

Micro Technologies implements advanced version of Micro Students Attendance Management System

Micro Student's Attendance Management System (Micro SAMS)- A Bio Metric Card System for proper management of Academic institutions, the advanced version has been implemented in Ranchi based St. Xavier's School. Micro SAMS is innovative software developed by Micro Technologies for the proper management of schools.

Micro SAMS is a database management system with attendance record of Student and Lecturer remotely from various Locations - across the globe at one single point. Micro SAMS generates various MIS reports in order to take prompt action related to Attendance. RFID/ Biometric based login and logout for Lecturer, students and guest lecturers with image captured using webcam for attendance. The system alerts the administrator about the discrepancy. SMS/Email alert to the authorized user.

Micro Technologies has implemented Micro SAMS in various educational institutions across the country. A lot of institutions are realizing the need of such system to bring the transparency in the system and to efficiently manage their vast infrastructure, communication and administrative related issues.

Micro Technologies unveils 'Security Requirements of Thane- A National Perspective', a book on Thane security

Micro Technologies (India) Ltd has unveiled a series of Security requirements books that deal with various security issues and solutions to mitigate the risk. These book takes security as a holistic discipline. For security to succeed, it must incorporate not just guards, guns, and gates, but other elements, in particular technology. In addition, all the factors must work together, without focus on individual parts at the expense of the whole. "**Security Requirements of Thane - A National Perspective**" fills that need, detailing all of the various components of a successful security system.

The book ***Security Requirements of Thane*** provides readers with a quick, easy-to-understand reference on threat matrix, technologies to mitigate the threats and benefits derived from security products as well as security solutions developed on the basis of cutting-edge technologies. Numerous thematic diagrams capture the reader's attention and ensure that each security solutions and products will be well understood and implemented correctly...any security professional would benefit from the collection of knowledge and useful information assembled in this book, especially those seeking the future launch of MBA Course in Security Management.

This book is an excellent resource for physical security of professional, policy makers and security agencies which they can exploit to varying depth depending on their own expertise and the nature and scope of their own security program. The book has estimated the security expenditure sectorially and region based to make Thane district safe and secure. The book written by Dr.P.Sekhar, Chairman, Micro Technologies through MicroTech Global Foundation was launched by the Commissioner of Police, Thane, Mr. K. P. Raghuvanshi, IPS.
