Dear Sirs,

Business Update

The Company has set up testing facility for Accelerator, Brake and Clutch Pedal Assembly at its premises to build its capacity.

Pursuant to regulations 30 of SEBI (Listing Obligations and Disclosures Requirements) Regulations, 2015 enclosed herewith the information about set up of testing facility.

This is for your information and necessary dissemination. Thanking you,

Yours truly,
For **Autoline Industries Limited**

Umesh Chavan (DIN 06908966)
Executive Director and CEO

"Adding one more golden feather to its wings"
-DURABILITY TESTING CHAMBER FOR ABC PEDAL ASSEMBLY-

Autoline Industries Ltd (AIL) is one of the major manufacturer of owned design pedals and Currently AIL is supplying pedals to renowned *Original Equipment Manufacturers (OEMs) which contribute more than 10% to its Top Line.*

Accelerator, brake & clutch (ABC) pedals are most important components in an automotive. Designing of ***ABC Pedal Assembly*** *plays a crucial role in enhancing driving comfort, safety & performance of the vehicle, it also gives felling of confidence and satisfaction to the Automobile manufacturers, OEMs directly or indirectly.*

AIL was dependent on one of the overseas resources for design validations. The Company had to send the pedals aboard for testing and this was extremely time consuming and costly.

A machine called Durability testing chamber, imported from US, was successfully installed and commissioned at the premises of the Company with the support of the Indian technicians. This will put AIL in the category of holding dominant position in Pedal Business in India and lead towards becoming the world leader in pedal business.

Brief about Durability Machine:

Durability testing chamber is used to conduct the pedal box assembly Life cycle test by subjecting the unit to environmental conditions of heat, cold and humidity during a load / deflection cycle. Results of Accelerator, Brake and Clutch are examined under extreme or typical operating conditions.

For continuous improvement in product quality and reliability, it was important to build this rare testing facility in-house. This will boost to AIL's commitment to convert their ***"Customers Satisfaction to Customers Delight"*** *by consistently striving hard and improving the Quality, Cost & Delivery of the product.*
