Dear Sir,

Subject : Press Release

We would like to inform you that Company's wholly owned US subsidiary Cardiac Science Corporation, a global leader in automated external defibrillator (AED) and diagnostic cardiac monitoring devices, has been awarded a contract to deploy Powerheart AEDs in all Tyco Flow Control facilities globally. Tyco Flow Control is a $3.4B division of Tyco International. The first phase of the rollout, planned for the first quarter of 2011, will equip Tyco's Australian, Pacific, and North and South American facilities.

We are enclosing herewith the press release in this regard.

Thanking you,

Yours faithfully.
for OPTO CIRCUITS (INDIA) LTD.,

Authorised Signatory.

Press Release

Opto Circuits' US subsidiary Cardiac Science awarded Global AED Contract by Tyco Division
Cardiac Science AEDs will protect Tyco facilities worldwide

February 2, 2011 | Bothell, WA | Bengaluru, India

The wholly-owned subsidiary of Opto Circuits India, Cardiac Science Corporation, a global leader in automated external defibrillator (AED) and diagnostic cardiac monitoring devices, has been awarded a contract to deploy Powerheart AEDs in all Tyco Flow Control facilities globally. Tyco Flow Control is a $3.4B division of Tyco International. The first phase of the rollout, planned for the first quarter of 2011, will equip Tyco's Australian, Pacific, and North and South American facilities.

"We are proud to have been selected for Tyco's 'Save a Life' program and look forward to protecting their employees against sudden cardiac arrest," said Dave Marver, Chief Executive Officer, Cardiac Science. "Tyco's decision reinforces our status as a global leader in AED technology and services."

"We wanted a fully automatic defibrillator that did not require the user to push a button for shock delivery and an AED that customizes the energy level for each patient," said Ralf Schnörringer, director of Environmental Health and Safety for Tyco Flow Control. "Cardiac Science's ability to deliver a globally standardized product and AED program management throughout the world made them our first choice for the 'Save a Life' initiative at Tyco Flow Control."

About Cardiac Science

Cardiac Science, a wholly owned subsidiary of Opto Circuits (India) Ltd., develops, manufactures, and markets a family of advanced diagnostic and therapeutic cardiology devices and systems, including automated external defibrillators (AED), electrocardiograph devices (ECG/EKG), cardiac stress treadmill and systems, PC-based diagnostic workstations, Holter monitoring systems, hospital defibrillators, vital signs monitors, cardiac rehabilitation telemetry systems, and cardiology data management systems (informatics) that connect with hospital information (HIS), electronic medical record (EMR), and other information systems. The company sells a variety of related products and consumables and provides a portfolio of training, maintenance, and support services. Cardiac Science, the successor to the cardiac businesses that established the trusted Burdick®, HeartCentrix®, Powerheart®, and Quinton® brands, is headquartered in Bothell, Washington. With customers in almost 100 countries worldwide, the company has operations in North America, Europe, and Asia.
