^{*}Details In Annexure

Analytical Approach

Ind-Ra continues to factor in SFL's standalone credit profile to arrive at the ratings.

Detailed Rationale of the Rating Action

The ratings reflect SFL's continued large franchise in the non-banking financial company (NBFC) segment, with a significant presence in vehicle finance. After the merger, the ratings consider the company's diversified portfolio comprising non-vehicle segments and transformation into a multi-product lender. It also factors in the company's ability to manage various business cycles consistently while maintaining adequate profitability. SFL's funding is well diversified, and capital buffers are adequate. Further, it has demonstrated the ability to raise the capital required to grow the franchisee.

List of Key Rating Drivers

Strengths

- Large franchisee with well diversified portfolio
- Adequately capitalised; stake sale in its housing subsidiary to bolster capitalisation further
- Diversity in funding mix to continue
- Multiple levers to drive profitability

Weaknesses

- Asset class susceptible to volatility, but reasonable buffers to absorb spike in credit costs

Detailed Description of Key Rating Drivers

Large Franchisee with Well Diversified Portfolio: SFL, after the merger, has transformed from a pure vehicle financing NBFC to a company that has a presence in various segments. Its assets under management (AUM) stood at INR2.6 trillion at FYE25 and are quite diversified, with commercial vehicle (CV) financing accounting for 45.05%, followed by passenger vehicles (PV; 20.56%), micro, small, and medium enterprises (MSME; 14.22%), tractor and construction equipment (8.77%), two-wheelers (5.92%), personal loans (PLs; 3.65%), and gold loans (1.84%) at FYE25. Furthermore, SFL has become a significantly large franchise with a leadership position in used vehicle and two-wheeler financing. It has a nationwide footprint and a large network of 3,330 branches at FYE25, with a substantial presence in rural and semi-urban areas. Additionally, its integration with Shriram City Union Finance Limited (SCUF) has relatively reduced the cyclicality inherent in the CV segment while significantly enhancing the company's geographical presence and distribution capabilities. Ind-Ra expects its AUM to grow in line with the industry and expects SFL to maintain its leadership position in used vehicle financing.

Adequately Capitalised; Stake Sale in its Housing Subsidiary to Bolster Capitalisation Further: SFL in its earlier form as Shriram Transport Finance Company (STFC) and SCUF had demonstrated a track record of capital raising over FY21-FY22, the combined entity had aggregated INR39.9 billion through qualified institutional placements, preference shares, rights issues and warrants issuance to the promoter, Shriram Capital Limited. SFL's equity stood at INR562.8 billion at FYE25 (FY24: 485.7 billion; FYE23: INR433.1 billion) with its tier-1 ratio of 20.03% (19.55%; 21.2%). During FY25, SFL completed sale of its entire stake in its housing subsidiary, at a total consideration of around INR46 billion. Its debt-to-equity ratio remained at comfortable at 4.16x in FYE25 (FY24: 3.83x; FY23: 3.66x). The agency believes the capital levels (total capital adequacy: FYE25: 20.66%; FY24: 20.3%; FY23: 22.61%), along with its internal accruals will provide sufficient room for medium-term growth, as well as the requirement of buffers for any asset quality shocks.

Diversity in Funding Mix to Continue: SFL's borrowing profile is fairly diversified as it has access to the bond market, bank borrowings and securitisation, as well as public deposits and external commercial borrowings. At FYE25, the borrowing profile comprised NCDs (16.35%), bank term loans (21.07%), securitisation (16.25%), public deposits (23.95%), subordinated debt (1.07%), external commercial borrowings (ECB) loans (14.37%), ECB bond (6.77%) CPs (nil) and other borrowings (0.17%). In FY25, SFL achieved a significant milestone by raising nearly USD2.8 billion through an ECB transaction. This was in addition to USD300 million raised in 4QFY24 through securitisation in the overseas market, indicating the company's ability to tap into opportunity while navigating complex

[#] Unutilised

international finance. The transaction has also opened up new avenues of wholesale funding for SFL. Furthermore, with its asset portfolio largely remaining retail in nature and a majority of the assets among them qualifying for priority-sector advances, SFL could continue to use the securitisation route effectively and increase the share. Ind-Ra believes the company would continue to focus on diversifying its borrowings in terms of sources and counterparties, and manage cost of funds.

Multiple Levers to Drive Profitability: The share of high yielding product such as MSME, two-wheeler, PL, and gold loan increased in the overall mix to 25.62% as of March 2025 (March 2024: 24.04%; March 2023: 21.9%). On the other hand, the share of CV and construction equipment shrunk 250bp and 74.7bp, respectively, over the last one year. The shift in the mix has led to an improvement in the margins (FY25: 8.55%; FY24: 8.84%; FY23: 8.37%); although, it was lower at 8.25% in 4QFY25, mainly due to the excess liquidity which had an impact of around 25bp.

Furthermore, SFL continue to leverage on its leadership position in the CV financing, catering to niche segments of new-to-credit and underserved borrowers. Its pan-India presence, with over 3,330 branches as of March 2025 and a newly augmented workforce will aid SFL in cross-selling its product to its existing customers and drive growth through its new market penetration. The continuous improvement in the share of non-vehicle segment will be beneficial for the company's profitability. The agency opines that despite increased operating costs, the overall cost metric will be contained on a higher scale and improve per-branch efficiency. The return ratio could continue to benefit from its enhanced scale and margin profile.

Asset Class Susceptible to Volatility, but Reasonable Buffers to Absorb Spike in Credit Costs: With over 50% of its AUM concentrated in the rural areas and 45.05% in CV financing, the borrower segment remains susceptible to income volatility, which can further accentuate during economic downturn. As was seen during COVID-19, SFL's gross stage-3 ratio stood at 7.06% during FY21, and credit cost was at 2.8%. That's said, SFL's profitability buffers (pre-provisioning operating profit /credit costs) for FY25 remained adequate at 3.06x (FY24: 3.14x; FY23: 2.97x). Furthermore, the healthy collection and recovery mechanism have resulted in improved asset quality metrics. SFL's gross non-performing assets (NPAs) fell to 4.55% at FYE25 (FYE24: 5.45%; FYE23: 6.21%). The improvement in gross stage 3 assets was largely due to write-off of INR23.5 billion in 4QFY25. Furthermore, the write-back of INR16 billion during the last quarter, led to a decline in the provision coverage on stage 3 assets to 43.28% in FY25 (FY24: 51.79%; FY23:50.14%) while coverage on its stage 1 & stage stood asset was adequate at 3.57% (3.57%; 2.18%). The collection efficiency increased to 98.9% as of December 2024. SFL's write-off stood at around 1.5% in FY25 (FY24: 1.63%). The credit cost (on-book AUM) was stable at 2.21% at FYE25 (FY24: 2.23%).

Liquidity

Adequate: SFL had a positive cumulative surplus in the one-year time frame of the structural liquidity statement at end-March 2025. The company would still have a positive cumulative surplus despite stressing the structural liquidity statement. As of March 2025, the company had cash and cash equivalents, non-lien fixed deposits and investment aggregating to INR236.1billion and unutilised bank lines of INR75.8 billion, adequate to cover six months of debt repayment of INR167.9 billion. SFL can also raise funds through the securitisation route, if required, since most of the assets are qualified for the priority sector.

Rating Sensitivities

Positive: A significantly strengthened, stable funding profile that could emerge through a meaningfully larger proportion of granular retail funding and highly increased credit costs absorbing buffers, while maintaining the dominant franchise in the used CV financing segment could strengthen the credit profile and thus would lead to a positive rating action.

Negative: Developments that could individually and collectively, result in a negative rating action include:

- a sharp increase in the credit cost, leading to a depletion in the operating buffers, on a sustained basis;
- reduced resource raising ability impacting the liquidity;
- a significant loss of franchise;
- the common equity tier 1 capital falling below 14% on a steady-state basis.

Any Other Information

Not applicable

ESG Issues

ESG Factors Minimally Relevant to Rating: Unless otherwise disclosed in this section, the ESG issues are credit neutral or have only a minimal credit impact on SFL, due to either their nature or the way in which they are being managed by the entity. About India Ratings and Research: India Ratings and Research (Ind-Ra) is committed to providing India's credit markets accurate, timely and prospective credit opinions. Built on a foundation of independent thinking, rigorous analytics, and an open and balanced approach towards credit research, Ind-Ra has grown rapidly during the past decade, gaining significant market presence in India's fixed income market.

Ind-Ra currently maintains coverage of corporate issuers, financial institutions (including banks and insurance companies), finance and leasing companies, managed funds, urban local bodies and project finance companies.

Headquartered in Mumbai, Ind-Ra has seven branch offices located in Ahmedabad, Bengaluru, Chennai, Delhi, Hyderabad, Kolkata and Pune. Ind-Ra is recognised by the Securities and Exchange Board of India, the Reserve Bank of India and National Housing Bank.

India Ratings is a 100% owned subsidiary of the Fitch Group.
