Moneyboxx Finance crosses INR 10 crore in Renewable Energy (Solar) Loan disbursement; Targets 10% of AUM from Solar Loans in FY27

New Delhi, 30 July 2026: Moneyboxx Finance Limited, a leading non-banking financial company (NBFC) focused on empowering small and micro-entrepreneurs, today announced that it has crossed INR 10 crore towards Renewable Energy (Solar) Loans disbursements, marking an important milestone in its journey to accelerate India's clean energy transition while promoting inclusive economic growth.

The milestone reflects Moneyboxx's commitment to making clean energy affordable and accessible for underserved MSMEs and rural entrepreneurs. By financing solar energy solutions, the company is enabling customers to reduce energy costs, improve business productivity, enhance energy security, and lower carbon emissions—creating long-term economic and environmental value.

The achievement has been realized through a strategic partnership with a leading solar OEM, enabling seamless access to high-quality solar solutions for customers. The initiative is further strengthened by a partnership with a leading global climate foundation helping de-risk green lending and unlock greater capital for climate-positive investments.

Building on this momentum, Moneyboxx aims to scale its green finance portfolio significantly, with a target of **10% of its Assets Under Management (AUM) comprising Renewable Energy Loans by the end of FY27**. This ambition reinforces the company's vision of becoming a leading financier of distributed renewable energy for India's MSMEs and rural economy while supporting the country's renewable energy and net-zero aspirations.

As India accelerates the adoption of decentralized clean energy, Moneyboxx remains committed to expanding access to affordable climate finance that delivers measurable environmental impact alongside sustainable livelihoods, positioning the company at the forefront of inclusive green financing.
