बारिश पर रिजर्व डे में होगा मैच

भारत-पाकिस्तान के बीच रविवार को होने वाल इस महामुकाबले के लिए एशियन क्रिकेट काउंसिल ने रिजर्व डे रखने की घोषणा की है। अगर यह मुकाबला बारिश के कारण प्रभावित होता है तो फिर बाकि मैच में को 1 सिविल को करया जाएगा। कैदी में जब वह दोनों टीमें ग्रुप स्टेज में मिट्टी भी तो उस वक्त रिजर्व डे नहीं था, जिस कारण मैच को रद्द कर दिया गया था।

हैदराबाद। हैदराबाद क्रिकेट एसोसिएशन की ओर से एक बार फिर वर्ल्ड कप शेड्यूल बदलने की मांग उठी है। एवसीए चाहता है कि 29 सितंबर को हैदराबाद में पाकिस्तान और न्यूजीलैंड के अभ्यास की तारीख बदल दी जाए। एवसीए ने बीसीसीआई को इमेल लिखकर जानकारी दी है कि 28 सितंबर को गणेश विसर्जन और मिलान-उन-नाबी त्योहार है। पुलिस के लिए इस दौरान मैच के लिए सुरक्षा मुद्देया समीर मुश्किल काम है। डूरी वजह से एवसीए शेड्यूल में बदलाव चाहता है। ऐसा पहली बार नहीं हो रहा है। इससे पहले भी एवसीए ने शेड्यूल में बदलाव की मांग उठाई थी। इससे पहले भी एवसीए ने सुरक्षा कारणों की वजह से ही रणनावर दो दिक्रण का रण की मेजबानी करने में भी अयमयवता जाहिर की थी।

Market insight company Sensor Tower lays off senior executives

San Francisco, Sep 9 (IANS) Market intelligence firm Sensor Tower has laid off nearly 40 people, including top-level executives, out of its more than 270-strong workforce, the media reported.

The job cuts impacted C-suite executives, including the chief marketing officer (CMO), chief financial officer (CFO) and chief product officer, reports TechCrunch.

Other teams impacted include finance and nearly all of marketing, the report said.

Sensor Tower confirmed the layoffs but did not divulge further details line number of employees impacted.

Sensor Towers management team took necessary steps to reorganise and right-size our business under a talented and experienced senior leadership team, a company spokesperson was quoted as saying.

We are excited about these changes as we position the company for a balance of continued growth and best-in-class profitability. We will provide more details in the coming days, the spokesperson added.

Sensor Tower hired more people headcount over the years following a \$45 million investment from Riverwood Capital in 2020. The company had then

claimed it chose to raise more funds to further grow its business with investments in hiring, marketing and infrastructure, the report mentioned.

Sensor Tower is uses by some of the top top brands, firms and marketers and its data is regularly cited by top publications.

The company cultivates rich market insights into the trends shaping businesses in the global digital economy. Our data scientists and algorithms process trillions of aggregated data points that people contribute to us from millions of devices, making up our one-of-a-kind data estate, it says on its website.

Surge in yields makes owning US stocks over bonds the most unattractive in decades

New York, Sep 9 (IANS) The allure of owning US stocks over less risky investments is at its lowest level in decades, according to one measure, despite the equity market's race upward this year, the media reported. The benchmark S&P 500 index has gained 16 per cent this year, pushed higher by Wall Street's obsession with artificial intelligence that has propelled mega-cap technology stocks to dizzying heights, CNN reported. At the same time, hot economic data has helped push Treasury yields higher in recent

months. Bonds have become coveted additions to investors portfolios thanks to the Federal Reserve's historic pace of interest rate hikes it began last March to tame runaway inflation. A spike in yields can put pressure on stocks, since it increases the amount companies spend to cover the interest on their debt, in turn hurting their profit. The recent surge in bond yields has also pushed down the anticipated advantage of owning equities over less risky investments - known as the equity risk premium - to a two-decade low, CNN reported. Treasury bonds are generally seen as safer investments than stocks,

since they're issued by the US government, which has never defaulted on its debt. Treasuries also provide a steady source of income for investors. Investors are rarely getting adequate compensation in the equity market, said Seema Shah, chief global strategist at Principal Asset Management, CNN reported. Stocks cooled off somewhat in August, a historically tough month for markets since there's a lack of economic data to spur a rally and people tend to go on vacations before summers end, leading to lower trading volumes and more volatility.

Ashneer takes Porsche Cayman out to show well-lit Delhi for G20 Summit

New Delhi, Sep 9 (IANS) As Delhi-NCR welcomes guests for the two-day G20 Summit which started on Saturday, entrepreneur Ashneer Grover took his luxurious Porsche Cayman out on Delhi roads to show how the Capital is all prepared to host the high-profile event. The BharatPe co-founder and former managing director took to Instagram to show a glimpse of the Capital, from his lavish, green-coloured sports car. G20 - Late evening Porsche drives in Delhi! Kuchh time guzariye roads par (spend some time on roads). Delhi is at its prettiest! he posted. The video he posted showed beautifully-lit hotels, fountains and landmarks of the central Delhi area. He also took to X to show empty Delhi roads amid high traffic security for the high-profile global summit. Most effective to implement a 'chhutti on Friday for Delhiites. Love driving in Delhi during G20. Delhi in its Utopian state, he posted. One of the better-known facts about the former Shark Tank India judge is that he is a car aficionado and frequently uploads images of his impressive car collection, which includes a Porsche Cayman and a Mercedes Maybach S650 - both of which are worth several crores.

Trend reversal in FPI investment from buying in last 3 months to selling in Sep

New Delhi, Sep 9 (IANS) Net FPI investment in September has turned negative and as per NSDL data, FPIs through September 8 have sold equity for Rs 4,402 crore and if we exclude the bulk deals and investment through the primary market, the sell figure in the cash segment rises to Rs 8,832 crore, says V.K. Vijayakumar, Chief Investment Strategist at Geojit Financial Services.

This trend reversal in FPI investment from buying in the last three months to selling in September is mainly due to the rising US bond yields and the uptrend in the dollar index, he said.

FPIs can be expected to turn buyers when the dollar index and US bond yields decline, which, in turn, will depend on the incoming US inflation and growth data.

A significant trend in FPI investment is their consistent buying in capital goods and power. This explains the smart uptrend in power stocks and capital goods stocks like L&T, he said.

FPI selling in financials is keeping the prices of the banking bluechips low.

This is an opportunity for retail investors since this segment is doing well and the stocks are fairly-valued, he added.

Compiling list of individuals whose actions are detrimental to insurance sector: GIEAIA to PM

Chennai, Sep 9 (IANS) In a letter to Prime Minister Narendra Modi, the General Insurance Employees All India Association (GIEAIA), a major union in the public sector non-life insurance companies, said it is compiling a list of individuals whose actions are detrimental to the integrity of the country's insurance sector and also affecting the public sector insurers. We are diligently compiling a list of individuals whose actions may be detrimental to the integrity and fairness of our insurance sector. We firmly believe that decisive action in this matter will help restore the integrity and fairness of our insurance sector, as these practices are adversely affecting the interests of public sector general insurance companies, the Union said in the letter. The GIEAIA also said the issuance of 'No Objection Certificates on a routine basis to the retiring senior officials of the government-owned insurers to join the private sector. It urged Modi to apply the two-year cooling-off period for retiring/resigning employees of Department of Financial Services (DFS) and associated financial subsidiaries/statutory bodies before they can take any other employment.

Musk's X challenges new US transparency law, terms it 'unconstitutional'

San Francisco, Sep 9 (IANS) Elon Musk-run X (formerly Twitter) has filed a lawsuit, alleging that a new California law requiring social media platforms to declare certain moderation practices, alleging it is 'unconstitutional and a clear violation of the company's right to free speech. The law, called AB 587, requires social media companies to publicly detail moderation practices around hate speech, racism, extremism, disinformation, harassment and foreign political interference, reports TechCrunch. In the lawsuit, X said through AB 587, the State is compelling social media companies to take public positions on controversial and politically-charged issues. Because X Corp. must take such positions on these topics as they are formulated by the State, X Corp. is being forced to adopt the States politically-charged terms, which is a form of compelled speech in and of itself, the lawsuit alleged.

Apple set to end 2023 with 7% market share for iPhones in Android-dominated India

New Delhi, Sep 9 (IANS) Driven by domestic manufacturing, Apple iPhones are set to garner 7 per cent market share in the Android-dominated smartphone market in India this year, latest data showed on Saturday, as the tech giant gears up to globally launch its

flagship devices next week. Apple iPhone shipments grew 68 per cent (year-on-year) in the first half of this year in the country. In the first half, Apple secured a 6 per cent market share in the Indian smartphone market and dominated the super-premium

smartphone segment (priced between Rs 50,000-Rs 100,000) with a robust 63 per cent market share, according to data from market intelligence firm CyberMedia Research (CMR).

CMR estimates the iPhone 15 shipments in the launch quarter to hover

around 65 per cent, driven by an increased 'Make in India' initiatives.

iPhone domestic manufacturing in the country has significantly increased over the past four years.

In another push to its India manufacturing dream, Apple maker Foxconn started the local production of the next-generation of iPhone 15 at its Sriperumbudur facility near Tamil Nadu faster than ever.

A small set of 'Make in India' iPhone 15 units is likely to be exported to other countries within a short span of time from its global launch.

Other Apple suppliers in India like Pegatron and Wistron (being acquired by the Tata Group) will also assemble iPhone 15 as soon as possible, according to sources.

CMR anticipates a 25 per cent YoY growth in iPhone shipments with the iPhone 15 series. iPhone 14 series shipments in launch quarter were around 58 per cent and iPhone 13 series were around 23 per cent in the country. Apple has enjoyed a positive growth trajectory in India in recent years, with sales of its older generation iPhones steering growth. The upcoming iPhone 15 series is poised to maintain this growth

momentum, Prabhu Ram, Head-Industry Intelligence Group, CMR, told IANS. However, its success will hinge on Apple's ability to effectively manage any potential production challenges and shipment delays with the 15 line-up, and especially the 'Pro' models, he added. The market momentum for iPhones in India have been driven by the sales of the previous generation iPhones. Apple is hosting its next big global product launch - showcasing the fresh lineup of iPhone 15 series - on September 12. The tech giant is also expected to announce new Apple Watches at the event.

Scientist engineered bacteria to generate electricity from wastewater

London, Sep 9 (IANS) Scientists have engineered E. coli bacteria - the most widely studied microbe - to generate electricity from wastewater.

This groundbreaking achievement in bioelectronics outlines a novel approach that could revolutionise both waste management and energy production.

Though there are exotic microbes that naturally produce electricity, they can only do so in the presence

of specific chemicals. E. coli can grow on a wide range of sources, which allowed us to produce electricity in a wide range of environments, including from waste water," said Ardemis Boghossian, Professor at EPFL, a public research university in Lausanne, Switzerland. E. coli bacteria have been harnessed to create electricity through a process known as extracellular electron transfer (EET). The researchers engineered E.

coli bacteria to exhibit enhanced EET, making them highly efficient "electric microbes." Unlike previous methods that required specific chemicals for electricity generation, the bioengineered E. coli can produce electricity while
