## **MEDIA RELEASE**

### **MICRO TECHNOLOGIES BAGS ORDERS FOR SECURITY SYSTEMS FROM INDIA'S LARGEST BANKS**

- **Micro Under Vehicle Surveillance System to inspect vehicles entering into the bank's premises.**
- **Micro Access Control System with Biometrics to check the bonafide of people coming into bank's specific areas**

**Mumbai, October 22, 2012**

**Micro Technologies (India) Ltd, (MTIL- BSE 532494 & NSE: MICROTECH)** a leading global developer and marketer of security devices and solutions today announces that it has received orders from India's largest banks for the supply of its Micro Under Vehicle Surveillance System (Micro UVSS) for carrying out security checks on vehicles and Micro Access Control System (Micro ACS) for authenticating defined entities entering its premises and specific areas.

Announcing the signing of the contract, Ms. Geetha V., Northern India Regional Head, Micro Technologies (India) Limited said, "We are glad to provide our most effective Micro UVSS & Micro Access Control System to India's largest banks. Our Micro UVSS has certain distinct advantages over the conventional ones. Apart from bank premises it can be used in airports, malls, theatres, stadium, hotels, custom checkpoints, government buildings and at law enforcement agencies. Our Micro Access Control System has many useful features and functional capabilities that will not only provide robust security but also ensure authentic access to the premises."

Micro UVSS facilitates the careful scrutiny of the under vehicle by providing the entire image of the underside of the vehicle to detect suspicious objects. In contrast to the conventional under vehicle inspection methods, like hand-held mirrors or inspection wells, It is an advanced security solution enabling visualization of underside of any vehicle in real time. It helps security in-charge to check vehicle to detect possible threats e.g. Bombs, arms, contrabands, drugs, trespassing etc.

### **Micro Access Control System (Micro ACS)**

The objective of the bank in installing Micro Access Control System with Biometrics is to let only authorized entities into specific places. Biometric devices verify entities by their hand, eye, fingerprint, or voice recognition. The biometric time clock assures that no employee can punch in for another, eliminating time fraud and reducing payroll costs. Because every person's biometric characteristics ( Fingerprint, eyes, face, etc.) is unique, a biometric time clock provides a quick, accurate, and reliable way to record in-punches and out-punches for each employee.

### **About Micro Technologies (India) Limited**

Established in 1992, Micro Technologies (India) Ltd. is a leading global developer and marketer of security solutions for its clients. It is an ISO 9001, 27001 & 14001 Certified Company with products approved and certified by many national and international certifications like NASSCOM, ARAI, ERTL and UL & EMC. Product lines include the much-needed security devices, life style and support systems and web-based software. Micro Technologies has a long track record of offering leading-edge security solution products. The company focuses on innovation, advanced technology and on making the life of its clients safe, secure and manageable in terms of security, time and money. The company has won many national and international awards for its growth and R&D. Micro Technologies aims at displaying not just the technological innovation and prowess but also the product diversity in various segments of vehicle, premises, mobile and other assets. It is now vigorously entering the Energy & Health Segments.
