MEDIA RELEASE

Micro Technologies Deploys 'Trolley Management System' at Major International Airports

- Improves Management Process of Trolleys
- Installation Optimizes Trolley Usage
- High Availability of Trolleys During busy Seasons

Mumbai, October 15, 2012

Micro Technologies (India) Ltd., (MTIL : BSE 532494 & NSE:MICROTECH) a leading global developer and marketer of security devices and solutions today announces that it has won order from its Israel distributor to provide its Micro Trolley Management System ('Micro TMS') for swifter and safer trolley movements and baggage clearances for Major International Airports.

'**Micro TMS**' is a combination of a high end Hardware and software that enables the whereabouts of trolleys to be monitored and effectively managed to ensure they are always available to service the needs of passengers.

Announcing the signing of the contract regarding the successful installation & commissioning of 'Micro TMS' initially in the busiest international airport in South East Asia, **Mr. Ganapathy V, CEO, Micro Technologies (India) Ltd.** said, "Micro Trolley Management System has got many useful features and multi-functional capabilities. It can trace, track, sort by batches, monitor in real time and optimize trolley usage. Besides, it is carousal and passenger-friendly. The positive feedback from its operations will spur us to deploy 'Micro TMS' in many modern airports in the coming years."

The 'Micro TMS' provides an automatic, instantaneous tracking and overview of the location of an individual trolley. The online supervision of the trolleys' position enables the personnel to instantly move the trolleys to the areas where they are much required. This eliminates the need to conduct manual searches for trolleys within the airport facilities.

In 'Micro TMS' all RFID Tags are linked with a Trolley Serial Number so that identification becomes simple. The RFID Fixed Reader has high recognition, powerful long range with reliability and is highly scalable. The reading distance is auto regulated or adjustable. The minimum and the maximum number of trolleys required in each area of the airport can be configured in the 'Micro TMS.'

When interfaced to the flight information system, 'Micro TMS' actually estimates the need for trolleys in the various areas of the airport in any given time slot.

Micro Technologies (India) Ltd.

(An ISO 9001 & 27001 Company)

YOUR SECURITY IS OUR CONCERN

Installation of Micro TMS provides the airport with the following advantages:

- Increases the availability of trolleys
- Improves the distribution process of trolleys
- Perfects stock management
- Accounts trolleys by belt
- RFID Tags can be linked with Trolley Serial Number
- Locates trolleys within the arrival hall.
- Reduces drastically manual search of trolleys
- Enhances Key Performance Indicators

It also provides accurate knowledge of, where the trolleys disappear in the airport, which makes it easier for the concerned authorities to take action against these irregularities.

Micro Technologies has received lot of compliments and positive feedback from the airport authorities. The company is confident of replicating the successful experience gained from this project in a number of other airports and regional hubs across the globe. It can also be used in important places where Trolleys are being used.

About Micro Technologies (India) Limited

Established in 1992, Micro Technologies (India) Ltd. is a leading global developer and marketer of security solutions for its clients. It is an ISO 9001, 27001 & 14001 Certified Company with products approved and certified by many national and international certifications like NASSCOM, ERTL, ARAI and UL & EMC. Product lines include the much-needed security devices, life style and support systems and web-based software. Micro Technologies has a long track record of offering leading-edge security solution products. The company focuses on innovation, advanced technology and on making the life of its clients safe, secure and manageable in terms of security, time and money. It has won many national and international awards for its growth and R&D. Micro Technologies aims at displaying not just the technological innovation and prowess but also the product diversity in various segments of vehicle, premises, mobile and other assets. It is now vigorously entering the Energy & Health Segments.
