MEDIA RELEASE

MICRO TECHNOLOGIES GETS APPROVAL FOR MICRO VBB TRACKER FROM THE TELECOM REGULATORY AUTHORITY OF UAE

- **Certificate, A Boost To Micro Technologies**
- **Approval is from the Telecom Regulatory Authority of UAE for Micro VBB Tracker & Mobile Software**
- **Micro Technologies Plans To Get Similar Certificates For Its Other Security Products & Solutions**

Mumbai, October 30, 2012

Micro Technologies (India) Ltd, (MTIL – BSE: 532494 & NSE: MICROTECH) a leading global developer and marketer of security devices and solutions today announces that it has received approval for Micro VBB Tracker and Mobile Software from the Telecommunications Regulatory Authority of the UAE recently. The TRA of UAE pursuant to its authority under the Federal Law has authorized the Micro VBB Tracker & Mobile Application for the usage in the kingdom.

Announcing this, **Mr. Karthik R, COO, Micro Technologies** said, "This is one more feather in our cap. It shows that not only do we care for safety and security but also for quality and excellence as Micro VBB Tracker and Mobile Software has undergone many rigorous tests before getting certified for usage in the UAE. This will encourage us to get similar certificates for other security products and solutions as we contemplate on ushering in these into the UAE sooner."

With this approval, Micro VBB Tracker & Mobile Software can be sold anywhere in the United Arab Emirates which further acts as a gateway to other middle eastern and African markets. Every year there is an addition of 10,000 new vehicle owners in Dubai alone. This Certificate has been executed by a Subsidiary company of Micro Technologies.

Micro VBB Tracker

Micro Vehicle Black Box Tracker is apt for all those users who look for real time tracking & life support solutions, even when they are not physically close to their movable assets. The product has the capability of dealing with all the aspects of real time tracking at ease. Tracking solution allows vehicle owner to use advanced GPS (Global Positioning System) technology for monitoring and defining business logic with various on-demand MIS reports.

Keeping track of the vehicle movement becomes quite convenient for the vehicle owner. Business logic such as virtual fencing, E-mail alerts, Selection of Digital Maps are the backbone of this solution. It also has useful features like replay and analysis reports of trip logs, and SOS messages etc.
