MICRO TECHNOLOGIES INNOVATES & LAUNCHES ADVANCED VEHICLE SECURITY SOLUTION AWARDED CONTRACT BY A LEADING MUNICIPAL CORPORATION

- **Micro Wins Order Amid Stiff Competition Due To Cost Effectiveness & Technological Superiority Of Micro VBB**
- **First Municipal Corporation To Avail Of Innovative Micro VBB Fuel Sensor**
- **Unique Features Include Advanced GIS Interface, Location Identifier, Device Protection**
- **Supplies Feature -Rich Vehicle Tracking & Management System**

Mumbai, December 24, 2012

Micro Technologies (India) Ltd., (MTIL: BSE 532494 & NSE: MICROTECH) a leading global developer and marketer of state-of-the-art security devices and solutions today announces that it has developed and launched a new high-tech version of Micro Vehicle Black Box integrated with Fuel Sensor to be deployed in an established municipal corporation's vast fleet in western India as its first client for the new product.

Commenting on winning the contract, **Mr. Karthikeyan R, COO, Micro Technologies (India) Ltd** said, "We are glad to give our innovative solution to a 63 year old municipal corporation amid stiff competition, due to its cost effectiveness and technological superiority. Out of various municipal corporations that have evinced interest, this is the first municipal corporation that has seized the opportunity to use our innovative vehicle security solution integrated with fuel sensor with its unique features such as **Advanced GIS Interface, Location Identifier, IP65 Enclosure, Battery Backup, Battery Alerts and Device Protection**. It clearly demonstrates our products' quality, efficiency, smooth functionality and capability. We look forward to leveraging our extensive security solutions expertise to provide vehicle safety and security. We are already working on implementing the cloud computing process for this."

The lucrative contract involves implementation of Vehicle Tracking Management System (VTMS) including supply, installation, configuration and maintenance of necessary hardware and IT applications.

Curbs Alarming Vehicle & Fuel Thefts

The latest National Crime Records Bureau report says 'auto theft' in the country accounted for 44.4% (1, 51,200 cases) of the total theft cases, which accounted for an increase of 2.5% in 2011. The urban agglomeration centres accounted for 38.8% (67,880 out of 1, 51,200 cases) of the total auto theft cases in the country. In 2011, diesel mafias operated a racket worth Rs 50 to 60 Cr at India's major port trust alone. Looking forward to the rising demand and alarming figures as mentioned, Micro VBB with its new innovation helps in curbing diesel thefts.

Unique Features Of Micro VBB:

Micro VBB Tracker with Fuel Sensor is a GPS based innovative system for vehicle monitoring and tracking. Micro VBB hardware embedded in vehicle is integrated with web based interface called as Micro FMS using GIS, GSM /GPRS/SMS. It furnishes timely and useful reports on transit thefts, deviations from defined routes, missed pickups or deliveries, unsafe driving habits, consignment tracking, delivery schedules, inaccurate fuel and mileage records, excessive fuel consumption and maintenance costs. It is facilitated with web map on demand tracking. It comes with many useful features like:

- **Advanced GIS Interface:** Enables the user to get the GPS based location of the vehicle on map
- **IP65 Enclosure:** Provides complete protection from dust, oil, other non-corrosive material and water
- **Location Identifier:** To get the GSM based location of the vehicle
- **Battery Backup:** In case the vehicle battery is disconnected, then Micro VBB Tracker will be automatically switched to the provided internal battery backup facility
- **Battery Alerts:** SMS alert in case internal / vehicle battery gets low or in case internal/vehicle battery connected/disconnected
- **Device Protection:** An SMS alert in case anyone attempts to tamper the device

About Micro Technologies India Limited

Established in 1992, MTIL is a leading global developer and marketer of security solutions. It is an ISO 9001; 14001 & 27001. MTIL has already received certifications from prestigious national and international testing organizations like PESO, ERTL, EMC, SAIAS, ARAI. It has also recently received A Tick Mark & CB Certification from TÜV Rheinland an internationally renowned German Certification body.

Product line includes the much-needed security devices, life style and support systems and web-based software's. MTIL has a long track record of offering leading-edge security solution products. The company focuses on innovation, advanced technology and on making the life of people safe, secure and manageable in terms of security, time and money. The company has won many national and international awards for its growth and R&D.
