MICRO TECHNOLOGIES SECURITY SOLUTIONS EMPANELLED BY AIRFORCE FOR PROVIDING CUTTING-EDGE SECURITY SOLUTIONS

- ❖ For Supply Of Mission-critical Security Solutions
- ❖ Micro's Products To Play A Key Role In Air Force Modernization Program
- ❖ High-value Order to Boost Micro's Image, Revenue & Market Share.

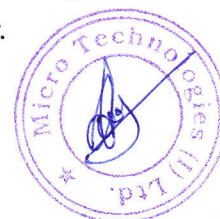

Mumbai, February 11, 2013

Micro Technologies (India) Ltd. (MTIL - BSE 532494 & NSE : MICROTECH), a leading global developer and marketer of security devices and solutions, announces today that it has been empanelled by the Air Force for the supply of mission-critical state-of-the-art security systems. An official communication to this effect was received by the company.

Disclosing the news, **Mr. Karthikeyan R, COO - MTIL** said, "We are glad to be empanelled by the Air Force. That the security conscious Air Force which is securing the country empanelling Micro Technologies is a standing testimony to Micro's prowess and credibility. It's one more feather in our cap. It clearly demonstrates our product capabilities and our commitment to the security of our nation."

The Air Force has earmarked a significant outlay over the next 10 years to step up its modernization program. Micro's cutting-edge security products and solutions approved and certified by internationally renowned labs and testing bodies, their track record and its ability to manage huge projects were the main reasons for the Air Force to empanel the leading security solutions provider. The present empanelment will not only boost Micro's revenue and market share in the security space but can also establish the company as one of the most dependable security solution providers in India.

Micro Technologies will be providing a wide range of comprehensive and highly integrated software security solutions which will ensure that the right authority is intimated about the incident through the use of Metal Detectors, Vehicle Inspection Mirrors, Automated Gates, Access Control Systems, Closed Circuit Television Systems, Boom Barriers and Entry Management Systems which can be conveniently controlled by security personnel via Micro Technologies' International Command & Control System (ICCS) from their respective command center.
