TWO-WHEELERS DRIVE ADOPTION

Registrations of EVs jump 84%; UP leads among states

SAURAV ANAND
New Delhi, October 11

STATES ARE INCREASINGLY shaping the pace and composition of India's electric vehicle (EV) adoption, with the top 10 markets accounting for nearly 73% of total EV registrations in September. However, demand patterns vary significantly across regions.

Southern states together accounted for 29% of EV registrations, compared with 23% for northern states. "However, the demand drivers differ significantly across the two regions," according to data from JMK Research based on the Vahan dashboard.

EV adoption in southern states is primarily driven by private ownership, with electric two-wheelers dominating registrations. In contrast, northern states have a higher share of electric three-wheelers, supported by their widespread use in commercial and last-mile mobility services.

Uttar Pradesh led state-wise registrations with 44,253 units, followed by Maharashtra at 39,108 and Karnataka at 28,606. Tamil Nadu ranked fourth with 27,192 units, while Madhya Pradesh recorded 19,279, Bihar 18,951 and Rajasthan 17,783. Kerala, Odisha and Delhi registered 16,159, 16,090 and 14,982 EVs, respectively.

"The top 10 states accounted for around 73% of India's total EV registrations in September 2026," the report said.

In terms of national market share, Uttar Pradesh accounted for 13.26% of EV registrations, followed by Maharashtra at 11.72%, Karnataka at 8.57% and Tamil Nadu at 8.15%. Karnataka remained the leading southern state and ranked third nationally.

JMK attributed its position to early EV policy initiatives, a strong manufacturing and startup ecosystem, extensive charging infrastructure and robust demand led by Bengaluru.

The widening state-level

GREEN SHIFT

State-wise Registered EV Sales (September 2026)

	Units Sold	Market Share
Uttar Pradesh	44,253	13.26%
Maharashtra	39,108	11.72%
Karnataka	28,606	8.57%
Tamil Nadu	27,192	8.15%
Rajasthan	17,783	5.33%
Madhya Pradesh	19,279	5.78%
Bihar	18,951	5.68%
Kerala	16,159	4.84%
Odisha	16,090	4.82%
Delhi	14,982	4.49%
West Bengal	13,503	4.05%
Telangana	13,198	3.96%
Andhra Pradesh	10,521	3.15%
Gujarat	12,677	3.80%
Assam	10,541	3.16%
Others	30,827	9.24%
Total	333,670	100%

Source: Vahan Dashboard, JMK Research

adoption coincided with a sharp rise in overall EV registrations. India recorded 333,670 EV registrations in September, up 12.04% month-on-month from 297,820 in August and 83.58% year-on-year from September 2025. Overall EV penetration reached 13.11%.

Electric two-wheelers remained the largest segment, accounting for 62.13% of total EV sales, followed by passenger electric three-wheelers at 22.25%. Electric cars accounted for 10.82%, while cargo electric three-wheelers made up 3.53%.

High-speed electric two-wheeler registrations rose 13% month-on-month and 91% year-on-year to 207,314 units in September. Penetration in the two-wheeler segment increased to 11.58% from 10.68% in August and has remained above 10% since June.

Rice exports may take a hit next year

SANDIP DAS
New Delhi, October 11

INDIA'S RICE EXPORTS next year are projected to decline by 4% to 24 million tonne (MT) in 2027 due to lower shipments of broken and white rice, the United States Department of Agriculture (USDA) said in a report.

The USDA's global market analysis attributed fall in India's rice exports, which has the biggest share of over 40% in the global grain trade, to rising prices amid lower exportable supplies.

"A strong El Niño weather pattern is causing bad monsoons, which is expected to drop India's rice production by 4.5% to 147 million tonne (MT) in the current crop year (2026-27)," Suraj Agarwal, co-founder & CEO, RiceVilla, a rice exporting and marketing firm,

SHIPMENT OUTLOOK WEAKENS

■ Rice exports projected to fall 4% to 24 MT in 2027

■ Output is seen declining 4.5% to 147 MT in 2026-27

■ USDA cuts 2027 global rice trade forecast by 1.3 MT

■ Rice prices at ₹46.92/kg, up 10% year-on-year

■ Sona Masoori, Ponni prices rise 10-25% YoY

toled FE. The rice production for 2026-27 crop year would be for the first time grain output is projected to reduce since the 2015-16 crop year. In the 2025-26 crop year, India emerged as the biggest rice-producing country at 154 MT. Agarwal said the USDA cutting global rice trade forecast for

next year by 1.3 MT, it would impact supplies and prices as India supplies 40% to 45% of the world's rice exports.

Shipment of grain rose marginally by 2.17% to \$4.81 billion during April-August, 2026-27 on year as supply disruption and high freight due to West Asia conflict continues to

impact shipments.

Sources said rising domestic prices of rice, on account of lower output, are expected to be impacted and are likely to slow down exports in the current fiscal.

The retail prices of rice increased to Rs 46.92/kg on Sunday, a 10% increase over the previous year. An official said the government currently holds over 38 MT of rice stock against a buffer requirement of 10.25 MT for October 1; this stock would be offloaded under the open market sale scheme to curb the price rise.

However, prices of premium non-basmati rice variants such as Sona Masoori, Ponni, and Swarna have increased by 10-25% compared to last year due to lower area under paddy and rainfall deficiency, especially in southern India.

NTPC seeking role beyond generation

SAURAV ANAND
New Delhi, October 11

STATE-RUN NTPC HAS invited commercial and industrial consumers to acquire a 26% equity stake in co-generation projects, opening up a new model under which large industries can partner with the country's largest power producer to secure long-term supplies of electricity and steam.

The company has invited Expressions of Interest (EOI) from commercial and industrial entities to develop co-generation facilities, as well as integrated power-supply solutions combining coal, renewable energy and battery energy storage systems (BESS).

Co-generation enables

industries to produce electricity and steam through an integrated system. The proposed arrangement aims to help industries enhance energy security, lower costs and secure a more sustainable power supply while improving overall energy efficiency. The move marks an expansion of NTPC's role beyond conventional electricity generation, as the utility seeks to work directly with industrial consumers to develop customised, long-term energy solutions. "The proposed initiative seeks to address the diverse requirements of industries with reliable, economical and sustainable energy solutions through long-term power supply arrangements," NTPC said.
