24. Overview of the entity's material responsible business conduct issues.

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along with its financial implications, as per the following format:

Mphasis conducted its first comprehensive materiality assessment in FY 2020-21 to identify our ESG related material topics. The main goal of the identification of material issues is to understand ESG parameters that could have a potential impact on our business as well as our stakeholders. This outcome guides our company in further improving our stakeholder agenda, disclosures, and informs our ESG strategy development.

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	The rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1	Diversity at workplace	Opportunity	- A diverse workplace is an inclusive environment that provides equal rights and opportunities for all employees and helps in building an equitable society. - A greater diversity across genders and ethnicity is strongly correlated to a greater level of inclusiveness (broadening mindset on acceptance of the third gender, unconventional biases in ethnicity, race and	Not a risk	Positive: A pool of diverse workforce of different genders, ages and ethnicities, nationalities, socio-economic backgrounds, religious beliefs, cultural practices, and sexual orientation will enable Mphasis to develop its services further

			equality while transforming our thoughts and actions at a personal and professional level), improved propositions and productivity enabling value creation. At Mphasis, our true north is to build an inclusive and diverse workplace using 3 tenets- Invest, Inspire and Involve to attract, develop, and retain the best talent in an environment that fosters high performance.		and mitigate operational risks. Diversity in the workforce brings new perspectives, experiences and ideas which enables innovation, increases performance and enables a positive culture in the organization.
2	Digitization	Opportunity	- It is imperative to implement digital technologies to go green, remain efficient, boost productivity, be competitive in the market, and raise profit margins. - Digitization of Company operations contributes to increased efficiency and productivity, reduction in paper consumption, lower operational costs, increased transparency, and faster decision making. This in turn enhances customer experience and increases employee morale. - At Mphasis, digitization has improved our approach to employee skill development (TalentNext) and Infragraph solution and service transformation (Intelligent automation framework and software). - Additionally, Mphasis has expanded its digital offerings to address the evolving customer needs and expectations to accelerate end-to-end digitization and provide them with modern applications and infrastructure to improve cybersecurity, significantly accelerate automation and reduce overall costs	Not a risk	Positive: Digitization can lead to improved sales, productivity and employment which impact the company's performance and impact compared to its peers
3	Cyber /IT System Security and Resilience	Risk	- The IT services sector is a highly targeted sector year after year. - Improper data and systems management can have a major reputational impact on companies such as Mphasis, as employees and other stakeholders lose trust in the Company's ability to safeguard sensitive	Risk mitigation approach: 1. Data Privacy Officer (DPO) addresses queries with regards to the Data Subject Access Requests (DSAR), stakeholder grievances and	Negative: Mphasis has access to sensitive data, such as personal information of stakeholders, customer data etc. Poor data security management could thus result in legal and reputational risks for Mphasis.

			information. Additionally, data breaches can have significant financial impacts. IBM's Cost of a Data Breach report (2021) estimates that the average total cost of a data breach increased by 10%, from 3.86 to USD 4.24 Million, the highest average total cost in the 17-year history of this report.	breaches regarding personal data. - Independent audits are conducted periodically by internal and external bodies to validate the effectiveness of data privacy controls deployed. - Annual training is made available to all the employees to raise awareness on safeguarding their information and company-wide practices.	
4	Customer centricity/satisfaction	Risk and Opportunity	- The transparency, accuracy, and comprehensibility of marketing statements, /service descriptions, service terms and processes play an important role in the relationship between customers and companies. - Customers should have access to accurate and adequate information to make an informed purchasing decision. In the case of Mphasis, this is linked to the disclosure of reliable information regarding the services.	Risk mitigation approach: The company has put in place proactive measuring mechanisms to gauge the levels of customer satisfaction and obtain feedback from various perspectives, including, the satisfaction of the customer with the present work, growth of the account, and innovative and cost-effective solutions offered by the Company. The CSAT surveys are conducted and closely monitored by the Company Board.	Positive: Customer satisfaction and loyalty have a significant positive influence on the Company's profitability. Improved customer satisfaction can also lead to better business opportunities and growth. Negative: Consumers can lose trust in Mphasis's reliability to provide proposed quality services, which can lead to loss of business opportunities.
5	Talent attraction and retention	Risk and opportunity	- The attrition rate of the IT/tech sector is 14.6%, which is higher than the country's average of 13.1% (Salman P, 2021). A higher attrition rate can lead to a higher cost incurred from the onboarding and recruitment of replacement talent. Training the replacement hires to the same level of productivity as the employees who left requires additional resource investment. The retention report by the Work Institute (2017) finds that the cost of turnover can be as high as 33% of an employee's annual salary. - On the contrary, investing in people development can enable organizations to realize the skills and abilities of their	Risk mitigation approach: - Mphasis categorizes employees into Critical Risk, High Risk, and Low-Risk profiles. The Company has well-established mitigation plans like role/project change, and onsite assignments, in case of a change of assigned staff. - Promotions encourage the retention of a capable workforce. - Mphasis has developed a remuneration policy with the main objective to attract and retain excellent talent.	Positive: A lower attrition rate will lead to reduced costs incurred from hiring and training new recruits. Negative: Mphasis relies heavily on human capital for the development of its products and services that require software developers and continuous research and development. Therefore, Mphasis's ability to attract and retain talent and train them has a direct impact on the quality of Mphasis's services.

			workforce, and internal capabilities to further expand the business and create value. Mphasis has a platform that has grown to become the bedrock of our talent development initiatives. Over the years, Talent Next has matured into a cognitive automation tool with a 'learning recommendation engine' and resources for over 750 skills and hosts over 12,000 courses.		
6	Energy and emissions management	Risk and Opportunity	- Digital infrastructure such as data centres consume significant resources - including water and energy - and are large emitters of carbon emissions. It is estimated that by 2040, data centres would emit ~ 6.3% of global GHG emissions compared to the 2016 level (Belkhir and Elmegli, 2017). - This could make ICT companies face operational and reputational issues in the coming years. - Other risks (such as exposure to physical risks of climate change), could also have significant operational impacts on data centres. We ensure managing our customer's IT Infrastructure seamlessly with unmatched efficiency. Our offerings help our customers in optimizing production, create decarbonized ecosystems, and increase the throughput of existing assets.	Risk mitigation approach: - Mphasis is investing increasing its renewable energy portfolio by investing in green technologies, such as its solar plants(10KW) at its Mangaluru facility. - Rallying stakeholders towards a low-emission, climate-resilient future - Mphasis has accelerated its efforts to phase out ozone-depleting pollutants [NO6]. - The company has also invested in energy-saving interventions such as replacing its current equipment such as UPS and air conditioning units with those with higher energy efficiency.	Positive: Identifying, designing, building and implementing newer business models to achieve decarbonized energy systems for our customers which also improve efficiency and productivity, leading to better customer satisfaction and business outcomes. Negative: Mphasis's impact is mainly in the form of data storage centres, E-waste, and electricity used in its offices, and direct and indirect GHG emissions (scope 1, 2, and 3) from its activities.

- (ii) MSMED status
- (iii) Yearly revenue
- (iv) Quality certification
- (v) POSH policies
- (vi) ISO certification
- (vii) Policy on anti-slavery and human trafficking
- (viii) Environmental management
- (ix) Policy on the prohibition of child labour

While empanelment of our suppliers, we ensure that all the above-mentioned factors are thoroughly checked. This is done through a supplier registration form which the vendor must complete.

b. If yes, what percentage of inputs were sourced sustainably?

100% of our suppliers undergo the sustainable procurement procedure of Mphasis.

3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.

Waste type	Waste management procedure in place
Plastic (including packaging)	Plastic waste is sent to ITC for recycling. Mphasis has a "Say no to plastic program" which helps to divert waste and reduce our effects on the local community and, as a result, the climate. It will necessitate a few minor adjustments to everyday routines, both at home and at work. Our leadership team, the administration SPOC's and the CEO took the challenge to ban single-use plastic at all offices with each one of our employees to support in becoming the poster child for a plastic-free organization. All Mphasis facilities have also resorted to using 100% biodegradable plastic garbage bags to collect and dispose of wet waste, diverting thousands of disposable plastic waste in the process.
E-waste	Disposed of as per E-waste Management Rules, 2016
Hazardous waste	Disposed of as per Batteries (Management and Handling) Amendment Rules, 2010
Other waste (wastepaper and paper products)	Sent to ITC Paper Mills for recycling

Mphasis has implemented a visitor management tool to reduce the consumption of paper and waste generation resulting from security visitor management. The Company's transport tool ETMS has been integrated with the mobile app for reducing the paper consumption which is being used to maintain and monitor trip details.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes/No). If yes, whether the waste collection plan is in line with the EPR plan submitted to Pollution Control Boards?

Yes, EPR applies to the Company's activities. As a bulk consumer of electronic equipment, the company disposes and manages the E-waste generated from operations in alignment with the E-waste Management Rules, 2016.

Yes, Mphasis has a mechanism available to receive and redress grievances for all the categories of employees and workers. The mechanism is explained below:

Individuals who believe they have been the victims of conduct prohibited by this Policy or believe they have witnessed such conduct should discuss their concerns with their immediate supervisor, HRBP, or write to the I&D office at inclusion.diversity@mphasis.com

Any employee who feels or believes that he or she has been subjected to or witnessed sexual harassment in the company and/or extend workplace (*such term being as defined in the POSH policy of the Company*) has an obligation and duty to report the same to posh@mphasis.com. Any reported allegations of harassment, discrimination or retaliation are dealt with in accordance with the provisions of law and are investigated promptly. The investigation may include individual interviews with the parties involved and, where necessary, with individuals who may have observed the alleged conduct or may have other relevant knowledge.

The company maintains confidentiality throughout the process to the extent consistent with adequate investigation and appropriate corrective action. Retaliation against an individual for reporting harassment or discrimination or for participating in an investigation of a claim of harassment or discrimination is a serious violation of this Policy and, like harassment or discrimination itself, will be subject to disciplinary action. Acts of retaliation should be reported immediately and will be promptly investigated and addressed. In case of non-compliance by employees, it can lead to termination of services/penalties extend to monetary fines/ imprisonment (where permitted by law). False and malicious complaints of harassment, discrimination, or retaliation (as opposed to complaints that, even if erroneous, are made in good faith) may be the subject of appropriate disciplinary action. For additional details on sexual harassment please refer to POSH policy (Unified access >>Policy Documents >>HR Corner >>Corporate Policies >> POSH).

Principle 4: Businesses should respect the interests of and be responsive to all its stakeholders

Essential Indicators

1. Describe the processes for identifying key stakeholder groups of the entity.

Priority stakeholder groups are identified by understanding their relative importance and their ability to provide value to our business. The stakeholder identification and prioritization process has been conducted during the materiality assessment in FY 2020-2021. By considering the parameters and stakeholder attributes defined by global standards such as GRI Sustainability Reporting Guidelines and National Guideline for Responsible Business Conduct (NGBRC) we have mapped our stakeholders. To finalize the list of key stakeholders, we looked into the parameters such as stakeholder impact, diversity, influence, urgency and legitimacy.

In keeping with the above criteria, we have identified six key stakeholder groups customers, shareholders and investors, government institutions and regulators, business partners and vendors, employees and communities.

2. List stakeholder groups identified as key for your entity and the frequency of engagement with each stakeholder group.

Yes, Mphasis has a well-defined BCMS Framework that is in alignment with ISO 22301:2019 standard and is on par with other industry best practices. The BCMS framework covers service delivery functions as well as supporting functions across all Mphasis facilities in India and other countries. Mphasis delivery centres in India are certified to ISO 22301:2019 standard (including its subsidiaries).

Mphasis Business Continuity Management System (BCMS) is a fit-for-purpose, business-owned and driven activity that unifies a broad spectrum of business and management disciplines, including crisis management, risk management and technology recovery. BCM is directly linked to corporate governance and establishes a strategic and operational framework to implement, proactively.

Mphasis approach to assure continuity of client services follows a two-pronged approach:

- (i) Site-level Incident Management Plan (IMP): The IMP documented each of the delivery centres/facilities describing the most suitable responses to various disruptive events (E.g., natural calamities, manmade threats, geopolitical issues and technology disruptions). The primary objective of the IM Plan is the safety of human life and assets.
- (ii) Business Continuity Plan (BCP): A separate, independent, and customized BC Plan is documented for each of the client services delivered from Mphasis delivery centres and support functions. Once the safety of staff, and visitors is ensured, the account-specific BC Plan is executed by respective BCMS coordinators.
