Opto Circuits (India) Limited

Opto Circuits' new subsidiary Cardiac Science Introduces the Next Generation of Burdick ECG Devices

The Burdick ECG 8000 Series is feature-rich, easier to use, and EMR ready

Dec. 10, 2010 | Bengaluru, Karnataka, India; Bothell, Washington, USA

Cardiac Science Corporation, the wholly owned subsidiary of Opto Circuits India and a global leader in automated external defibrillator (AED) and diagnostic cardiac monitoring devices, added two electrocardiographs (ECGs) under its Burdick brand, known for its accuracy, reliability, and ease of use. The ECGs, available only in the U.S., deliver built-in, bi-directional communication so customers can connect to leading EMRs.

The Burdick 8500 ECG features a friendly user interface, multi-angle 7-inch widescreen, adjustable protocol settings, and color display to make reading the continuous waveform data easy. With the Burdick 8500 ECG, customers can:

- View continuous 3-, 6-, and 12-leads of data on the color display.
- Adjust the unique 7-inch adjustable widescreen color display for contrast and viewability.
- Store up to 300 digital ECG records; enjoy on-screen QuickTips.
- Reduce typing mistakes and save time by downloading patient information from your electronic medical record (EMR/HIS) system.
- Eliminate the hassle of scanning and filing.
- Enjoy an industry-leading, four-year warranty and service program for worry-free usage.

The Burdick 8300 offers similar performance, connectivity, reliability, and workflow in an economic package.

Both ECG devices clean the ECG waveform before it is measured and analyzed by the Glasgow Royal Infirmary (GRI) algorithm. With more than 30 years of continuous refinement, the GRI algorithm is the first and only to consider five clinically significant variables — including gender, age, race, medication, and classification — to interpret patient data.

About Cardiac Science

Cardiac Science, a wholly owned subsidiary of Opto Circuits (India) Ltd., develops, manufactures, and markets a family of advanced diagnostic and therapeutic cardiology devices and systems, including automated external defibrillators (AED), electrocardiograph devices (ECG/EKG), cardiac stress treadmill and systems, PC-based diagnostic workstations, Holter monitoring systems, hospital defibrillators, vital signs monitors, cardiac rehabilitation telemetry systems, and cardiology data management systems (informatics) that connect with hospital information (HIS), electronic medical record (EMR), and other information systems. The company sells a variety of related products and consumables and provides a portfolio of training, maintenance, and support services. Cardiac Science, the successor to the cardiac businesses that established the trusted Burdick®, HeartCentrix®, Powerheart®, and Quinton® brands, is headquartered in Opto Circuits (India) Ltd.: Plot 83, Electronics City, Bengaluru 560 100 | +91 80 2852 1040/41/42

Opto Circuits (India) Limited

Bothell, Washington. With customers in almost 100 countries worldwide, the company has operations in North America, Europe, and Asia. For information, call 425.402.2000 or visit http://www.cardiacscience.com.
