Maruti Suzuki in Top Gear with Push from CNG, Improved Exports

Sustained dip in raw material costs caused raw material-to-sales ratio to shrink 263 bps to 70% in Q1

Ashutosh R Shyam

ET Intelligence Group: Maruti Suzuki's reported impressive earnings growth of 47% year-on-year for the June quarter amid muted sales volume, aided by benign raw material prices. The maker of the Swift and Baleno cars recorded 344 basis point improvement in the operating margin before depreciation and amortisation (EBITDA margin) at 12.7% even as the volume increased a modest 5% to 5,21,868 units. The EBITDA per vehicle at ₹86,273 was at a record high. Sequentially, the company improved margin by nearly 41 basis points, surpassing market expectations by approximately 100 basis points.

A sustained decline in raw material costs caused the raw material-to-sales ratio to shrink 263 basis points to 70% in the first quarter of FY25. In addition, the company's average selling price (ASP) rose 5% year-on-year to ₹6.8 lakh per unit, driven by an improved product mix with a higher share of higher ASP CNG vehicles. Sales in lower CNG penetration markets such as Karnataka, Kerala, Rajasthan, Madhya Pradesh, and Bihar showed strong traction. The share of CNG vehicles in total domestic volume increased 600 basis points sequentially to 33% in the June quarter. Given the additional one lakh units of installed capacity at the Manesar facility, the CNG mix is expected to sustain. The company has guided for a sales volume of 6,00,000 CNG units for the current fiscal year, 33% higher compared with 4,50,000 units in the previous year.

In the coming quarters, margin may show pressure pertaining to rising discounts at the industry level due to higher inventory. The industry-wide inventory has reached approximately 6-6.5 lakh units, equivalent to 45 days of sales. For Maruti, though CNG models attracted lesser discount due to higher demand, average discounts per vehicle increased to ₹21,700 in the June quarter compared with ₹14,500 a year ago. This higher discount reflects rising competition.

The company's export growth has remained stable, with gradual expansion into the Middle East and Latin American markets. In the first quarter of FY25, exports grew 11% year-on-year to 70,560 units, contributing 13.5% to the total volume. The company expects export sales

of over 3,00,000 units for the full fiscal year compared with 2,83,000 units the previous year. With low single-digit growth in the domestic market, the full-year volume growth is expected to be 5-6% for FY25 and 7-8% for FY26.

Maruti's market share remained stable at 41.6% in the first quarter. It showed traction in the multi-utility vehicle (MUV) segment where the company's market share improved 500 basis points to 61%. Notably, the volume of the Ertega nearly doubled over the past year. The MUV segment makes up 14% of the total industry volume.

The stock trades at 26 times one-year forward earnings, which is in line with its long-term average valuation.

Buyers Rush to Gold Amid Fears of Rally After a Lull

Jewellers report up to 15% higher footfalls, demand surge leads to prices rising 2%

Sutanuka Ghosal

Kolkata: Consumers are rushing to buy gold, some even placing advance orders, on fears that prices may start rallying again after a recent decline, said jewellers and trade executives. Prices of the yellow metal fell after a customs duty cut in the budget but have since rebounded amid a rush of buyers in the world's second-largest bullion market.

Jewellers reported up to 15% higher footfalls in the first weekend of August compared to the previous

weekend, as consumers sought to benefit from the lower prices. However, the demand surge led to prices rebounding by 2% within a fortnight of the duty cut

following expectations of a rate cut by the US Federal Reserve and flaring up of the West Asia conflict. The FY25 budget, presented on July 23, lowered the

import duty on gold to 6% from 15%, bringing cheers to consumers. On July 24, the day after the duty cut, retail prices of gold stood at ₹71,225 per 10 gm, which has risen to ₹72,594 per 10 gm as of August 2.

"The feeling among the customers is that prices might further go up as the geopolitical tension might further escalate as Iran has threatened to attack Israel. This is prompting them to make purchases. They are buying jewellery ranging between ₹25,000-₹4 lakh," said Colin Shah, managing director at Mumbai-based Kama Jewellery.

KSK Mahanadi Lenders Can Distribute Surplus Cash Among Themselves: NCLT

Our Bureau

Mumbai: The Hyderabad bench of the National Company Law Tribunal (NCLT) on Monday approved a plea from the resolution professional of KSK Mahanadi Power to distribute the surplus cash amounting to ₹6,400 crore among lenders. According to people with knowledge of the matter, this is the first time lenders will recover a part of their dues before a resolution is approved by the NCLT.

All bidders including Adani Power—the highest bidder offering ₹27,000 crore, may want to relook at their respective offers following the NCLT order, according to the advisors involved in resolving the distressed thermal power company.

KSK Mahanadi Power received plans from Adani Power, Capri Global Holdings, Coal India, NTPC, Vedanta, Sajjan Jindal-owned JSW Energy, Naveen Jindal-owned Jindal Power and Steel, iLab India Special Fund, Rashmi Metaliks and Sherisha Technologies, ET reported on August 3.

The company had accumulated cash and a cash balance of little over ₹9,000 crore since three 600 megawatt units were operational for the last five years under the corporate insolvency and resolution process (CIRP).

The court has ruled that after setting aside a portion of funds reserved for maintaining the company's daily operations, the balance can be distributed among lenders. A banker said the surplus amounts to ₹6,400 crore.
