Yours faithfully,

For Opto Circuits (India) Limited.,

Authorized Signatory.

Encl: a/a.

Eurocor Tech GmbH launches innovative long-length sizes further optimizing its peripheral Drug Coated Balloon system Freeway™ 035

Bonn, Germany Jan. 18, 2021 – Eurocor Tech GmbH, an international leader in vascular devices, such as stents and Drug Coated Balloons (DCB) technology, and related services and solutions, announces the start of the commercial sale of Freeway™ 035 long-length DCBs. With the introduction of CE marked 190mm and 230mm catheters, Eurocor Tech GmbH is one of the only companies world-wide to cater to the specific needs of patients and physicians faced with treatment of challenging long lesions.

Vivek Ramnani, Managing Director of Eurocor GmbH, commented: “We are very excited about the launch of Freeway™ 035 long length catheters. An ever-growing number of patients worldwide suffer from vascular diseases, most prominently seen in the peripheral area. Moreover, this development also indicates a growing number of patients in critical stages. While DCBs have proven to be an excellent and in most cases the preferred treatment option, it is vitally important to continuously update technologies to optimally treat this high-risk patient group. Hence, we are proud to offer physicians an exciting new opportunity to improve and ease the treatment of patients with some of the most challenging lesions faced by physicians with a minimally invasive intervention.

About Eurocor Tech GmbH

Eurocor is a rapidly growing European Life Sciences Technology Corporation specializing in the research, development and manufacture of cardiovascular and endovascular products. Eurocor provides interventional physicians with innovative coronary stent technologies and special cardiovascular and endovascular devices, manufactured in Europe. Products are indicated for minimally invasive cardiovascular and peripheral
