

Micro Technologies Bags 160 Cr Project for a Major PSU

Micro Technologies a leading IT security based R&D company will be executing a project worth 160 Cr for creating a highly secured communication system called "VOB" Video over Broadband. The above system includes a state of the security surveillance system with access control, Disaster Recovery center including supply of the high end infrastructure. This infrastructure will include high end servers and network facility to handle the clients in ranging more than few tens of millions.

This order shall enable Micro Technologies to provide Disaster Recovery and management to various of its other customers in the PSU sector. This shall also be on the most secured and highly redundant systems implemented till date, with two major data centers ensuring 24x7 uptime. This project will enable the company to tap the PSU sector with such kind of advanced communication set up and infrastructure management including security. This communication is first of its kind to be implemented in India covering a wide range of customers including individual and corporate to use this.

Micro Technologies based on this expertise will be able to provide such highly secured communication system to other PSU/other corporates both domestically and internationally. The project also showcases the capabilities of MTIL to implement and manage such a huge project within a span of next three to four months.

In this occasion Mr. Mukund Gupta, ED - Micro Technologies said "This is one of the prestigious order for us with the most advanced security and communication technology provided by the company. We are really happy and proud to have such order and looking forward for more penetration in PSU sector"
