PRESS RELEASE

Nucleus for India | Synapse 2025 Unveils India's AI-Defined Banking Blueprint and Announces Global Release of FinnOne Neo® GA 8.5

Noida, December 18, 2025: India's standing as a global financial technology powerhouse received a strong reaffirmation as Nucleus Software convened senior leaders from banking, fintech, NBFCs, FIs and the technology ecosystem at Nucleus for India | Synapse 2025 in Mumbai.

The forum explored how AI is rapidly becoming the defining operating layer of modern financial institutions, reshaping decision-making, risk intelligence, customer experience, and digital growth models. The conclave also marked a major milestone for the company with the global launch of FinnOne Neo® GA 8.5, the newest generation of its flagship digital lending platform.

The evening opened with a forward-looking conversation on the technologies set to influence competitive advantage through 2026 and beyond. A keynote address by Lt. Gen (Retd.) Sanjay Kulkarni brought an unexpected and powerful dimension to the dialogue-drawing parallels between leadership in high-stakes environments and leadership through rapid technological disruption.

Speaking at the event, Vishnu R. Dusad, Co-founder & Managing Director, said: *"India is actively shaping global fintech innovation. Our digital public infrastructure has laid one of the strongest foundations in the world for AI-led transformation. The institutions that will lead the next decade will be those that combine technology with purpose, responsibility, and trust."*

A Strategic Highlight: The Global Launch of FinnOne Neo® GA 8.5

One of the most anticipated moments of Synapse 2025 was the announcement of FinnOne Neo® GA 8.5, representing a significant step forward in Nucleus Software's lending innovation journey.

Positioned as a future-ready platform for digital lending, GA 8.5 strengthens compliance readiness, accelerates digital onboarding and credit decisioning, and enhances the ability of financial institutions to scale across multiple markets. The release brings improvements across performance, security, automation, and ecosystem integration-designed to support institutions operating in India, Southeast Asia, the Middle East, and Australia.

AI-Defined Banking – Insights from the Leadership Dialogue

The signature industry discussion, "What Will Winning Institutions Look Like in 2030?", moderated by Parag Bhise, CEO & Executive Director, examined how AI will influence the future shape of banks and lenders.

Leaders agreed that AI will soon become the *enterprise fabric* guiding decisions across credit, risk, fraud prevention, operations, and customer engagement. Institutions that invest early in data, governance, and intelligent automation are expected to gain disproportionate advantage, while hesitation or slow adoption could widen competitive gaps.

Commenting on the strategic significance of the moment, Parag Bhise, CEO & Executive Director added:

“Synapse 2025 brings leaders together to reimagine what the future could look like. With FinnOne Neo® GA 8.5, we strengthen our commitment to enabling institutions with the intelligence, resilience, and agility required to succeed in an AI-first world.”

Nucleus for India | Synapse 2025 underscored Nucleus Software’s commitment to building platforms that are intelligent, secure, scalable, and globally ready. As India accelerates toward becoming one of the world’s most trusted AI-enabled financial ecosystems, the company continues to invest in technology that strengthens the digital infrastructure of banking across continents.

About Nucleus Software

Nucleus Software Exports Ltd. Is a publicly traded (BSE: 531209, NSE: NUCLEUS), software product company that provides lending and transaction banking products to global financial leaders.

Nucleus Software delivers disruptive Fintech Solutions to 200+ Banks and Financial Institutions across 50 countries supporting Retail Lending, Corporate & SME Finance, Islamic Finance, Automotive Finance, Captive Automotive Finance, Cash Management, Mobile & Internet Banking, Transaction Banking and more. Our solutions manage over \$15 trillion value of yearly transactions, with over 26 million transactions each day through our globally integrated transaction banking platform. Our lending platform manages \$1.2 trillion+ value of loans globally, while enabling 500,000+ users to log in daily.

Our Flagship Products **FinnOne Neo®** and **FinnAxia®** are backed by more than 4 decades of BFSI domain expertise and an inbuilt AI powered platform to realize the digital transformation goals of FIs worldwide.

1. **FinnOne Neo®**: The next-generation **digital lending platform**, designed to revolutionize the lending process. FinnOne Neo® is built on an advanced technology platform, empowering financial institutions to streamline their lending operations, enhance customer experiences, and drive business growth.
2. **FinnAxia®**: An integrated **global transaction banking suite**, trusted by banks worldwide to optimize their transaction banking processes. With FinnAxia®, financial institutions can efficiently manage their cash management, trade finance, liquidity management, and other transaction banking activities on a single platform, thereby improving operational efficiency, visibility, and enhancing client relationships.

3. **PaySe®**: The world's first **online and offline digital payment solution**, created with the vision to democratize money. This innovative payment solution offers users a seamless and convenient way to conduct digital transactions, both online and offline, facilitating financial inclusion and empowering individuals and businesses.
4. **Nucleus Software Digital Services**: Our comprehensive suite of services is tailored to assist banks and financial institutions in their digital transformation journey and maintain an optimal technology infrastructure. Through Nucleus Software Digital Services, we offer a holistic approach to digital transformation, enabling organizations to deliver seamless customer experiences, achieve operational and cost efficiencies, and gain actionable insights to drive strategic decision-making.

These offerings collectively underline Nucleus Software's commitment to driving innovation and empowering financial institutions to thrive in an increasingly digital world.
