

Micro Technologies Communication product Micro Lifeline (MLL) crosses the 5 Million Subscribers Mark

Mumbai March 22, 2012: A global unique communication tool, Micro Lifeline crosses the 5 million user mark. Micro Lifeline is an intelligent scheduler and communication tool by Micro Technologies (India) Ltd.

Micro MLL redefines the process of communication with minimal time and effort. It's a tool that efficiently manages all the communication related problems. Apart from its individual utilization, MLL was launched also to effectively serve a significant unmet market need for a secure, purpose-built communication solution designed specifically for corporate users.

Some of the significant features of Micro Lifeline are:

MLL Cue: Helps to remember important events.

MLL Docs: Sharing documents with a single SMS to anyone around the world.

Mobile Backup: Retrieving contacts with just an SMS from the registered mobile.

MLL Wallet: Saving and retrieving online passwords when needed.

Announcing that MLL has crossed the 5 million mark, **Mr. Aditya S, Chief Strategic Officer** said, "We are glad that MLL has crossed the 5 million user mark. Sectors such as emergency services finance and legal, corporate, government and hospitality have a great demand of this product. We foresee an accelerated growth in the user base in the months to come".

Micro MLL is very useful for those working in large and complex set ups like corporate, banks etc.
