ASIAN CHAMPIONS TROPHY

India Complete Hat-trick, Beat Japan 4-1 in Final

Mohali: Defending champions India beat Japan 4-1 in the final to register a hat-trick of titles and sixth crown overall at the men's hockey Asian Champions Trophy on Thursday. Asian Games gold medallists India had earlier won the tournament in 2011, 2016, 2018, 2023 and 2024. It was, however, Japan who stunned the Indian team in the third minute by scoring a field goal through Kazumasa Matsumoto. India got their acts together afterwards and scored through Shilannd Lakra (42nd minute) from a penalty corner, Dipreet Singh (48th) from a field play and Jugraj from yet another set piece in the 53rd minute. Vivek Sagar Prasad made it 4-1 for the home team in the 54th minute. **PTI**

Chennai Super Kings have traded fast bowlers Khaleel Ahmed and Nathan Ellis to Sunrisers Hyderabad in exchange for all-rounders Liam Livingstone and Jack Edwards ahead of next year's IPL season, the organisers said on Thursday. **Reuters**

The ODI series opener between India and Sri Lanka on December 13 was on Thursday shifted from Delhi to Visakhapatnam. The air pollution in the national capital is at its peak and with the outfield being relaid at the Arun Jaitley Stadium, the Delhi and District Cricket Association had requested the BCCI to move the game elsewhere. **PTI**

AN UNWANTED RECORD

Referee Hands Out 53 Red Cards After Mass Brawl

An under-20s match in the Brazilian state of Minas Gerais descended into complete chaos, with the referee having to hand out a record 53 red cards following a massive brawl. The brawl took place during the first leg of a state championship semifinal match between Uberlandia and Mamore on Sunday. According to reports, Mamore player Davi taunted Uberlandia players during the goal celebrations, which sparked a massive brawl and led to a deluge of red cards. A total of 43 players and 8 members of the coaching staff were sent off, while 2 Uberlandia board members were also dismissed. **Reuters**

After 23 years, Ronaldo bids farewell to Portugal following a bitter falling-out with coach Jesus

- **20 August 2003** Made his senior Portugal debut against Kazakhstan
- **2004** Reached the European Championship final on home soil
- **2016** Captained Portugal to their first European Championship title
- **2019 & 2025** Won the UEFA Nations League
- **2021** Became the leading scorer in men's international football
- **2026** Became the first man to score at six different World Cups

Tales Azzoni

Cristiano Ronaldo won't play for Portugal anymore, ending on Thursday a career that spanned six World Cups and included a European title and the men's all-time international scoring record.

His announcement marked the end of a lauded career that began more than two decades ago before Euro 2004 and finished with him walking out on the national team after falling out with coach Jorge Jesus.

"To the Portuguese people, the day has come for me to hand back the No. 7 shirt of our national team," the 41-year-old Ronaldo said in a long video message on social media. "I never felt it belonged to me alone but for 23 years I had the privilege and the responsibility of wearing it, defending it and carrying it with me into stadiums all around the world.

"Today the time has come to pass it on to the future. It was not an easy decision because some decisions are not made with the mind alone. They are also made with the heart. A journey that began in August 2003 and changed my life forever has come to an end."

Ronaldo will keep playing at club level, which he is expected to finish at the end of this season with Al-Nassr in Saudi Arabia.

He is in pursuit of his 1,000th career goal and sits on 985. Of those, a record 146 goals came in 234 appearances with Portugal.

While long-time peer Lionel Messi finished his career with Argentina last month after a much anticipated farewell match, Ronaldo's final appearance with Portugal has ended up being on Sept. 24 in a 1-0 home win over Wales in the Nations League.

Jesus kept him on the bench for the following match and said he didn't plan to start him in the next one, so Ronaldo decided to leave the team's training camp. Jesus later said Ronaldo would be welcome back and the decision to return was up to him.

> **It was not an easy decision because some decisions are not made with the mind alone. They are also made with the heart. A journey that began in Aug 2003 and changed my life forever has come to an end**
> CRISTIANO RONALDO

The Portuguese football federation released a statement expressing "deep gratitude and immense admiration" for Ronaldo's service to the country.

"Cristiano Ronaldo has raised Portugal's profile and inspired generations of young people who dream of following in his footsteps; for many of us, he is the greatest player of all time!" the federation said.

It said it intends to organise a tribute to Ronaldo "in which the fans and the country can one more time applaud and celebrate a player who has given us so much."

Before Ronaldo debuted for Portugal, they had never won any major trophies. Then he and successive generations of talented teammates made Portugal a regular presence at major tournaments.

Portugal won their first major title at Euro 2016, and the Nations League in 2019 and 2025. "Throughout my entire career with the national team, I always pushed myself beyond my limits," Ronaldo said. "I wanted to win. I wanted to be better. I wanted to make history. I always demanded the most of myself. I always wanted more. I always believed we could go further. And I gave everything I had for this shirt."

Portugal qualified for the World Cup only three times before Ronaldo's time — 1966, 1986 and 2002. On his watch, Portugal qualified every single time. The same was true for the Euros, which Portugal had played only three times before Ronaldo — 1984, 1996 and 2000. After he arrived they played in the tournament every time.

At the World Cup, Portugal went as far as fourth place with Ronaldo, in his tournament debut in 2006. It was among the title candidates nearly every time after that, though, with a best result a quarterfinal appearance in 2022. **AP**

FPI OUTFLOWS A WORRY

Stakeholders' Views Differ on LTCG Tax, STT

THREE OPTIONS Scrapping LTCG altogether, removing it just for foreign portfolio investors and lowering the rate

Deepshikha Sikarwar & Nishanth Vasudevan

New Delhi | Mumbai: Key stakeholders are offering divergent prescriptions on how to address concerns over long-term capital gains tax (LTCG) tax and securities transaction tax (STT).

These include scrapping LTCG altogether, removing it just for foreign portfolio investors (FPIs), or lowering the rate. As for STT, suggestions include reducing it for some products and increasing it for others, people familiar with the discussions said.

"A well thought-out call would be taken," said an official. Finance minister Nirmala Sitharaman has said she will consider investors' concerns regarding LTCG. These measures are being considered as a way of stemming the exodus of overseas investors that has led to a slump in Indian stock markets.

While the LTCG collections amounted to ₹1.29 lakh crore in FY25, those for STT stood at ₹57,522 crore. Any call on the levies would have to take into account the revenue impact and funding for social sector schemes and subsidies.

Finance ministry officials have met senior market participants to seek their views on capital market taxation. ET had reported on October 28 that the finance ministry officials had reached out to stakeholders on the issue.

Financial sector regulators including the Reserve Bank of India and the Securities and Exchange Board of India (Sebi) are understood to have backed the idea of doing away with LTCG to make India an attractive destination for foreign investors.

Most participants favoured abolishing LTCG on equities while suggesting that the government could consider a marginal increase in STT on options trading alone, leaving cash and futures transactions untouched. They argued that options account for the bulk of daily trading activity and have been the focus of regulatory efforts to curb excessive speculation, people said.

Some participants have cautioned against extending preferential tax treatment to FPIs alone, saying such a move could draw criticism from domestic investors. Short-term capital gains on listed equities, held for up to one year, are currently taxed at 20%, while long-term gains on holdings exceeding one year attract a 12.5% levy.

Foreign portfolio investors have argued that several competing markets in the region do not levy LTCG, putting India at a disadvantage.

Market participants said the combination of rupee depreciation and capital gains taxation has weighed on foreign investors' dollar-denominated post-tax returns, making other markets more attractive. One of the suggestions that has been put forth is calculating an FPI's taxable capital gains in dollar terms rather than rupees, said one of the persons.

Separately, some FPI representatives also sought simplification of procedures governing the inflow and repatriation of foreign capital, calling for easier processes to bring funds into India and take money out of the country. Market participants said senior finance ministry officials have patiently heard out their suggestions.

Solar Module Market may Double by 2028: Report

Mumbai: India's market for solar module components could more than double to $7.8 billion (₹74,100 crore) by March 2028 from about $3.6 billion (₹34,200 crore) in September 2026, driven by rising domestic manufacturing capacity and demand, according to a study by the Council on Energy, Environment and Water (CEEW).

However, timely commissioning of planned manufacturing facilities and assured demand from solar module makers will be critical for the industry to realise its potential, the study said. It also said India has the industrial base to manufacture most of the components used in solar modules, excluding solar cells. — **Our Bureau**

Tax Devolution to States in November ₹2.18L Cr

Our Bureau

New Delhi: The Centre on Thursday released ₹1.09 lakh crore to state governments as tax devolution, advancing the November instalment by five days to help states step up capital expenditure and meet development and welfare commitments during the festive season.

The instalment, normally scheduled for November 10, was released on November 5, providing states with additional liquidity to accelerate infrastructure spending and support ongoing welfare programmes. The latest transfer follows an earlier release of ₹1.09 lakh crore this month, taking the total tax devolution to states in November to ₹2.18 lakh crore.

Uttar Pradesh emerged as the biggest beneficiary, receiving ₹19,208 crore, followed by Bihar at ₹10,845 crore, Madhya Pradesh at ₹8,010 crore, West Bengal at ₹7,866 crore and Maharashtra at ₹7,022 crore. Rajasthan received ₹6,460 crore.

Among other major recipients, Odisha was allocated ₹4,819 crore, Andhra Pradesh ₹4,597 crore, Karnataka ₹4,504 crore, Tamil Nadu ₹4,466 crore and Gujarat ₹4,094 crore. The finance ministry said the advance release was intended to enable states to accelerate capital spending and finance development and welfare-related expenditure during the festive season.

According to Controller General of Accounts data, the Centre's capital expenditure stood at ₹6.55 lakh crore as of September 30, equivalent to 53.6% of the full-year budget estimate of ₹12.22 lakh crore. This compares with 51.8% of the annual target achieved during the corresponding period last year.

The Centre's fiscal deficit stood at 7.14 lakh crore at the end of September, or 42.1% of the full-year target of ₹16.96 lakh crore, against 36.5% in the year-ago period.

MEETING AHEAD OF BUDGET

PM Modi Asks Niti Aayog to Devise Ideas for Improving Ease of Living

Our Bureau

New Delhi: Prime Minister Narendra Modi on Thursday nudged the new leadership team at NITI Aayog to come up with transformative ideas that can substantially improve the ease of living for people at the bottom, while also touching upon the long-term developmental goals for the country.

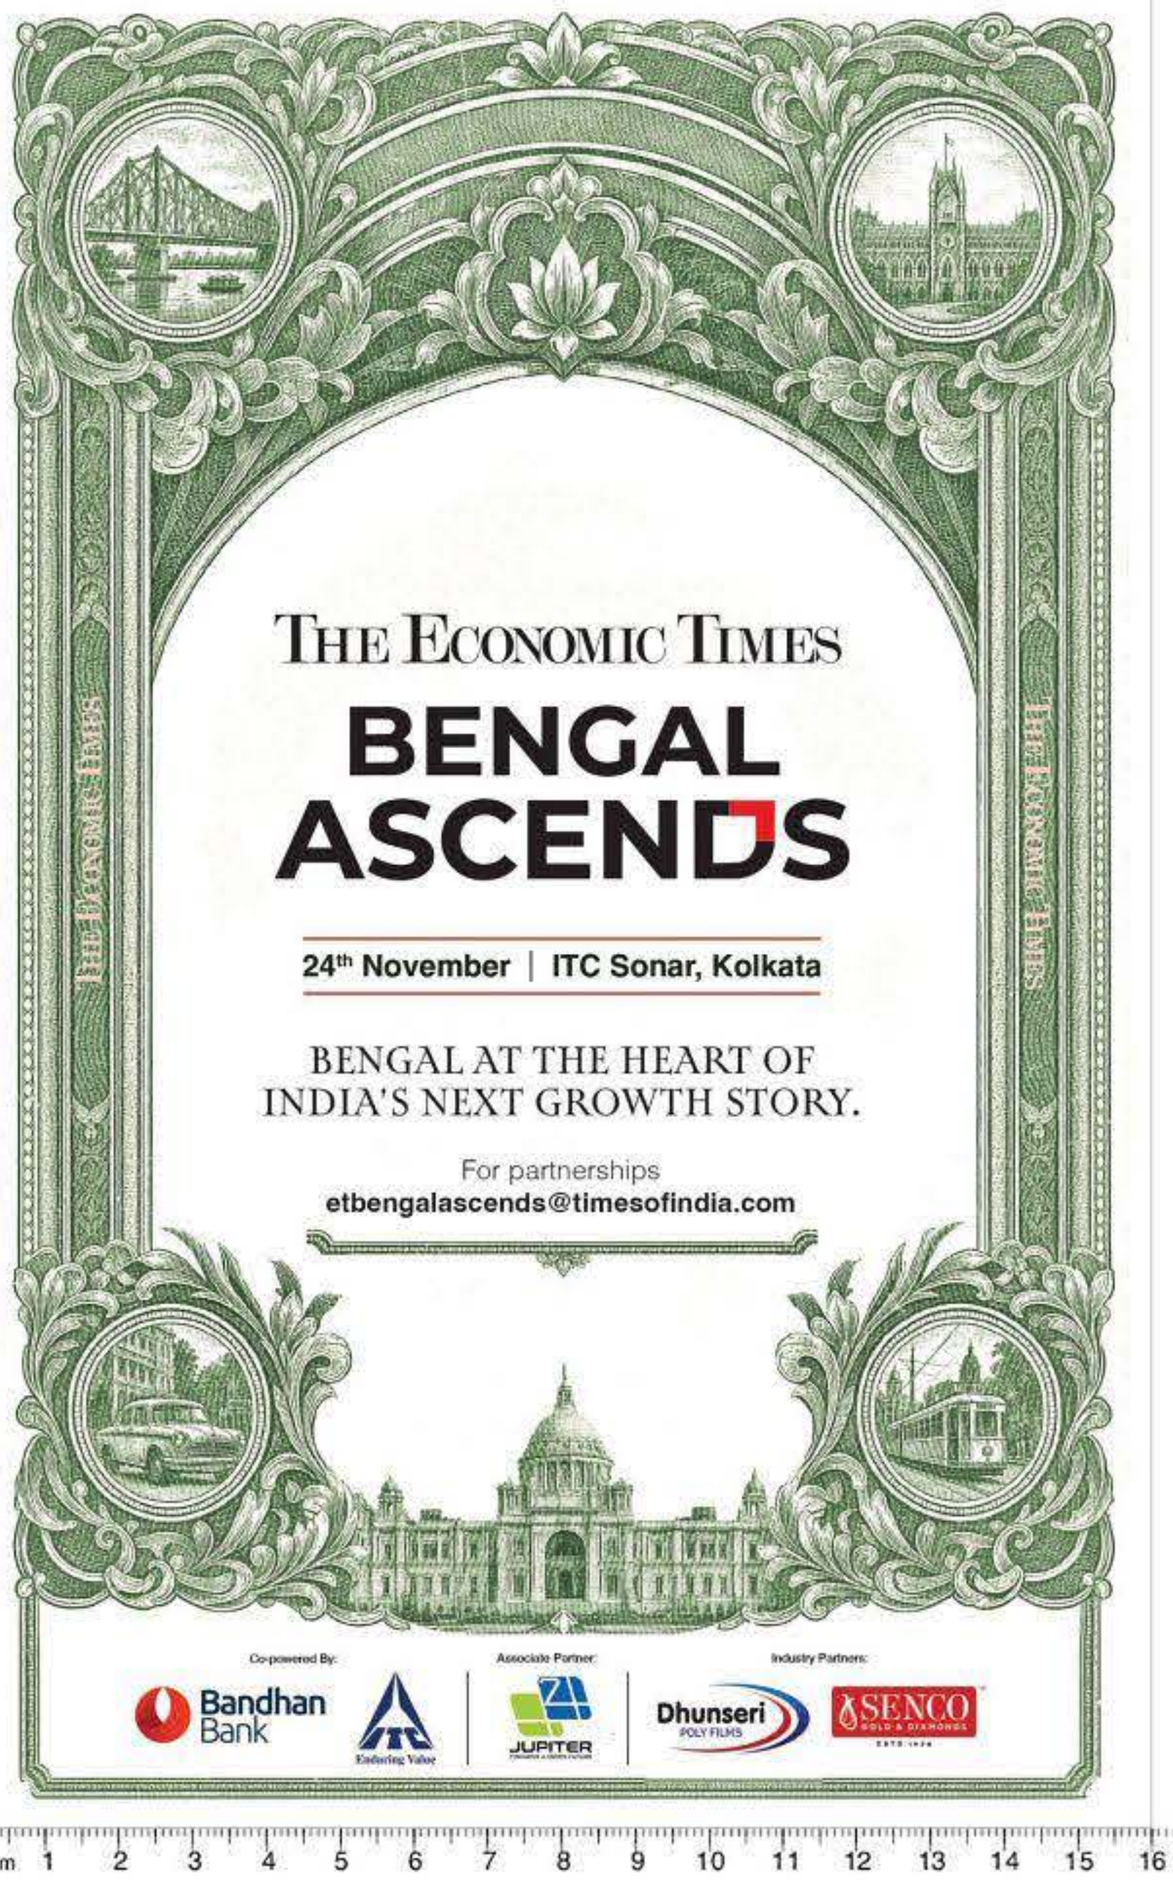

In his two-hour interaction with the Aayog's chairman Ashok Lahiri, CEO Anurag Jain and members, Modi emphasised the need to collaborate and cooperate with top research institutions, academic institutions and state governments to take up initiatives that can make a difference at the ground level, said an official, aware of the deliberations.

ET has learnt that the prime minister also directed the Aayog to continue to focus on aspirational districts, blocks and the backward classes, urging the top officials to go out on the ground and do a reality check. He briefly touched upon the need for employment generation to reap the benefits of the demographic dividend, creation of world-class infrastructure and strengthening of domestic capabilities across manufacturing and technology-driven sectors.

The meeting gains significance as the government begins shaping priorities for the 2027-28 Budget amid global uncertainty and the need to sustain growth, boost manufacturing and create jobs. The prime minister is the chairman of the Aayog.

Members Rajiv Gauba, R Balasubramaniam, Joram Aniya, KV Raju, M Srinivas, Gobardhan Das and Abhay Karandikar attended the meeting. The meeting comes as India seeks to strengthen domestic manufacturing, improve infrastructure and expand employment opportunities amid rising geopolitical uncertainty.

The visit to meet officials is rare, though the prime minister has regularly visited the Aayog in the past to chair the annual meeting of its governing council or meet economists ahead of the budget for macroeconomic deliberations.

Chicken, Egg Prices May Rise 30% by December as Feed Costs Double

Maize and broken rice prices have surged 30-45% in a month amid hoarding by traders & farmers

Jayashree Bhosale

Pune: Prices of eggs and chicken are expected to jump 25-30% by December as the costs of poultry feed like maize and broken rice have surged by 30-45% in the last one month from a year ago.

Prices of maize and broken rice have doubled over the last year. With traders and farmers hoarding maize, the maize-based industry expects the prices to carry the rally into December.

Maize prices, which were around ₹18/kg last year, have increased to ₹34/kg today, while a month ago, they were around ₹26-27/kg. The industry is worried that the prices may touch ₹40/kg by December as the supply chain intermediaries tend to hoard the commodity expecting the prices to rise.

Prices of broken rice, which were ₹14-15/kg around November 2025 are at ₹31-32/kg now. They were around ₹22-23/kg a month ago, trade data showed.

According to industry estimates, the deficient monsoon in key kharif maize growing states of Maharashtra and Karnataka is expected to pull down the country's kharif maize production by 15-16%.

"Earlier, whenever prices of maize and rice increased, we used to shift to other cereals like jowar, bajra, ragi etc. However, even these cereals are expensive to use in poultry feed now," said KG Anand, general manager of Venkateshwara Hatcheries. The wholesale egg prices, around ₹6-7/egg at present, are expected to increase to ₹7-8/egg by December, while the wholesale price of without skin dressed chicken is expected to increase from ₹225-250/kg to ₹260-275/kg by December, said top industry executives.

"Although the increase in production costs has been high, we cannot pass the entire increase in costs to the consumers," said Anand.

The months of December and January are peak consumption months for the poultry industry as demand spikes between Christmas and New Year celebrations.

"This year, we are expecting the production to fall by more than 20% during December and January as farmers are likely to sell younger birds in order to reduce the cost of feeding them," said Anand.

Maize prices have been continuously moving upwards as the diversion of maize for ethanol has increased, while rice prices have been increasing as the deficient monsoon is expected to reduce production of the kharif paddy crop.

Feeling the Pinch

Maize prices climb to ₹34/kg from ₹18/kg a year ago

Broken rice prices rise to ₹31-32/kg from ₹14-15/kg

Kharif maize production may fall 15-16% due to deficient monsoon in Maharashtra and Karnataka

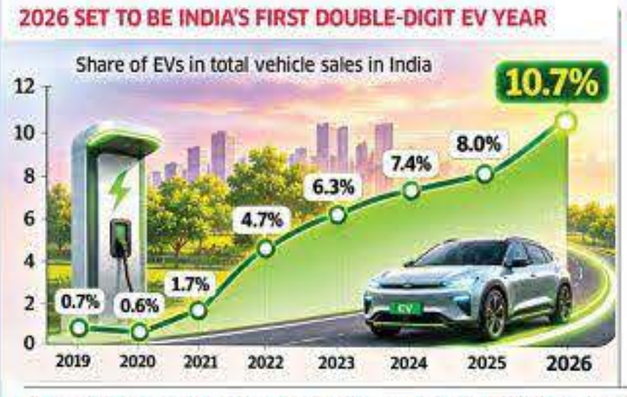

Alternative cereals such as jowar, bajra and ragi have also become expensive

Poultry production may fall over 20% in December-January as farmers sell younger birds to cut feed costs

EV Share Slips in Oct, But Stays Above 10%

Electric vehicles made up 11.2% of India's vehicle sales in October, their lowest share since May. The dip, however, is unlikely to change the bigger picture. EVs accounted for 10.7% of sales so far this year, up from 8% in 2025, putting 2026 on track to be the first year in which electrics cross the double-digit mark. Odisha, Telangana and Andhra Pradesh posted the sharpest gains, an ET analysis of official registration data shows. Businesses are also switching to electric vehicles much faster than individuals and government bodies. However, three-wheelers continue to drive most of the adoption. **Anna Catherine Jijo** has the analysis.

Solar Components Market Likely to Double by Mar '28

Mumbai: India's market for solar module components could more than double to $7.8 billion (₹74,100 crore) by March 2028 from about $3.6 billion (₹34,200 crore) in September 2026, driven by rising domestic manufacturing capacity and demand, according to a study by the Council on Energy, Environment and Water.

However, timely commissioning of planned manufacturing facilities and assured demand from solar module makers will be critical for the industry to realise its potential, the study said.

The study said India has the industrial base to manufacture most of the components used in solar modules, excluding solar cells. These include solar glass, aluminium frames, copper ribbons, encapsulant sheets, backsheets and junction boxes, collectively known as the bill of materials (BOM).

US FDA Flags Data Integrity Lapses, Poor Conditions at India Drug Units

Vikas Dandekar & Rica Bhattacharyya

Mumbai: The US Food and Drug Administration (FDA) continues to find serious data-integrity violations at Indian pharmaceutical manufacturing facilities and clinical research organisations, making information they submit for regulatory assessment unacceptable, a senior agency official said.

Eight years after FDA issued guidelines on data integrity, its inspectors continue to find violations that require the affected studies or tests to be repeated for reliable data, Constance Richard-Math, the agency's deputy country director in India, told an industry gathering in Mumbai. FDA's routine or unannounced inspections have also uncovered cases in which truckloads of key documents relating to analytical testing, manufacturing procedures and storage were discarded, including records destroyed using paper shredders, Richard-Math said. These violations, she warned, impedes building reliable and resilient supply chains.

FDA inspections continue to identify unacceptable and, in some cases, gross insanitary conditions in manufacturing facilities, she said, sharing pictures of dirty and dilapidated facilities. Richard-Math urged drugmakers to look beyond their own facilities and scrutinise suppliers, vendors and other entities across the supply chain to ensure the safety of medicines. "These may not be your facilities, but I would ask you to look beyond the walls of your own facilities: know your suppliers, know your vendors, know who is operating within your supply chain," she said. "If you identify facilities operating at this level, whether they are vendors, contractors or even companies operating in your community, do not look the other way."

FDA SCRUTINY

Eight years after issuing data-integrity guidelines, the US FDA continues to flag violations, often requiring tests to be repeated, said Constance Richard-Math, the agency's deputy country director in India.

US POLL FLIP WEIGHS

Nasdaq 100 Slides 3% as Chip Stocks Extend Selloff

Bloomberg

The rout in chipmakers gathered pace, with investors weighing any potential impacts of a Democratic sweep of Congress on the artificial-intelligence trade that has powered the bull market in stocks.

A gauge of chip giants extended a plunge from a June record to 34%. Qualcomm and Arm Holdings's outlooks left Wall Street underwhelmed. The Nasdaq 100 lost 3%. Apple is planning to raise about $7 billion from an investment-grade bond offering to help fund share buybacks, adding to a flurry of debt issuance by US technology heavyweights.

MARKET MILESTONE Fall in crude oil price fuels rally with a steady flow of IPOs also helping grow mcap; But analysts suggest caution as profit-booking, geopolitics could still weigh

D-Street Enters ₹500-L cr Club Even as Sensex Way Below Peak

Ravindra Sonavane

Mumbai: The combined market capitalisation of all companies listed on the BSE crossed ₹500 lakh crore for the first time Thursday, reaching around ₹502 lakh crore ($5.31 trillion) amid a broad-based rally in equities and a steady addition of newly listed companies.

It took 622 trading sessions for the total mcap to rise from ₹400 lakh crore, first crossed on April 8, 2024, to the latest milestone. The mcap first crossed ₹100 lakh crore on March 12, 2014, and took 1,494 sessions to reach ₹200 lakh crore on February 4, 2021. The ₹300 lakh crore milestone was reached on July 6, 2023, after another 586 sessions, while the subsequent rise to ₹400 lakh crore took 181 sessions.

The latest milestone is significant because it comes even as the benchmark Sensex and several broader market indices remain below their record highs. The Sensex is still 7.6% below its peak of 85,836, recorded on September 26, 2024.

The BSE MidCap 150 is 5.3% below its record of 17,373, reached on August 26, 2026, while the BSE SmallCap 250 is 8.4% below its peak of 7,514, recorded on September 23, 2024. The BSE MicroCap 250 is 7% below its record of 19,988, reached on September 8, 2026.

A steady stream of initial public offerings (IPOs) has also contributed to the expansion of the overall mcap, even as several benchmark indices remain below their peaks. In 2024, 94 companies made their mainboard debut, adding around ₹12 lakh crore to mcap on their listing days. In 2025, 115 companies listed, adding nearly ₹14 lakh crore, while 107 companies have listed so far in 2026, adding above ₹25 lakh crore.

"The large number of IPOs has added to the overall mcap. At the same time, several companies outside the main indices have participated in the rally, helping total mcap reach a record even as major indices remain below their peaks," said Ankur Punj, MD, Equirus Wealth.

The latest milestone has also coincided with a sharp recovery in equities. The Sensex and Nifty have gained more than 8.1% each in six consecutive sessions. The BSE MidCap 150 has advanced over 8.4% in eight of the past nine sessions, while the BSE SmallCap 250 has risen around 7% in seven of past eight sessions.

The rally has been supported by a decline of more than 19% in crude oil prices over the past three sessions, easing concerns over inflation, India's import bill and the rupee. Strong foreign portfolio investor (FPI) buying, with net inflows of over $3.4 billion in the past 12 sessions, positive global cues, reduced uncertainty following the US midterm elections and better-than-expected second-quarter earnings have also lifted investor sentiment.

"The momentum could continue in the near term if crude prices remain stable at lower levels and foreign inflows sustain. However, investors should remain cautious as geopolitical developments, crude price volatility and profit booking after the sharp rally could limit further upside," said Ravi Singh, chief research officer at Master Capital Services.

VNB MARGIN EXPANDS; INDIVIDUAL APE FLAT

LIC Net Up 20% in Q2 on Higher Premiums

Our Bureau

Mumbai: Life Insurance Corporation of India (LIC) reported a 20.1% year-on-year increase in standalone net profit to ₹12,076 crore for the September quarter, broadly in line with Bloomberg's estimate of ₹12,115 crore, as higher premium income supported growth. The insurer had reported a net profit of ₹10,053 crore in the year-earlier quarter. Net premium income rose 16.2% to ₹1.47 lakh crore, while net investment income increased to ₹1.15 lakh crore from ₹1.12 lakh crore.

For the first half of FY27, LIC's net profit rose 21.5% to ₹25,568 crore, while total premium income increased 11.64% to ₹2.74 lakh crore. Individual business annualised premium equivalent (APE) was almost flat at ₹17,224 crore in the first half, rising 0.31% year on year, while the number of individual policies sold declined 2.25% to 70.97 lakh. The share of non-participating products in individual APE moderated to 34.03% from 36.31% a year earlier.

The insurer's value of new business (VNB) grew 33.95% to ₹6,846 crore in H1 FY27, while its VNB margin expanded 470 basis points to 22.3%, reflecting higher margins across product categories and a shift in business mix.

LIC's Indian Embedded Value stood at ₹7.97 lakh crore at the end of September, down 1.95% from a year earlier. Management attributed the decline largely to mark-to-market losses arising from equity market fluctuations, given the insurer's sizeable participating business portfolio.

Share of non-participating products in individual APE slipped to 34.03% from 36.31% a year earlier

"The MTM losses because of the market are the ones which have contributed much to the reduction. Otherwise, on the business component, it is much better," said Ajay Kumar Srivastava, executive director and appointed actuary at LIC. The embedded value had, however, increased about 1% since March, he added.

The insurer submitted its feedback on the Insurance Regulatory and Development Authority of India's proposed commission regulations, consolidating suggestions received from its agent groups. Management said some product lines and premium-paying terms were within the proposed limits, while others would be affected.

IPO Big Bang Powers Demat Account Additions

OCTOBER STORY Nearly 3.36 million accounts added, the fourth monthly rise in past five months

Ravindra Sonavane

Mumbai: New demat account additions rose to a nine-month high in October, marking the fourth monthly increase in five months after a prolonged period of moderation between January 2025 and May 2026, as robust IPO activity drew more investors to the stock market.

NSDL and CDSL together added nearly 3.36 million demat accounts in October, the highest monthly addition since January 2026. The total number of demat accounts stood at around 244 million at the end of the month. The number of demat accounts does not represent unique investors, as individuals can hold multiple accounts. The number of unique investors is estimated at around 136.6 million as of September, according to NSE data.

Robust primary market activity was a key driver of the increase, with several large and smaller public issues attracting retail participation. October was the busiest month for IPO activity in 2026, with 13 issues raising a record ₹44,507 crore, including the Jio Platforms IPO – India's biggest ever. "Demat account openings typically rise when there is a surge in IPO activity, as investors open accounts to participate in public issues. The recent listing activity, including the large Jio Platform IPO and several smaller issues, has contributed to the increase," said Sunny Agrawal, head of fundamental equity research at SBICAPS Securities.

Growing interest in gold and silver exchange-traded funds (ETFs) has also encouraged retail investors to open demat accounts, Agrawal said.

Tech, Telecom Back in Favour with FPIs

Foreign investors buy a record ₹10,915 cr of IT stocks in October 2nd half

Our Bureau

Mumbai: For far too long, they seemed trapped in a dull, drab, and dreary existence. But they are roaring back to life in the run-up to Diwali, and filling the shopping carts of overseas funds. Technology stocks, the third biggest collectively by weighting on the Nifty, were relative stragglers through most of 2026, as foreign portfolio money was busy chasing the AI play elsewhere in Asia. Through the second half of October, however, IT and telecom have drawn disproportionate interest from FIIs, which continue to sell other pockets of the market.

Gold Retailers to Retain Credit Strength

Our Bureau

Kolkata: India's organised gold jewellery retailers are expected to maintain their credit strength despite elevated gold prices. Healthy cash accruals, prudent inventory management and measured expansion plans will cushion the impact of higher working capital requirements, according to a Crisil Ratings analysis.

An assessment of 76 organised retailers, accounting for nearly a third of industry revenue, indicates that credit profiles will remain resilient over the current financial year, even as high prices continue to constrain jewellery demand. Gold prices remain significantly above historical levels following a 56% surge in the last financial year, which led to an 8% decline in sales volume. The increase in import duty to 15% from 6% in May added to affordability pressures. However, a moderation in price appreciation and the subsequent decline offered some relief, with early third-quarter trends pointing to improving footfall and conversion rates.

Healthy cash flows and cautious expansion to protect retailers' credit strength despite high gold prices

Crisil Ratings expects jewellery sales volume to decline at a slower pace of 4-6% in this fiscal, while revenue is projected to increase 21-23%, supported by gold prices averaging 25-27% higher than in the last fiscal.

Organised retailers are also expected to gain market share as consumers increasingly favour established brands offering transparency, exchange programmes and gold savings schemes. Demand for lighter-weight and lower-carat jewellery is gaining traction as buyers seek to manage higher ticket sizes. "Demand indicators are pointing to stabilisation rather than a broad-based recovery. Consumers remain price-sensitive and are increasingly shifting towards lighter-weight and lower-carat jewellery to manage affordability," said Himank Sharma, director, Crisil Ratings. Investment demand for coins and bars is expected to contract 4-5% this fiscal, according to the agency.

Profitability is likely to moderate as inventory gains from last fiscal's sharp gold price rally taper off.

Higher promotional and customer engagement spending will add to the pressure. Operating margins are projected to decline 60-80 basis points to 8.5-8.7% in 2026-27 from 9.3% last fiscal. A basis point is a hundredth of a percentage point.

Elevated prices will also increase inventory valuations and borrowing requirements. However, retailers are expected to keep expansion plans measured, adding stores equivalent to 7-9% of their existing network over the next two fiscals, against 12-15% in the previous two years.

"While elevated gold prices will increase inventory funding requirements, the sector's credit fundamentals remain well supported by healthy cash accruals, prudent inventory management and measured growth strategies," said Nishita Vora, team leader, Crisil Ratings.

The total outside liabilities-to-adjusted net worth ratio is expected to improve to 1.1-1.2 times this fiscal from 1.3 times at the end of March, while interest coverage is projected at a comfortable 6.5-7 times.

Mehli Mistry Challenges Removal From Tata Trusts

Contests objections, says eligibility criteria should apply equally to Noel Tata

Our Bureau

Mumbai: Former Tata trustee Mehli Mistry has challenged his removal from the Bai Hirabai Jamsetji Tata Navsari Charitable Institution (BHJTNCI), telling the deputy charity commissioner, Greater Mumbai Region, that the decision was illegal and that the trustees who voted against his reappointment were themselves ineligible. In a series of rejoinders filed before the authority, Mistry has questioned the eligibility of Noel Tata and other trustees, challenged the validity of voting resolutions and accused the Sir Dorabji Tata Trust (SDTT) of attempting to prevent scrutiny of alleged governance lapses, including commissions and financial benefits received by trustees. The matter has been adjourned to December 3.

In a 24-page rejoinder filed under Section 22 of the Maharashtra Public Trusts Act, 1950, Mistry has contested the trust's objections to his citizenship and tax residency. He argued that neither the Will, Codicil nor Trust Deed prescribes citizenship or tax residency as a qualification for trusteeship.

While asserting that he is a Parsi Zoroastrian with a residence in Colaba, he argued that any such eligibility criteria must apply equally to Noel Tata, the current reporting trustee.

Mistry alleged that Tata is an Irish citizen, a UAE tax resident and a UAE Golden Visa holder. He has sought an affidavit from Tata detailing his citizenship and tax residency history, including whether he has held a Swiss passport.

Mistry alleged that Tata is an Irish citizen, a UAE tax resident and a UAE Golden Visa holder. He has sought an affidavit from Tata detailing his citizenship

He has also questioned whether Tata practises the Zoroastrian faith and sought affidavits from all trustees on their eligibility under the Trust Deed.

"If foreign citizenship and overseas residence are to be treated as relevant considerations, they must be examined in relation to the Reporting Trustee with equal rigour," the rejoinder states.

Mistry has separately challenged the recording of his cessation as a BHJTNCI trustee with effect from October 28, 2025, urging the authority to reject the change report as "illegal, non-est and contrary to the Trust Deed". His principal argument is that neither the 1913 Will nor the 1923 Trust Deed prescribes a fixed tenure for trustees. He contends that the trust's position that his three-year term had expired relies on a 2022 circular and appointment letter, neither of which can override the governing instruments.

Citing Clause 23 of the Deed, Mistry pointed out that vacancies arise on grounds including death, permanent residence outside the Bombay Presidency, insolvency, renunciation of faith and unfitness, but not on expiry of a fixed term.

He has also relied on the Codicil's direction that trustees "shall always be the Trustees". He argued that he is not a "tenure trustee" under Section 2(17A), introduced through the 2025 amendment, and that Section 30A(1) therefore does not apply to him. He has also cited the trust's annexures, which allegedly show different renewal periods for other trustees, including about two years for Vijay Singh and less than two years for Venu Srinivasan. "The Trust cannot use Section 30A(1) as a sword to oust the Objector on 28 October 2025 and, in the same breath, ignore that very provision when its own Vice Chairman acted in breach of it on that very day. A party cannot approbate and reprobate," the submission states.

Mistry has also relied on a resolution passed on October 17, 2024, at a joint meeting of SDTT and Sir Ratan Tata Trust trustees, shortly after Ratan Tata's death. He claimed the resolution provided for trustees to be reappointed on expiry of their terms without any limit on tenure and alleged that the trust deliberately omitted it from its reply.

US FDA Flags Data Integrity Lapses at Indian Drug Facilities

Inspections find cases where critical documents discarded or destroyed, says official

Vikas Dandekar and Rica Bhattacharyya

Mumbai: The US Food and Drug Administration (FDA) continues to find serious data-integrity violations at Indian pharmaceutical manufacturing facilities and clinical research organisations, making information they submit for regulatory assessment unacceptable, a senior agency official said.

Eight years after FDA issued guidelines on data integrity, its inspectors continue to find violations that require the affected studies or tests to be repeated for reliable data, Constance Richard-Math, the agency's deputy country director in India, told an industry gathering in Mumbai. FDA's routine or unannounced inspections have also uncovered cases in which truckloads of key documents relating to analytical testing, manufacturing procedures and storage were discarded, including records destroyed using paper shredders, Richard-Math said.

These violations, she warned, impedes building reliable and resilient supply chains.

FDA inspections continue to identify unacceptable and, in some cases, gross insanitary conditions in manufacturing facilities, she said, sharing pictures of dirty facilities.

Richard-Math urged drugmakers to look beyond their own facilities and scrutinise suppliers, vendors and other entities across the supply chain to ensure the safety of medicines.

"These may not be your facilities, but I would ask you to look beyond the walls of your own facilities: know your suppliers, know your vendors, know who is operating within your supply chain," she said. "If you identify facilities operating at this level, whether they are vendors, contractors or even companies operating in your community, do not look the other way." She was speaking at the 25th anniversary of the Pharmaceutical Analysts Convention of Indian Drug Manufacturers Association.

During FY2025, the US FDA issued 39 OAI (official action indicated), which may include warning letters. While 149 inspections required voluntary action, 53 drew no regulatory action from the agency.

To build a robust culture of compliance, Richard-Math advised companies to detect warning signs early and resolve issues before they cause product failures, recalls, or shortages.

Novelis Nears Commercial Production at $5-b US Plant

Nikita Periwal

Mumbai: Novelis plans to start producing cast ingots at its facility in Bay Minette, Alabama, during the current quarter, marking a key step in bringing the facility online. It is also targeting production of coils on the hot mill from the March quarter onwards.

The US-based subsidiary of India's Hindalco Industries is building a 600,000-tonne aluminium plant in the US for $5 billion, of which it had already spent $4.4 billion as of September-end.

The plant is currently being commissioned, and commercial shipments are expected to commence in the June quarter of the next fiscal year, Novelis said in its investor presentation on Thursday. It produced its first coil on the cold mill in September.

The plant is currently being commissioned; commercial shipments are expected to commence in June quarter of the next fiscal year

"We are excited about the opportunities ahead as Bay Minette moves closer to commercial production, increasing our ability to serve the undersupplied North American market," CEO Steve Fisher said.

The aluminium major's profit for the September quarter rose 29% year-on-year to $210 million, while net sales increased 25% to $5.9 billion. Adjusted earnings before interest, tax, depreciation and amortisation (Ebitda) rose 20% to $508 million.

The increase in the bottom line was due to insurance recoveries related to fires at its Oswego plant in 2025 and higher Ebitda, Novelis said in a statement.

Ebitda growth was driven mainly by $39 million in Oswego business interruption insurance recoveries and favourable metal benefits, including higher scrap consumption and lower aluminium scrap prices.

Adjusted free cash flow recorded an outflow of $1.8 billion in April-September, compared with an outflow of $499 million a year earlier. This was primarily due to lower operating cash flow and capital expenditure related to facilities in the US.

Mahindra Lifespace Buys 100 Acres Land Parcel in MMR

Our Bureau

Mumbai: Mahindra Lifespace Developers has acquired 100 acres along the Karjat-Murbad road in the Mumbai Metropolitan Region (MMR) for a plotted development project, marking its entry into the segment in the region. The real estate and infrastructure development arm of the Mahindra Group is likely to start the project around the middle of the next financial year. It is also looking to acquire additional land in the area, said people familiar with the development.

The land acquisition is part of the company's efforts to expand its residential development pipeline across key markets. The company has been pursuing projects through outright land acquisitions, joint development agreements and partnerships with landowners.

Land acquisition part of company's efforts to expand residential development pipeline across key markets

"In line with our strategy, we look to expand into plotted development in future in MMR, Pune and Bengaluru," said Vimalendra Singh, chief business officer, residential at Mahindra Lifespace. He said homebuyers are increasingly seeking greater flexibility and personalisation of their residential needs. "Plotted developments offer a compelling proposition through land ownership, customisation, and long-term appreciation potential," he said.

The proposed development will be the company's first plotted project outside Mahindra World City in Chennai.

In Chennai, Mahindra Lifespace established a presence in the segment through two projects.

The Mumbai-region project marks the company's entry into a segment that has attracted interest from homebuyers seeking land ownership and the option of building independent homes.

Plotted developments have emerged as an alternative to conventional residential projects, with homebuyers showing interest in owning land and having the flexibility to build homes per their requirements.

SIR पर भी वोटर लिस्ट के नियम मान्य होंगे : HC

■ पीटीआई, पणजी

गोवा के एक परिवार के छह सदस्यों के नाम मतदाता सूची में शामिल करने का निर्देश।

बॉम्बे हाई कोर्ट की गोवा बेंच ने कहा है कि SIR के दौरान भी जनप्रतिनिधित्व कानून, 1950 और मतदाता पंजीकरण नियम, 1960 के प्रावधान लागू रहेंगे। कोर्ट ने चुनाव अधिकारियों को गोवा के एक परिवार के छह सदस्यों के नाम मतदाता सूची में शामिल करने का निर्देश दिया। बेंच ने सांताक्रूज विधानसभा क्षेत्र के निर्वाचन पंजीकरण अधिकारी को निर्देश दिया कि वह 10 दिनों के भीतर परिवार के निवास की पुष्टि कर छह सदस्यों के नाम मतदाता सूची में शामिल करें।

याचिकाकर्ता परेश सालगांवकर और उनके परिवार के सदस्य 1995 से इसी विधानसभा क्षेत्र में वोट कर रहे थे। उन्होंने घर बदलने के बाद मतदाता सूची के भाग 29 से भाग 25 में नाम स्थानांतरित कराने के लिए 12 नवंबर 2025 को फॉर्म-8 भरा था। अधिकारियों ने पुराने पते से उनके नाम हटा दिए, लेकिन नए पते वाली सूची में शामिल नहीं किया। उनकी अपील भी खारिज कर दी गई थी। कोर्ट ने कहा कि किसी मतदाता का नाम हटाने से पहले उसे सुनवाई का अवसर देना जरूरी है।

टिप्पणियाँ–

1) 30 सितंबर, 2026 को समाप्त तिमाही और छमाही के समेकित और स्टैंडअलोन वित्तीय परिणामों की समीक्षा लेखापरीक्षा समिति द्वारा की गई है और निदेशक मंडल द्वारा 05 नवम्बर 2026 को आयोजित बैठक में इन्हें अनुमोदित किया गया है।

2) उपरोक्त, 30 सितंबर, 2026 को समाप्त तिमाही और छमाही के लिए कंपनी के वित्तीय परिणामों के विस्तृत प्रारूप का एक अंश है, जिसे भारतीय प्रतिभूति और विनिमय बोर्ड (लिस्टिंग दायित्व और प्रकटीकरण आवश्यकताएं) विनियम, 2015 के विनियम 33 और 52 के अनुसार स्टॉक एक्सचेंजों के साथ दाखिल किया गया है। इन दोनों परिणामों (स्टैंडअलोन और समेकित) का पूर्ण प्रारूप स्टॉक एक्सचेंज वेबसाइटों, अर्थात् एनएसई वेबसाइट (www.nseindia.com), बीएसई वेबसाइट (www.bseindia.com) और कंपनी की वेबसाइट (www.unominda.com) पर उपलब्ध है।

3) सूचीयन विनियमों के विनियम 52(4) में उल्लिखित असाधारण और अन्य मदों के लिए, स्टॉक एक्सचेंजों (एनएसई और बीएसई) को प्रासंगिक खुलासे किए गए हैं और इन्हें एनएसई वेबसाइट (www.nseindia.com), बीएसई वेबसाइट (www.bseindia.com) और कंपनी की वेबसाइट (www.unominda.com) पर देखा जा सकता है।
