Kerala Blasters FC Partners with MosChip as Official Technology Partner

Kerala Blasters FC are pleased to announce a partnership with MosChip Technologies as the Club's Official Technology Partner for the 2025-26 season. The collaboration will support the Club's growing focus on integrating technology into athlete performance and wellbeing.

MosChip Technologies is a global silicon and product engineering services company with over two decades of expertise across chip design, hardware engineering, embedded software, and digital solutions.

As a part of the association, MosChip will support Kerala Blasters FC's technology-driven initiatives and help strengthen the Club's digital and innovation-led ecosystem.

The partnership will see Kerala Blasters FC and MosChip co-develop an athlete performance application that turns wearable data into context-aware, personalized insights on player health, readiness, and recovery at both team and individual levels - built on [MosChip's AgenticSky WearableCore](#) accelerator, with role-based access for coaches and players.

Kerala Blasters FC CEO, Abhik Chatterjee, said:

"MosChip has built a strong reputation over the last two decades through consistent innovation, expertise and excellence in their space. We are pleased to have them on board as our Official Technology Partner. This association will also see us work together on an Agentic AI application that converts wearable data into meaningful health and performance insights for our coaching staff and players. We look forward to this partnership and what we can build together."

MosChip Senior Vice President – Product Engineering BU, Vishal Patil, said:

"We are delighted to partner with Kerala Blasters FC as their Official Technology Partner. MosChip will bring its integrated engineering capabilities - from hardware to embedded software to cloud and AI - to help the Club build a modern performance intelligence platform that turns athlete data into faster, better decisions on health, readiness, and recovery."

The partnership will be activated through collaborative initiatives across the season, with a focus on delivering meaningful performance insights and enhanced support for the squad.

SAFE HARBOR: This release comprises certain forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those mentioned in such forward-looking statements.

The risks and uncertainties include but are not limited to, those risks and uncertainties, viz, our ability to compete in a highly competitive semiconductor industry, ability to define, develop, and sell new products, dependency on subcontractors for the supply and quality of raw material, dependency on markets considering the cyclical nature of the industry and our ability to attract and retain technical manpower. MosChip may from time to time make additional forward-looking statements in any manner and does not undertake to update any of these forward-looking statements that may be made from time to time by or on behalf of the company.
