

Micro Technologies bags a major export order for its advance version of Vehicle Security Product

Micro Technologies (India) Ltd., a leading global developer and marketer of security products bagged major export order for its advance version of Vehicle Security product; Micro VBB Marshall. Micro Technologies will deploy VBB Marshalls in a phase-wise manner. These devices will be deployed in the vehicles of major petroleum companies and the state oil boards.

Micro VBB Marshall is suitable to be fitted in the automotive environment with main power supply from the vehicle battery. Micro VBB Marshall is designed for the security of the fuel tankers, to stop the illegal pilferage of fuel. It is also helpful in keeping a track of the tankers and also to monitor its current location. It can also be used for consignment tracking, as well as equipment and assets monitoring. It monitors various parameters like Speed and Coordinates, and sends alert messages to the registered user in case of any tampering. It is a real time GPS based tracking system along with a facility of storing its data in memory with date and time stamps which on regaining the connectivity, can be transferred to the server. And with the Replay tracking feature enables you to view a live playback of each journey taken by vehicles right from Start to End on the web.

Micro VBB Marshall is designed to withstand harsh automotive environment like temperature, humidity and high spike voltage. It works on internal battery backup in case the main battery is disconnected. In case the driver faces any emergency or break-down situation, Micro VBB Marshall has life- support features like emergency messaging, break-down messaging, where in an 'Alert Message' is sent immediately to the server or the Registered User (RU).

"This prestigious achievement would give a significant turn to Micro Technologies in terms of growth and expansion in other markets ultimately leading to more Global orders. This will also uniquely position the company and its products because of the very nature to reduce pilferage"; Says Mr. Karthik, Chief Operating Officer, Micro Technologies (India) Ltd.

"I am glad to partner with a renowned company like Micro Technologies. We aim to focus more on enhancing the retail outlets and the dealers network in the geographies of Bangladesh and neighboring countries to offer our innovative security products", Says Mr. Sajjad, Bangladeshi partner of MTIL.
