Reliance Commissions 1150 KTA PTA Plant

Mumbai, April 10, 2015: Reliance Industries Limited (RIL) is pleased to announce successful commissioning of new Purified Terephthalic Acid (PTA) plant at Dahej, Gujarat. The plant with a capacity of 1150 KTA is built with Invista technology. This state-of-the-art facility is highly energy efficient and environment friendly.

With the commissioning of this plant, Reliance's total PTA capacity will increase to 3.2 MMTPA and global capacity share to 4%.

Paraxylene, the key feedstock for the PTA plant is sourced from Reliance's Jamnagar refinery. The PTA plant is also forward integrated with a 650 KTA PET plant in the same complex. The integrated operation will help in lower operating cost and capture full chain margins. Another PTA plant of similar capacity is under construction at the same location. With these capacities, Reliance will be placed among the top five PTA manufacturers globally.

India is the second largest producer of polyester with estimated production of 5.4 MMTPA. The Indian polyester market is growing at 8-10% annually. Indian market is currently deficit in PTA by over 1.5 MMTPA. The start-up of the new PTA plant at Dahej will take India closer to self-sufficiency in PTA, in line with the vision of "Make in India" of the Hon'ble Prime Minister Shri Narendra Modi.

About RIL

Reliance Industries Limited (RIL) is India's largest private sector company, with a consolidated turnover of ₹ 4,46,339 crore (US$ 74.5 billion), cash profit of ₹ 33,980 crore (US$ 5.7 billion) and net profit of ₹ 22,493 crore (US$ 3.8 billion) for the year ended March 31, 2014.

Reliance Commissions 650 KTA PET Resin Plant

Mumbai, April 10, 2015: Reliance Industries Limited (RIL) is pleased to announce successful commissioning of PET resin (Polyethylene Terephthalate) capacity at Dahej, Gujarat. The plant consists of two lines with a combined manufacturing capacity of 650 KTA. The plant has been built with Invista Technology for Continuous Polymerization and Buhler AG Technology for Solid State Polymerization.

This is one of the largest bottle-grade PET resin capacity at a single location globally. This consolidates Reliance's position as a leading PET resin producer with a global capacity of 1.15 MMTPA. Current global effective PET resin capacity is estimated at 30 MMTPA. PET resin from the new capacity would find application in packaging for water, carbonated soft drinks, pharmaceuticals and other food & beverages.

The plant is equipped with state-of-the-art technology for consistent quality and reliable production capability. New capacity addition by Reliance will greatly help the downstream bottle and packaging industry in meeting the increasing demand from India and the region. India is one of the fastest growing markets for PET packaging with demand growing by 15-20% annually.

Purified Terephthalic Acid (PTA) and Mono Ethylene Glycol (MEG), the two feedstock for the new PET plant are available within the Dahej complex. This offers significant logistics advantages in the form of lower freight costs along with consistent product quality due to in-house raw material linkages.

In line with the "Make in India" initiative of Hon'ble Prime Minister Shri Narendra Modi, this world-class PET facility will enable further investments in downstream PET bottle manufacturing capacities.
