ORACLE® Press Release

Oracle Financial Services Revenue Management and Billing Running with Oracle Exadata Database Machine Delivers Extreme Performance

SIBOS, TORONTO – Sept. 19, 2011

News Facts

- Oracle today released the results of performance tests demonstrating that [Oracle Financial Services Revenue Management and Billing 2.2](#) running with [Oracle Exadata Database Machine X2-2](#) can deliver unprecedented performance and scalability for financial services organizations seeking to implement real-time relationship pricing, consolidate multiple billing engines within business divisions, rapidly process large transaction volumes and render bills faster, whether online or in printed form to customers.
- Oracle Financial Services Revenue Management and Billing running on a full rack Oracle Exadata Database Machine processed more than 1 billion transactions in under five hours and 100 million monthly invoices in 13 hours.
- To process and prepare bills, the application needs to validate, map, aggregate and price the financial transactions sourced from various systems according to the contract with the customer. In the test, a billion transactions were validated, mapped and aggregated into 200 million transaction groups. These groups were then priced into billable charges. Running on Oracle Exadata Database Machine, the application priced 9,523 billable charges per second, enabling financial services organizations to process pricing requests for 100 million accounts in six hours. Ultimately 100 million bills can be generated in a single monthly run using a 13 hour batch window.
- The solution, engineered on Oracle technology, provides the scalability and processing power that financial services organizations require to implement a reliable processing platform, deliver invoices on time and help manage revenues by product line.

Supporting Quote

- "The results from the performance tests of Oracle Financial Services Revenue Management and Billing running with Oracle Exadata Database Machine open new customer service and relationship possibilities for financial service organizations of all sizes. Now banks can certainly enjoy the upside of the revenue and lower revenue leakages," said Ashwin Goyal, group vice president, Oracle Financial Services. "Leveraging the highly scalable billing appliance, banks can confidently consolidate and support advanced, personalized billing that takes into account all of a customer's activity across products, regions and billing cycles."

About Oracle Exadata

The Oracle Exadata Database Machine is the only database machine that provides extreme performance for both data warehousing and online transaction processing (OLTP) applications, making it the ideal platform for consolidating onto grids or private clouds. It is a complete package of servers, storage, networking and software that is massively scalable, secure and redundant. With Oracle Exadata Database Machine, customers can reduce IT costs through consolidation, manage more data on multiple compression tiers, improve performance of all applications, and make better business decisions in real time.

ORACLE® Press Release

Oracle Receives SWIFTReady Payment Label 2011

Oracle FLEXCUBE Universal Banking Demonstrates Support for SWIFT Standards and Integrates Efficiently in SWIFT Environment to Support Traffic Automation and Straight-through-Processing Initiatives

SIBOS, TORONTO – Sept. 19, 2011

News Facts

- At the financial services industry's premier global conference, Oracle today announced that [Oracle FLEXCUBE Universal Banking 11.2.0](#) has received the SWIFTReady Payment Label 2011.
- The SWIFTReady label identifies products that demonstrate compliance with [SWIFT](#) standards, messaging services, and connectivity; integrate efficiently in the SWIFT environment; increase traffic automation; and support straight-through processing (STP).
- [SWIFT](#), which supplies secure messaging services and interface software to wholesale financial entities, runs an annual program for determining the SWIFT-compliance of third-party software applications for the financial services sector. The SWIFTReady label program helps to foster solutions that are compliant with the business and technical requirements of the financial industry and enable more efficient transaction processing.

Supporting Quote

- "The SWIFTReady Payment Label 2011 assures our customers and prospects that Oracle FLEXCUBE Universal Banking supports the latest SWIFT payments standards and can easily integrate with the SWIFT environment. Oracle's longstanding relationship with SWIFT demonstrates our commitment to adhering to industry standards as we develop market-leading solutions that help financial services organizations address their most pressing business challenges," said Chet Kamat, group vice president and general manager, Oracle Financial Services.

Oracle Announces New Release of Oracle Financial Services Basel II that Enables Banks to Meet Islamic Financial Services Board Guidelines for Capital Adequacy

Leading Application Supports Financial Services Institutions in Meeting Regulatory Capital Requirements Around the Globe

SIBOS, TORONTO – Sept. 19, 2011

News Facts

- Oracle today announced the new update of its leading Basel II application that provides open, quick, out-of-the-box compliance with Basel II guidelines in multiple jurisdictions, while enabling strategic decision making and capital planning with the extensibility to meet future regulatory requirements.
- With this new release, Oracle Financial Services Basel II now supports the capital adequacy compliance requirements for Islamic banking products based on Sharia law. The Islamic Financial Services Board (IFSB) provides guidance on how to apply Basel II regulations for banks offering Islamic banking products.
- Using Oracle Financial Services Basel II, Islamic banks and financial services institutions offering Islamic banking products can facilitate compliance with IFSB guidelines and standardize their approach to identifying and measuring risk-based capital under Basel II.
- The easy-to-deploy application fully covers the IFSB regulations on computation and disclosure. Fully transparent and auditable, Oracle Financial Services Basel II eases supervisory review.
- Oracle Financial Services Basel II enables regulatory capital computation at granular and aggregated levels and the new attribution analysis capability provides an in-depth understanding of cross-time changes in risk weighted assets (RWA) and capital adequacy ratios (CAR).
- With Oracle Financial Services Basel II, banks can simultaneously apply different capital adequacy approaches against different portfolios enabling institutions to carry out impact analysis of alternate options/approaches available to them under jurisdiction-specific guidelines. This allows for the selection of the best set of options/approaches for their specific capital adequacy strategies.
- Oracle Financial Services Basel II is fully engineered to work with existing Oracle Financial Services Analytical Applications, and integrates easily with other third-party solutions, enabling customers to further leverage their current IT investments.

Supporting Quote

- "As Islamic banking operations scale and expand into new geographies, there is an urgent need to reconcile their approach to risk and capital adequacy with Basel and other global regulatory standards," said S. Ramakrishnan, group vice president and general manager, Oracle Financial Services Analytical Applications. "Oracle supports the emerging analytical requirements of Islamic banking institutions with easy-to-deploy and comprehensive solutions, such as the newest release of Oracle Financial Services Basel II, which facilitates compliance with IFSB capital adequacy guidelines and Basel II."
