Space intel giant ICEYE to set up facility in India

New Delhi: ICEYE, a global leader in space-based intelligence, is set to establish its first Indian production facility within the next year to manufacture small satellites for defence, surveillance and environmental monitoring. Rafal Modrzewski, CEO of ICEYE, said the facility will serve as the company's primary manufacturing hub for the Asia-Pacific region, complementing its existing operations in Europe and the US. **PII**

HFCL bags ₹106 cr order for optical fibre cables

New Delhi: Telecom gear maker HFCL has bagged an order of \$11.07 million (about ₹106 crore) for the supply of optical fibre cables overseas, a company filing said on Sunday. The company has to complete the supplies by August. HFCL, in the fiscal year 2026, exported 70 per cent of its optical fibre cable production. In FY26, the company bagged a long-term global optical fibre cable supply contract valued at \$1.1 billion. **PII**

India, Netherlands ink 17 pacts on defence, critical minerals

LEG UP. Dutch Semicon Competence Centre to be connected to Indian Semicon Mission

Press Trust of India
The Hague

Driven by shifting global geopolitics, India and the Netherlands inked 17 agreements to boost cooperation in defence, critical minerals and other key sectors during talks between Prime Minister Narendra Modi and his Dutch counterpart Rob Jetten.

In their meeting, the two Prime Ministers expressed deep concern over the situation in West Asia, especially its serious implications for global energy supplies and trade networks.

Modi and Jetten also called for freedom of navigation and global flow of commerce through the Strait of Hormuz, which sees roughly one-fifth of global energy supplies pass through, where shipping has been severely disrupted since February 28. The two leaders also dis-

WALK THE TALK. Prime Minister Narendra Modi with his Dutch counterpart Rob Jetten on Sunday **REUTERS**

cussed the situation in Ukraine — marked by the ongoing conflict with Russia and regional security developments.

The Ministry of External Affairs (MEA) said in a social media post: "The visit witnessed the launch of a new Roadmap for Strategic Partnership, which will further deepen India-Netherlands ties and expand avenues for cooperation across key sectors."

Modi arrived in The Hague on Friday on a two-day visit as part of a four-nation trip

to Europe. He will also visit Norway and Italy in this tour.

TO LOOK OUT FOR

The two leaders also launched an ambitious "India-Netherlands roadmap on the development of green hydrogen".

Modi and Jetten agreed to explore possibilities of establishing a defence industrial roadmap to ensure joint manufacturing of defence equipment, systems, components and other key capabilities.

The Netherlands is one of

India's largest trading destinations in Europe, with bilateral trade touching \$27.8 billion in FY25. It is India's fourth-largest investor with cumulative foreign direct investment of \$55.6 billion.

The two sides also agreed to enhance cooperation in science and innovation, sustainability, health, agriculture, water management, climate change, energy transition and maritime development. They welcomed an initiative to connect the Dutch Semicon Competence Centre to the Indian Semiconductor Mission, the joint statement noted.

PM IN SWEDEN

Modi landed in Sweden on Sunday, where he will hold talks on trade, technology, defence and other key sectors. His two-day tour will focus on exploring avenues of cooperation to enhance bilateral trade, which reached \$7.75 billion in 2025.

CAFE III norms likely by May-end despite E25 recalibration

Amit Vijay Mohile
Mumbai

CAFE III fuel-efficiency norms are on track for a May-end notification despite last-minute changes to align the framework with India's accelerated ethanol roadmap.

The Bureau of Energy Efficiency is updating the core compliance formula, but industry experts say the revision is technical and will not delay the final rules. The norms will shape how automakers deploy EVs, hybrids and flex-fuel vehicles through the rest of the decade.

India is likely to notify the final Corporate Average Fuel Economy (CAFE) III norms by the end of this month, with industry executives expressing growing confidence that the long-awaited fuel-efficiency rules are nearing completion despite a last-minute recalibration to align the framework with India's accelerated ethanol roadmap.

IMPORT DEPENDENCE

People familiar with the discussions said the urgency reflects the government's broader objective of reducing dependence on imported crude, expanding ethanol use and accelerating cleaner technologies.

Industry sources said the matter has received attention at the highest levels of government, with the Prime Minister's Office understood to have urged the Bureau of Energy Efficiency (BEE) not to let technical recalibration related to the shift from E20 to E25/E27 delay the final notification.

"All the discussions have been done. The final notification is expected to come out by the end of this month," a top automotive industry executive involved in the con-

CAFE III will reshape the economics of technology choices in the passenger vehicle market

sultations told *businessline*. "OEMs need time to finalise their powertrain mix plans going forward. Time is of the essence," another senior industry official said.

businessline also spoke to experts in the regulatory and certification ecosystem, who said the latest behind-the-scenes revision — effectively a fourth sub-iteration of the draft — recalibrates the reference fuel from E20 to E25/E27 to align the framework with India's accelerated ethanol roadmap.

The core CAFE III targets remain unchanged; only the underlying chemistry and conversion math are being updated so that automakers are assessed on vehicle efficiency rather than being penalised for the properties of a higher-ethanol fuel.

The final norms will leave automakers with less than 11 months to prepare for implementation from April 1, 2027.

ON THE TABLE

More importantly, CAFE III will reshape the economics of technology choices in India's passenger vehicle market. The framework will determine not only fleet-average fuel-efficiency targets, but also how compliance credits are assigned to

battery EVs, strong hybrids and flex-fuel technologies, influencing which powertrains are cheaper or costlier to deploy.

Industry executives said incorporating E25 into the testing baseline could provide an implicit compliance cushion, which could broaden the technology options available to manufacturers.

Leading automakers are already preparing distinct flex-fuel strategies. Maruti Suzuki is expected to deploy ethanol-compatible technology in high-volume models, Toyota Kirloskar Motor is combining flex-fuel engines with strong hybrids, and Tata Motors has said its flex-fuel technology is ready for launch around late 2026 or early 2027.

With automakers already finalising FY28 product and powertrain strategies, the rules will determine which technologies gain a cost advantage and which manufacturers are better positioned in India's transition to cleaner mobility. Without regulatory clarity, companies risk delaying supplier commitments and investments across hybrid, electric and flex-fuel platforms. For the industry, consultations are effectively complete; what manufacturers need now is the final rulebook that will shape technology bets, capital allocation and competitive positioning through the rest of the decade.

CNG prices in Delhi NCR raised by ₹1/litre; 2nd hike in 48 hours

Our Bureau
New Delhi

POST POLLS. CNG prices were raised by ₹2 per kg on Friday. This comes within days of the conclusion of Assembly elections in West Bengal, Tamil Nadu, Assam and Kerala **SUSHIL KUMAR VERMA**

The price of compressed natural gas (CNG) has been raised by ₹1 per kg to ₹80.09 in Delhi, marking the second hike in rates in the last 48 hours. In Noida-Ghaziabad, CNG will now cost ₹88.70 per kg.

"The retail selling price of CNG has been increased by ₹1/kg w.e.f. 6 am on 17.05.2026 in all GAs of IGL," Indraprastha Gas (IGL) said on X.

The revision in retail

prices of CNG has been effected only to marginally offset the impact of increase in input gas cost along with steep appreciation of the US dollar.

Even after the revision, CNG would still offer up to 45 per cent savings towards running cost when compared to vehicles running on alternate fuel at the current

level of prices, it added.

CNG prices were raised by ₹2 per kg on Friday (May 15), within days of the conclusion of the Assembly elections in West Bengal, Tamil Nadu, Assam and Kerala.

HEADWINDS FOR CNG

The rise in prices will have a bearing on public transport, with auto and taxi fares expected to go up.

Recently, ICRA had said that the city gas distribution (CGD) sector, although projected to some extent owing to preferable natural gas allocation, continues to face

rising cost pressures amid currency depreciation and rising gas prices.

For the CGD entities, ICRA expects the profitability on PNG-domestic (PNG-D) to remain stable as the demand is being met through preferential allocation of the administered price mechanism (APM) gas.

However, for the CNG segment, the margins are expected to face headwinds on account of increased gas costs as well as currency depreciation, which may not get passed on fully to the consumers, it added.

TODAY'S PICK.

Ola Electric Mobility (₹35.70): BUY

Akhil Nallamuthu
bl. research bureau

The stock of Ola Electric Mobility gained 60 per cent in April after bouncing off a strong base at ₹22. But since the beginning of May, it has largely stayed flat, oscillating between ₹34 and ₹38.

Nevertheless, the stock maintains a positive bias, and we expect it to see another leg of rally.

The bulls will have an edge over the bears as long as the

stock trades above the support at ₹34, where the 38.2 per cent Fibonacci retracement of the recent uptick coincides.

Once the uptrend resumes, the stock can rally to ₹50 over a few weeks. Therefore, traders can buy at ₹35 and place a stop-loss at ₹32.

When the price touches ₹42 and ₹46, raise the stop-loss to ₹37 and ₹42, respectively. Book profits at ₹50.

Note: The recommendations are based on technical analysis. There is a risk of loss in trading.

Govt sets up shoe testing lab

Meenakshi Verma Ambwani
New Delhi

The National Test House (NTH), Northern Region, under the Department of Consumer Affairs, has established a state-of-the-art Shoe Testing Laboratory.

The Ministry said the lab offers enhanced capabilities to provide comprehensive, reliable and high-precision footwear testing services for MSMEs, manufacturers, exporters, consumers and regulatory authorities across the country.

Ghaziabad's upgraded Shoe Testing Laboratory is equipped with advanced infrastructure to evaluate a wide range of footwear products in line with the relevant Indian standards. It is capable of conducting quality testing for products across categories, including safety and industrial shoes, school and leather footwear, and PVC footwear.

"The laboratory will undertake a comprehensive range of critical performance and quality tests to ensure high standards of safety, durability, comfort and performance, thereby making quality assessment more accessible, particularly for MSMEs and small-scale manufacturers," the statement added.

The centre is located near footwear manufacturing clusters like Delhi-NCR, Kanpur and Agra.
