70% OF AUDIENCES WATCH ACROSS TV, OTT, SAYS HANSA STUDY

More Hybrid, Less Live: IPL Viewer Habits are Changing

Javed Farooqui

Mumbai: The Indian Premier League (IPL) is increasingly shifting from appointment television to a near-daily multi-platform viewing habit, with nearly 70% of audiences now consuming matches across both television and streaming platforms, according to a study by Hansa Research Group.

SHIFTING TREND Fans extend IPL engagement beyond live telecasts via catch-up, short-form content like YouTube highlights, reels

IPL viewing is increasingly resembling a daily habit rather than event-based consumption. The shift extends beyond live matches. Around 8.4% of respondents said they watched match highlights on YouTube, while 13.6% consumed IPL clips and reels on social media.

online panel survey conducted through Hansa Research. The study covered 4,200 respondents during the first six weeks of IPL 2025, comprising male and female audiences aged 15 years and above from NCS A/B households across 16 markets, including metros as well as Tier 1 and Tier 2 cities.

Prasad Pawar, vice president, Quantitative Research at Hansa Research Group, said a double-digit decline in television viewership among core male audiences during the first six weeks of IPL 2025 reflected a mix of scheduling fatigue, changing viewing behaviour and weaker audience pull factors.

He attributed this to the tournament's prolonged format, overlap with other cricket properties including the T20 World Cup and bilateral series, and growing migration of younger urban audiences toward mobile streaming, connected TVs and highlight-led viewing.

HC Upholds Temporary Curbs on Dabur Hair Oil in Emami 'Trade Dress' Case

Indu Bhan

New Delhi: The Delhi High Court on Friday dismissed Dabur India's appeal against a single judge's January order restraining it from selling 'Cool King Thanda Tel' hair oil, another oil similar to Emami's 'Navratna Ayurvedic Oil'.

The restraint order will remain in force until the apex court decides the permanent injunction suit filed by Emami.

A Division Bench of Justices V Kameswar Rao and Manmeet Pritham Singh Arora said Dabur had been rightly restrained from causing the trade dress of its product, including the layout and colour scheme, to be deceptively similar to Emami's product and was likely to mislead consumers, amounting to passing off.

Kerala HC Stays 'Landing Page View' Omission in New TV Ratings Policy

Javed Farooqui

Mumbai: The Kerala High Court on Friday stayed a key provision of the Centre's new TV ratings policy that excludes "landing page" views from Television Rating Points (TRP), giving interim relief to cable operators who argue the move threatens a crucial source of revenue.

Landings pages are default web pages on TV channels monetised by cable operators via carriage agreements

The High Court, pending Supreme Court proceedings while granting interim relief, "is only appropriate that the respondents herein be directed not to implement the proviso to Clause 5.4.1 of the TV Rating Policy of 2026 without getting further orders from the court," the court said.

Cable operators, however, have argued that the policy unfairly ignores genuine consumer behaviour. In their petition, they said the blanket exclusion of landing page viewership treats actual viewing as "zero viewership" and could severely hurt the cable television business at a time when it faces growing competition from OTT platforms and social media.

A key argument in the case is that the issue of landing pages is already pending before the Supreme Court, where restrictions on landing pages remain under challenge. According to the apex court had earlier restrained the enforcement of landing page regulations while the matter remains pending. The High Court, pending Supreme Court proceedings while granting interim relief, "is only appropriate that the respondents herein be directed not to implement the proviso to Clause 5.4.1 of the TV Rating Policy of 2026 without getting further orders from the court," the court said.

Tata Projects Gets Godrej Properties' ₹1,100-cr Contract

New Delhi: Godrej Properties has awarded a ₹1,100 crore contract to Tata Projects for construction of its three-hour projects in Gurugram.

day, the company said it has entered into a partnership with Tata Projects for three of its luxury housing projects along Golf Course Road, Gurugram. Tata Projects has

been awarded contracts for the core and shell construction works across two upcoming projects—Godrej Sora, Godrej Astra, and Godrej Samaris. "The combined

contract value stands at approximately ₹1,100 crore," the company said. Godrej Properties is one of the leading real estate developers in the country.—PTI

West Asia Conflict, Weak Rupee Slow Hiring of Sr Execs

Cos focus on critical hires, scale back growth mandates

Sreerada Basu

Bengaluru: India's executive search market is beginning to slow as the continuing West Asia conflict, inflation concerns, a weaker rupee and a more corporate sentiment weigh on hiring decisions.

Search firms said several clients have shifted their watch approach amid rising input costs, supply chain concerns and the prospect of price hikes across sectors. Consumer-facing industries, particularly FMCG, retail, consumer durables and real estate, have seen senior-level hiring moderate.

Overall, companies are prioritising critical and replacement hires while scaling back on growth mandates. "The overall market is slightly sluggish... and we are definitely seeing an impact on the consumer side given the rise in input costs and demand compression," said Shiv Agrawal, managing director at search and talent advisory firm ABC Consultants.

According to Agamjeet Dang, CEO of executive search firm Executive Access, companies are focusing on controlling costs. "Companies are taking time to make their decisions. In the long-term story, there will be no impact, but in the short to medium term, there is a focus on ensuring that costs don't balloon."

Most companies are proceeding only with critical hires, while growth-oriented recruitment has slowed, he said. Replacement hiring has weakened as well.

"In a market like this, many candidates start developing cold feet. The replacement market itself goes down; there are fewer positions to fill," he added. Industry executives said Prime Minister Narendra Modi's appeal for austerity had reinforced concerns over the economic impact of the West Asia conflict, leading companies to reassess near-term business assumptions. With several IPO plans being deferred, growth expectations flattening and candidates becoming increasingly hesitant to switch jobs, industry executives said the current quarter would determine whether the slowdown remains temporary or broadens further.

er mainly to fill the gap left by private-sector auto LPG providers. Direct LPG imports by private players also dropped 44% to 9.5 TMT in April. Northern India has traditional, where supplies plunged 82% year-on-year to 1.9 TMT, forcing many users to shift to alternatives such as fuel oil and natural gas. For much of last year, factories had increasingly turned to LPG because its prices tracked softer than crude oil prices, prompting a rapid shift away from relatively expensive natural gas. State oil companies increased supplies to LPG-powered vehicles by 38% to 10.8 TMT in April from year earlier.

LPG Sales Dip 10-11% in April as Hormuz Closure Chokes Supplies

Sanjeev Choudhary

New Delhi: Households recorded 1% less LPG in April compared with a year earlier, while sales of commercial cylinders fell 10% as the near closure of the Strait of Hormuz choked fuel imports.

State oil companies sold 1,982 thousand metric tonnes (TMT) of LPG in April to households, down from 2,295 TMT in the corresponding period a year earlier, according to oil ministry data. Sales of commercial cylinders, used mainly by categories, offices, industrial centres and educational institutions and hospitals, fell to 187 TMT in April from 208.5 TMT. The sharpest impact of the LPG shortage was in northern India, where supplies plunged 82% year-on-year to 1.9 TMT, forcing many users to shift to alternatives such as fuel oil and natural gas. For much of last year, factories had increasingly turned to LPG because its prices tracked softer than crude oil prices, prompting a rapid shift away from relatively expensive natural gas. State oil companies increased supplies to LPG-powered vehicles by 38% to 10.8 TMT in April from year earlier.

Hybrid Viewing Now Accounts for 70% of IPL Audience: Study

Javed Farooqui

Mumbai: The Indian Premier League (IPL) is increasingly shifting from appointment television to a near-daily multi-platform viewing habit, with nearly 70% of audiences now consuming matches across both television and streaming platforms, according to a study by Hansa Research Group.

The findings point to a structural change in how audiences engage with cricket's biggest property. Exclusive television viewing has sharply declined, while hybrid viewing across TV and OTT has become dominant.

Only 18.9% of respondents said they watched IPL solely on television. In contrast, 38.2% mainly watched on TV while supplementing their consumption on OTT platforms, while another 31.1% primarily watched through streaming and occasionally tuned into television.

The shift also reflects the growing frequency of engagement. Around 41.1% of respondents said they watched seven or more IPL matches a week, while another 29.7% watched six to seven games, taking average weekly consumption to

6.12 matches. The findings suggest IPL viewing is increasingly resembling a daily habit, with nearly 70% of audiences now consuming matches across both television and streaming platforms, according to a study by Hansa Research Group.

Shift in Hiring Strategies

From Page 1

Poorvi Chothani, immigration attorney and managing partner at LawQuest, said companies focused on registering students in the United States (on F1 visas). Also, some employees on L-1B (intra-company transferees with specialised knowledge) were transferred to H-1B since it allowed them to file for green cards and avail of additional H-1B extensions at a later stage. "This number was not significant but there was a noticeable increase in these cases," she said.

USCIS had clarified last year that the \$100,000 fee will not apply to petitioners already in the US on a valid visa, be it F or L-1.

Gnanamookan Senthurjothi, immigration attorney at The Visa Code, noted that FY27 saw a structural shift away from traditional entry-level hiring that included many bachelor's

degree candidates to favouring advanced degree applications with higher wages. "This has forced many consulting and staffing firms to rethink recruitment strategies," he said.

This is also coming at the time of declining entry-level jobs in the US amid rapid artificial intelligence adoption, geopolitical uncertainty and slower business growth. According to a March report from the World Economic Forum citing data from Revelo Labs, entry-level jobs in the US have fallen by 35% in part due to AI.

More intentional hiring is also being seen. Shilpa Malik, managing attorney at VisaNation Law Group, said the H-1B lottery was no longer a numbers game. "It is evolving into a narrow, high-stakes filter for senior and specialised talent," she said. "For us, every case now demands a much deeper up-

front analysis of wage positioning, role justification, and long-term strategy, which were conversations we would previously have had at the petition stage and happening before a single registration is filed."

Joel Yanovich, senior attorney at Gates Law Group, had earlier told ET that compared to previous years, when compensation was used by employers to verify a qualifying role, it now directly dictates their lottery odds. "The process has become significantly more cumbersome and costly," he said.

In March, the US labour department proposed a rule to increase wages for H-1B workers by 20-30% across wage levels. While this is still in the proposal stage awaiting comments, these could further impact the applications, experts noted.

While these moves will reduce the number of applications, the US is still one of the favoured destinations for Indians. "But the scrutiny will increase for H-1B in terms of wage evaluation," Senthurjothi of The Visa Code said.

Sandhya Bridge ready, remains shut

Lack Of RMC Body Delays Inauguration

Nimesh.Khakharia
@timesofindia.com

Rajkot: The newly built four-lane Jamnagar Road railway overbridge, popularly known as Sandhya Bridge, is ready for use but remains closed as the Rajkot Municipal Corporation (RMC) has not yet announced its inauguration ceremony.

The old two-lane bridge was torn down and replaced with the new structure at a cost of Rs 73.22 crore. The bridge has been shut since May 2024, forcing an estimated 1.5 lakh daily commuters to take narrow detours through the Bhomeshwar area. During peak hours, motorists face heavy traffic congestion and long waits at railway crossings because of the closure. Although construction was completed days ago, the bridge has not been opened to the public.

Cost ₹74.32Cr

- Four-lane flyover on Jamnagar Road
- 7.5m-wide service roads on both sides
- Length: 602m
- Width: 16.40m
- Benefits: 1.5 lakh daily commuters to benefit from easing of congestion on Jamnagar Road

Opposition parties demanded immediate opening of the bridge, citing the hardships of commuters. To prevent premature use, authorities have blocked the entry with a mud wall and deployed police personnel at the site. The RMC has also installed an empty inauguration plaque, reportedly pending confirmation of the names of the honorees. According to sources, the civic body plans to invite chief minister Bhupendra Patel to inaugurate the bridge alongside other projects once the new RMC team is announced.

Reports suggest the names of the new office-bearers are likely to be declared from Gandhinagar next week. The local body election results were declared on April 28. In-charge municipal commissioner Anand Suresh Govind said, "Finishing work on the bridge is underway, which may take three or four days. We plan to open the bridge as soon as possible."

Bootlegger arrested

Vadodra: The detection of crime branch (DCB) has arrested notorious bootlegger Chandan Khanani alias Lahu Sindhi, wanted under the Gujarat Control of Terrorism and Organised Crime (GujCTOC) Act, of a tip-off in Madasa of Aravalli district.

DCB officials said Sindhi was intercepted while travelling in a car and taken into custody. He is facing cases under the Prohibition Act in addition to charges under the GujCTOC Act.

Police said Sindhi has more than 80 offences registered against him, including cases of murder, assault and extortion. He has also been detained seven times under the Prevention of Anti-Social Activities Act (PASA), officials said.

GujCTOC invoked against burglar gang

Rajkot: Police in Surendranagar district have invoked the Gujarat Control of Terrorism and Organised Crime (GujCTOC) Act against an alleged gang of burglars accused of carrying out organized property crimes across the region, officials said on Friday.

A case was registered at Surendranagar City A Division police station. Three accused — Jayanti Sarvaiya, Shakti alias Lalo Tharesha and Bhola Sarvaiya — have been arrested. Two other alleged gang members, Rakesh Sarvaiya and Rajul Sarvaiya, are absconding, and police have launched a search.

According to Surendranagar district police, the investigation found that the group systematically carried out burglaries and other property-related offences across the district. Citing the organized nature of the crimes and the accused's criminal history, police decided to invoke the GujCTOC Act.

Police said Jayanti Sarvaiya faces four cases in Surendranagar, Bhavnagar and Botad districts, including offences under the Arms Act and burglary cases. Shakti alias Lalo Tharesha has also four cases in Surendranagar district related to burglary and Arms Act violations.

Police said Jayanti Sarvaiya faces four cases in Surendranagar, Bhavnagar and Botad districts, including offences under the Arms Act and burglary cases. Shakti alias Lalo Tharesha has also four cases in Surendranagar district related to burglary and Arms Act violations.

Conspiracy case filed for forest scam

Nimesh.Khakharia
@timesofindia.com

Rajkot: Police added charges under the Bharatiya Nyaya Sanhita (BNS) against the five persons — including two forest department employees — for the large-scale illegal felling of trees in a protected forest in Bhavnagar district that forms part of a key lion corridor.

The accused were earlier booked under the Indian Forest Act and the Wildlife (Protection) Act for allegedly cutting down 1,700 trees from the Nani Rajasthali vidi (reserved forest). Police have added charges of criminal trespass, criminal breach of trust, criminal conspiracy and related offences.

The offences were registered after senior forest officials detected a major irregularity in the protected forest, which also serves as a habitat for lions and other wild animals such as leopards, chinkara, chital and nilgai.

An FIR has been registered at Paltana Rural police station on a complaint by Paal Joshi, the range forest officer of Paltana. The FIR names forest department employees and private individuals accused of conspiring for illegal financial gain.

The prime accused are forest guard Karshan Gohil and forest guard Kalpesh Dabhi, who misused their positions to facilitate the illegal activity. The others are Budha Chohan, a truck operator; Asif Shah, a truck driver; and Mukesh Bambhaniya, a timber agent.

Gohil and Dabhi were arrested earlier by forest officials and are in judicial custody. Chohan and Shah were not arrested by the forest department, while Bambhaniya's role surfaced later during the investigation.

According to the FIR, the illegal activity took place between April 15 and May 9. The accused allowed unauthorised entry into the forest, felled 1,690 trees and transported the timber using a truck and an earthmover.

Paltana Rural police registered the case under BNS Sections 329(3), 316(5), 240, 238(b), 61(2) and 54.

Police said the absconding duo had been pressuring the minor's father and his brother (the deceased) to settle the Pocco case.

Rajkot DSP Vijaysingh Gurjar has formed a special squad headed by ASP Simran Bhardwaj to nab the duo in both the murder and rape cases.

Mahendrasinh and Yashpalisinh wanted to 'settle the case', but the rape survivor's uncle refused. On the night of May 20, he was hacked to death, allegedly by the duo at Khakhadabala village.

Investigators suspect that the aunt had an illicit relationship with one of the accused, which the girl came to know. The minor was allegedly raped and her aunt was booked for abetment of the crime.

Police said the absconding duo had been pressuring the minor's father and his brother (the deceased) to settle the Pocco case.

Rajkot DSP Vijaysingh Gurjar has formed a special squad headed by ASP Simran Bhardwaj to nab the duo in both the murder and rape cases.

2PIs, 2PSIs suspended after murder by Pocco case accused

Times News Network

Rajkot: Four policemen, including the case investigation officer, have been suspended by Rajkot range inspector general of police (IGP) Nirjit Rai over the murder of a rape survivor's uncle by two men who are still evading arrest in the same sexual assault case.

All four cops were posted with Rajkot Rural police. The suspended officers are inspector and IO of Pocco case H N Rathod, then station house officer police inspector S N Parmar, sub-inspector J V Jala, and assistant sub-inspector Bhagirathsinh Jadia.

A special team of more than 100 personnel has been

formed to trace and arrest the absconding assailants who were earlier booked for the minor's rape.

Speaking to TOI, Rai said, "I ordered the suspension of four policemen for negligence. The men accused of raping the minor remained at large for a long time and returned to the same jurisdiction of Paltana police station to commit another serious crime. The duo continue to evade arrest."

In April 2024, a complaint of rape under Pocco was lodged at Padadhari police station, naming Mahendrasinh Jadia, Yashpalisinh Jadia, Ajaysinh Jadia and the survivor's aunt. Ajaysinh is in judicial custody, while the aunt

has been released on bail. Mahendrasinh and Yashpalisinh wanted to 'settle the case', but the rape survivor's uncle refused. On the night of May 20, he was hacked to death, allegedly by the duo at Khakhadabala village.

Investigators suspect that the aunt had an illicit relationship with one of the accused, which the girl came to know. The minor was allegedly raped and her aunt was booked for abetment of the crime.

Police said the absconding duo had been pressuring the minor's father and his brother (the deceased) to settle the Pocco case.

Rajkot DSP Vijaysingh Gurjar has formed a special squad headed by ASP Simran Bhardwaj to nab the duo in both the murder and rape cases.

Khoraj set to become space tech manufacturing hub

Parth Shastri
@timesofindia.com

Ahmedabad: The Centre's Department of Space (DoS) cleared the way for clusters manufacturing space tech equipment and testing facilities in Gujarat and Tamil Nadu.

In a two-pronged approach, the state govt allocated land parcels dedicated to space-related manufacturing, whereas the Indian National Space Promotion and Authorization Centre (IN-SPACe) was roped in to establish associated common technical facilities (CTFs), senior officials said.

In Gujarat, the manufacturing cluster will come up at Khoraj near Ahmedabad and is envisioned as "plug-and-play" for the industry. According to officials, the cluster will focus on spacecraft, payload systems, and space-based applications. The site is in the vicinity of key industrial clusters focused on the automotive and semiconductor sectors. The CTFs will be established

within these manufacturing clusters, added officials.

According to a release, IN-SPACe chairman, Pawan Kumar Goenka, said that setting up CTFs featuring capital-intensive systems marks a critical step in creating a robust, industry-led space ecosystem in India. "The private space industries including startups, MSMEs and large industries will be able to access these facilities without having to invest in a similar facility on their own premises," he said.

Officials said IN-SPACe will play a key role in procuring, installing, and commissioning the technical infrastructure, operating the facility for a specified period, and later handing it over to the respective state govt. They added that it will also assist the states in planning and developing the dedicated manufacturing clusters.

Rajesh Jyoti, director (TD) at IN-SPACe, told TOI that it is a major step in establishing a space technology cluster in India.

"The cluster will be for the companies working in manufacturing of various components required for the space tech. These companies require large-scale testing facilities which will be provided by IN-SPACe. Currently at the IN-SPACe facility in Ahmedabad, about 40-odd startups and companies are using the technical facilities," said Jyoti.

M K Das, Gujarat chief secretary, said in the release that the cluster was not merely an infrastructure project. "The park equipped with curated state-of-the-art common facilities will be a strategic enabler for rapid growth of space tech manufacturing," he said.

Founders of space tech startups in Ahmedabad said the city is poised to become a major space technology hub in India, driven by the presence of SAC-ISRO and leading research institutions such as the Institute of Plasma Research and the Physical Research Laboratory.

Notes : (1) The results were reviewed by the audit committee and taken on record by the Board of Directors at its meeting held on 21st May, 2026. The Statutory auditor have expressed an unqualified audit opinion on these standalone and consolidated financial results for the year ended 31st March, 2026. The above financial results have been prepared in accordance with the guidelines issued by the Securities and Exchange Board of India (SEBI) and the Indian Accounting Standard (IndAS) prescribed under Section 133 of the Companies Act, 2013. (2) The Board of Directors has declared second interim dividend of INR 1.50 per equity share (i.e. 75% for the financial year 2025-26). (3) The Board of Directors of the Company at its meeting held on 8th January, 2026 approved the Composite Scheme of Arrangement (Scheme), between Indianna Learning Private Limited (ILPL) and Navneet Education Limited (NEL) and their respective shareholders for demerging 'Publishing Business' of ILPL into NEL. The Scheme is subject to requisite approvals as may be required from Honourable L1, Mumbai Bench. Pending receipt of the approval, no impact has been given in the financial results. Further, in accordance with the legal advice/opinion received by the company, the financial results are being approved by the Audit Committee and Board of Directors in their meeting held on 21st May 2026. The financial statements would be approved separately. (4) The above is an extract of the detailed form of Financial Results for the quarter and year ended 31st March, 2026 filed with the Stock Exchanges under Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. The full form of Financial Result is available on www.navneet.com and Stock Exchange websites www.bseindia.com and www.nseindia.com. The same can be accessed by scanning the QR Code provided below.
