Kesoram faces ownership shift as logistics firm Frontier plans open offer

Our Bureau
Kolkata

Kesoram Industries, a BK Birla Group company, is expected to witness an ownership change as storage and logistics solutions company Frontier Warehousing has proposed launching an open offer to acquire up to a 26 per cent stake in the century-old company.

The proposed open offer triggered as Kolkata-based Frontier Warehousing has entered into a share purchase agreement (SPA) with members of promoters/promoter group, including Aditya Birla Real Estate, Pili-an Investment and Industries Corporation, Manav Investment and Trading Co, and Birla Group Holdings, to acquire around 13.29 crore equity shares of Kesoram Industries, representing 42.80 per cent of the voting share capital at a price of ₹4 per equity share.

OPEN OFFER

The storage and logistics solutions company proposed to launch the open offer late on Thursday to acquire up to 8.07 crore shares or 26 per cent stake in Kesoram at price of ₹5.5 per share, aggregating to a total consideration of ₹44.2 crore.

“Frontier Warehousing Ltd (Acquirer) has triggered this open offer ... for acquisition of up to 8,07,72,600 equity shares having face value of ₹10 each, fully paid-up, representing 26 per cent of the voting share capital of Kesoram Industries Ltd at a price of ₹5.48

JSW Cement to invest ₹11,000 cr over 3 years to double capacity

IN EXPANSION MODE. Company is planning facilities in Uttar Pradesh, Madhya Pradesh

KV Kurmanath
Hyderabad

JSW Cement, a JSW Group company, will invest ₹11,000 crore over the next three years to double the production capacity to 41 million tonnes from the current level of 20 mt.

“At the time of our IPO, our capacity was 20 million tonnes. We added one million tonnes in Odisha since then. Our major expansion in Rajasthan is underway and will be ready by the end of January 2026. By this fiscal year-end, we will be a 25 million tonne company. We plan to reach 41 million tonnes by 2028, then 60 mt thereafter,” JSW Cement Managing Director Parth Jindal told *businessline*.

“It is a mix of both existing and inorganic growth. We will be adding more locations in central India — Madhya Pradesh and Uttar Pradesh — with an additional 6 mt,” he said.

“The balance of 10 mt will

DUAL STRATEGY. Parth Jindal (left), who also heads JSW's Defence arm, at the foundation stone ceremony of the V-BAT drone plant at Maheshwaram, Hyderabad

be within existing locations: Dolvi in Maharashtra, Vijayanagar in Karnataka, and Talwandi Sabo in Punjab,” Jindal said.

He said work on the Madhya Pradesh and Uttar Pradesh sites would commence in 2027; they will commence production in 2029.

“We will invest ₹3,500 crore in these two facilities. To go from 20 mt to 41 mt, we will be spending ₹11,000 crore over the next three years,” he said.

V-BAT DRONES

Jindal, who also heads JSW's Defence arm, was in Hyderabad to lay the foundation stone for the V-BAT drone manufacturing facility at Maheshwaram near here.

“We are investing ₹1,200 crore in Hyderabad to set up the UAV manufacturing facility, and on our Chandigarh facility,” he said.

“We have already invested ₹320 crore in Hyderabad for the technology transfer, the land and training. We will in-

vest an additional ₹500 crore by the end of November 2026.”

Regarding the prospects for orders for V-BAT drones that can take off vertically, he said there was a requirement for localisation as part of the localisation criteria.

“For now, they have given us a very small requirement of eight systems under the emergency procurement route. This is being directly addressed by Shield AI, a technology partner for the UAV venture, through imports. The larger orders will only happen once this facility is up and running,” Jindal said.

This facility will have a capacity to produce 300 units annually.

“We already have an export commitment by Shield AI: 50 units in the first year; 150 units in the second year, and 300 units in the third.

“The balance (capacity) will be for domestic orders. We can easily expand this facility to 450 units if we get orders,” he said.

Govt examines stakeholders' views on draft Broadcast Bill

Our Bureau
New Delhi

The Information & Broadcasting Ministry has completed stakeholder consultation on the draft Broadcasting Services (Regulation) Bill 2023, Minister of State for Information & Broadcasting L Murugan informed Parliament.

The draft Broadcasting Service (Regulation) Bill-2023, which had sparked a debate, seeks to regulate both traditional broadcasters and new-age digital platforms, including OTT streaming services and online news and content creators.

In a written reply to a question raised in the Rajya Sabha, he stated that the draft Bill was placed in public domain on November 10, 2023. Views and suggestions were sought on the Bill till October 15, 2024.

“Based on the diverse suggestions received from stakeholders, including media and entertainment industry associations, the government extended the comment period until October 15, 2024,” he added.

“The suggestions received from all stakeholders have been examined. Government believes in wide and extensive consultations,” Murugan said.

The draft Bill, which was placed for public consultation, seeks to overhaul the regulatory framework governing television broadcasters, cable operators, OTT platforms, digital news entities and social media streaming.

Cloudflare's outage brings internet to a halt

Our Bureau
Chennai

Content delivery network services provider Cloudflare faced widespread outage on Friday with major websites and online services going offline worldwide. This is the second such disruption for the company in under a month.

The global CDN provider powers a large portion of the global internet infrastructure, and the outage on Friday led to disruptions across major websites such as Zoom, Canva, LinkedIn, ChatGPT and Spotify, among others. In India, trading platforms Groww and Zerodha were among those affected by the temporary outage.

In a statement shared with *businessline*, Cloudflare said the disruption was due to a planned change rolled out by its team to mitigate certain vulnerabilities, and stressed that this was not an attack or a security incident.

“A change made to how Cloudflare's Web Application Firewall parses requests impacted the availability of

Cloudflare's network at approximately 8:47 GMT and concluded approximately 9:13 GMT. This was not an attack; the change was deployed by our team to help mitigate the industry-wide vulnerability disclosed this week in React Server Components. We will share full details in a blog post,” the company said in its statement.

Cloudflare CTO Dane Knecht said in a post on X that they were aware of the issue impacting the availability of Cloudflare's network.

“It was not an attack; root cause was disabling some logging to help mitigate this week's React CVE... Sites should be back online now, but I understand the frustration this causes,” he said.

As the infrastructure behind millions of websites and apps, a snag in Cloudflare is largescale in nature and affects users globally and across various platforms.

Earlier, on November 18, there was another widespread outage as the company was performing scheduled data centre maintenance.

Tamil Nadu CM inaugurates Corning's ₹1,000 crore facility in Kancheepuram

GLASS HUB. Tamil Nadu Chief Minister MK Stalin inaugurating Corning's pre-cover glass facility in Kancheepuram

Tamil Nadu Chief Minister MK Stalin inaugurated a pre-cover glass manufacturing facility set up by Bharat Innovative Glass Technologies Private Ltd, a joint venture between US-based Corning International Corporation and Indian telecom major Optimus Infracom, in Kancheepuram district on Friday.

The facility, which will manufacture Corning's special Gorilla glass covers, has been set up on an investment of ₹1,003 crore. It is expected to create 840 jobs initially with a further 500 jobs to be added by next year-end. It will have a capacity of 30 million pieces in its first phase of production.

“Corning, globally renowned for its Gorilla Glass and counted among the prestigious Fortune 500 companies, has chosen to in-

vest ₹1,003 crore in Tamil Nadu, creating approximately 840 high-quality employment opportunities for our youth. This is a matter of immense pride and satisfaction for our State,” Stalin said, inaugurating the facility.

PACT WITH TN

Corning and Optimus Infracom had signed a memorandum of understanding (MoU) with the Tamil Nadu government in January 2024 to establish the cover glass facility. The foundation stone for the facility was laid

in June last year.

Stalin also noted that in the past four years, Tamil Nadu had seen remarkable growth in electronics, achieving nine-fold growth worth \$14.6 billion.

“India is one of the fastest growing smartphone markets in the world, and the facility will allow us to bring the durability, reliability and innovation synonymous with Gorilla Glass to even more consumers in this country,” Andrew Beck, Vice-President and General Manager Gorilla Glass, Corning, said.

Winter chill sparks 15% surge in sales of heating appliances

DIGITAL DRIVE. Sales of heating equipment witnessed an uptick in e-commerce channels too **BLOOMBERG**

With the early onset of winter across the country, heating equipment manufacturers have witnessed up to a 15 per cent year-on-year increase in sales.

Driven by winter and the increased adoption of energy-efficient solutions, original equipment manufacturers (OEMs) are projecting growth of up to 20 per cent for December 2025 and January 2026.

“There has been a consistent year-on-year growth in the demand and sales of heating equipment, currently standing at approximately 15 per cent. This trend reflects strong consumer confidence and seasonal requirements. The early onset of winter has significantly boosted demand for heating solutions across the country. Current market estimates indicate that the geyser segment is poised to reach approximately 5.5 million units in FY26,” said Amit Sahni, Head-Air Coolers & Water Heaters, Tata Voltas, to *businessline*.

The electric water-heater market (₹2,587 crore in 2024) is projected to grow at a 7.2 per cent CAGR through

2033. The overall water-heater category, valued at ₹9,744 crore in 2024, is expected to surpass ₹17,724 crore by 2033.

“Retailers are reporting an uptick in consumer searches and store inquiries for geysers and electric water heaters ahead of the traditional peak. Anchor is well-positioned to capture this swing through its refreshed portfolio including the new Viola, Squario and Solvina ranges, which cover both instant and storage-geyser categories,” said Sumil Narula, Senior V-P Sales and Marketing, Panasonic Life Solutions India.

E-COMMERCE PICK UP

Sales of heating equipment have also witnessed an uptick in e-commerce channels. “E-commerce channels now account for nearly 30

per cent of total sales for the category, underscoring the growing importance of digital platforms in meeting consumer needs. The early onset of winter has significantly boosted demand for heating solutions across the country,” added Sahni.

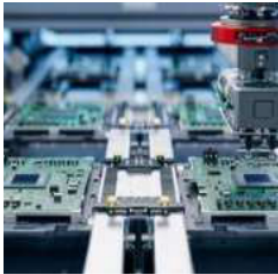

SMART TECHNOLOGY

Similar to air-conditioning, consumers are preferring to opt for the latest technologies in heating equipment.

“Growing adoption of smart-home technology is also accelerating demand reflected in launches such as Panasonic Life Solutions India's IoT-enabled Duro Smart and Prime series. The final demand curve will, however, be influenced by factors such as pricing, inventory availability and region-specific weather intensity,” added Narula.

Syrma SGS to assemble Gigabyte's server motherboards at Chennai facility

Sindhu Hariharan
Chennai

Giga Computing, a subsidiary of Taiwanese high-performance computing and data centre solutions firm Gigabyte Group, has entered into a strategic partnership with Indian electronics manufacturer Syrma SGS Technology Ltd for manufacture of servers in Chennai.

The partnership will facilitate setting up of local manufacturing of Gigabyte's server products at Syrma's facility in Chennai and support India's ‘Make in India’ initiative. It will also help strengthen Giga Computing's supply chain presence in South Asia.

Syrma SGS is set to begin assembly of Gigabyte server motherboards at its Chennai

facility to meet India's growing IT hardware market demand. The Gigabyte Group said that initial production would include enterprise-grade boards such as the GIGABYTE MS73-HB0 and MZ33-AR1, delivering critical hardware for data centres and enterprise computing.

EXPANSION PLAN

The partnership will later expand to full box-build system

manufacturing with export capabilities, enabling Giga Computing to accelerate global delivery with greater efficiency and flexibility, the company said in a statement.

Syrma SGS' IT hardware manufacturing portfolio includes servers, notebooks and desktop motherboards, and system integration.

“India is one of the more dynamic and promising markets for computing infrastructure today, and local manufacturing is essential to supporting this growth,” said Andy Neo, Sales Director at Giga Computing. “Partnering with Syrma SGS gives us access to their proven expertise in high-quality electronics manufacturing, ensuring that our customers in India benefit from world-class motherboards and servers produced closer to home.”
