India's First Aadhar Enabled Housing Society: A boost to Digital India

Mumbai, January 9, 2017: Zicom SaaS Private Limited, wholly owned subsidiary of Zicom Electronic Security Systems Limited, pioneers of Electronic Security Services in India launches ***Aadhar Verification Service (AVS)*** for housing societies. Now plumbers, house maids, vendors and other domestic helpers entering the premises will be scanned and verified through *'Zicom Aadhar Verification'*.

For the first time ever in India, residents of housing societies and complexes can verify and identify the details of their domestic helpers as registered in their Aadhaar card. This service will help resident to quickly verify and identify the details of the person entering their premises for short term/ long term domestic service using the Aadhaar Card number and finger print impression. This service will provide authentic data which will help to restrict trespassers. Zicom the provider of this service is registered with Unique Identification Authority of India (UIDAI) through CDSL.

In a country gone digital, especially post demonetization, our day starts and ends with technology and gadgets. It would not be incorrect to say that technology and the digital world are our new 'oxygen'. So the question that really arises, is that while we use technology for all things big and small throughout the day, why is it that our personal safety is left to the mercy of a security guard? How is it that our housing societies and our loved ones have a single watchman to take care of them in our absence?

The residents of Lodha Bellissimo at Mahalakhsmi had the same concerns and questions. And rightly so, they decided to put all of these concerns to rest by subscribing to a service called Aadhar Verification Service (AVS) provided by Zicom.

Aadhar Verification, based on the UIDAI data registered with the government, helps to verify the identities of your domestic help like plumbers, house maids, painters, drivers, interior decorators and others when they enter the premises.

Once verified, the data is stored by Zicom and can be used in case there is a security breach. This service will also help the Mumbai Police, who have been insisting on registering your domestic help before employing them, in a big way.

Talking more about this unique safety tie-up, **Pramoud Rao, Managing Director**, explains "*At Zicom we are passionately working towards our initiative "Make Your City Safe" by offering 3 levels of security family, environmental and personal security backed by our 24 x 7 command centre services to make all citizens in every city safe and secure.*"

At present more than 4,500 housing societies in Mumbai and Pune are availing Zicom's managed security services and can now avail this additional service on monthly service charge.
