MindTree Unveils *SecureMind* Surveillance Manager on Iomega® StorCenter™ Network Storage Device

MindTree provides SMBs, distributed enterprises and remote offices with an integrated surveillance and storage solution that can be configured and monitored from anywhere in the world

Bangalore, INDIA, September 21, 2011: MindTree Limited, a global IT and Product Engineering Services Company, today announced the availability of its SecureMind Surveillance Manager application on Iomega® StorCenter™ network storage devices. The integrated offerings, which will be on display this week at ASIS 2011 in Orlando, FL, cost- effectively provides users with advanced IP network-based video surveillance and storage solutions that are easy to install, manage and monitor.

The SecureMind Surveillance Manager enables users to connect and configure USB and fixed/PTZ IP cameras from multiple vendors to the Iomega StorCenter, and monitor video remotely from anywhere in the world through a simple Web interface running on a PC or an Android-based tablet. Through seamless integration with the Iomega® StorCenter™ devices, the SecureMind Surveillance manager simplifies installation by reducing servers needed for video storage/analytics and, hence, reduces the overall infrastructure management overhead, making it ideal for small-to-medium businesses (SMB), distributed enterprises and remote offices.

"The transition from analog to IP holds great promise for the surveillance market, yet it can also create a number of challenges for SMBs where there are often limited resources to invest," said Vinod P. Deshmukh, President, Technology & Products, Product Engineering Services, MindTree Limited. "By leveraging our expertise in ready-to-brand video surveillance solutions with Iomega's innovative network storage products, the SecureMind Surveillance Manager solution brings enterprise-class surveillance capabilities to this segment for video capture, storage and monitoring in an easy-to-use and cost-effective platform that can be tailored to specific customer requirements."

The ONVIF 2.0 ready SecureMind Surveillance Manager enables users to search recorded videos based

MINDTREE LIMITED

on multiple parameters and playback videos of interest in a timeline view. Using advanced video analytics, the solution also offers an 'Alert-Me' feature, which provides instant e-mail notification of user-specified events such as motion detection or video loss. SecureMind Surveillance Manager supports megapixel camera recording and activity-based recording, and is available for camera counts ranging from 4 to 32.

MindTree's SecureMind Surveillance Manager for Iomega® StorCenter™ network storage devices will be on display at ASIS 2011, in the Orange County Convention Center, Booth #2285, in Orlando, Florida from September 19 to September 21, 2011.
