERTL, EMC, SAIAS, and ARAL It has also recently received A Tick Mark & CB Certification from TUV Rheinland, an internationally renowned German Certification body.

Product line includes the much-needed security devices, life style and support systems and web-based software. MTIL has a long track record of offering leading-edge security solution products. The company focuses on innovation, advanced technology and on making the life of people safe, secure and manageable in terms of security, time and money. The company has grabbed many national and international awards for its growth and R&D.
