FIVE OF EIGHT CONSTITUENTS CONTRACTED Y-o-Y

Core sector growth falls to seven-month low of 0.5% in May

FE BUREAU New Delhi, June 22

INDIA'S CORE SECTOR growth fell to 0.5% in May, the lowest in seven months as output from five of the eight constituents of the relevant index contracted year-on-year (y-o-y). Output of coal, crude oil, natural gas, refinery products and fertilisers fell while steel, cement and electricity production expanded.

For April, the growth has been revised to 1.8% from the 1.7% reported earlier. In May of 2025 ICI had expanded at 1.2%.

The refinery sector, which contracted by 8.7%, was the biggest drag on growth in May. It has the highest weight of 28.04 in the ICI. Coal output fell 9.3%, crude oil 4.6%, natural gas 4.9% and fertilisers 0.9%.

"The decline in production of crude oil, refinery products and natural gas could be due to higher crude imports and softening international market prices. In the case of natural gas, with supply chains being addressed, domestic production tended to fall.

APRIL GROWTH REVISED TO 1.8%

Lower exports of petro products also contributed to decline in production," Chief Economist at Bank of Baroda Madan Sabnavis said.

The biggest expansion was seen in electricity output of 8.7%. The electricity sector has a weight of 19.85 in the index. Cement production grew 8.4% and steel 5.0%.

The decline in refinery output was the sharpest in 42 months, partly reflecting the fallout of the West Asia crisis, said Rahul Agrawal, Principal Economist at ICRA.

"The growth in electricity

generation improved to a 19-month high of 8.7% in the month, aided by high temperatures and a favourable base; this ensured that overall core output growth remained positive for the month," he added.

Given the tepid performance of the core sector in May 2026, IIP growth is likely to weaken to 2-3% in the month from 4.9% in April 2026, according to Agrawal.

The Eight Core Industries comprise 40.27% of the weight of items included in the Index of Industrial Production (IIP).

Moody's flags risks to country's water management framework

INDIA'S FRAGMENTED WATER governance structure, highly subsidised pricing and slow reallocation among sectors can result in water shortage and higher risk of sustained fiscal pressure, Moody's Ratings said on Monday.

In a report, Moody's said allocation frameworks, which

govern how water supply is prioritised, priced and distributed across households, industry and agriculture, are becoming a more important determinant of economic resilience in water-stressed systems because they influence how shortages are absorbed and how quickly supply stress translates into fiscal

pressure. It also said that rapidly growing demand from data centers, driven by the expansion of cloud computing and artificial intelligence, is adding a further source of water-intensive industrial pressure that governments and utilities will increasingly need to accommodate.

20% DA hike, 100K jobs in BJP govt's first budget in Bengal

CM Svendula Adhikari, accompanied by state Finance Minister Swapna Dasgupta (right) at the West Bengal Legislative Assembly House, in Kolkata on Monday

PRESS TRUST OF INDIA Kolkata, June 22

THE BJP GOVERNMENT in Bengal sought to blend welfare continuity with political and administrative reset. In its maiden budget presented on Monday, as pledged to fill one lakh government vacancies and increase dearness allowance by 20 percentage points (pps) while stressing the need for fiscal discipline.

Finance Minister Swapna Dasgupta presented a ₹4.38 lakh crore budget for 2026-27 — the first full-fledged financial statement of the BJP government that assumed office in May after ending the 15-year rule of the Mamata Banerjee-led TMC. The TMC government had presented a ₹4.06 lakh crore vote-on-account budget in February.

Dasgupta sought to project the BJP government's budget as a roadmap for a "modern, progressive and developed Bengal". Amid loud bench thumping by treasury desk members, Dasgupta announced that dearness allowance (DA) for state government employees and pensioners would be increased by 20 pps from October 1, taking the total DA to 38%.

With this, the gap between the DA received by state government employees and their central government counterparts has narrowed to 22 pps. State where

employees had for long agitated over the issue under the previous regime.

Before presenting the budget, Dasgupta and Adhikari participated in a brief prayer ceremony in the assembly premises.

The budget sought to reassure beneficiaries that welfare programmes would continue despite the change in government, even as the BJP moved to put its own stamp on several flagship schemes.

₹36,000 crore was earmarked for the Annapurna Yojana, the BJP government's replacement project for the TMC-era Lakshmi Bhandar scheme. Under the programme, women between 25 and 60 years of age will receive direct financial assistance in their bank accounts.

The Women and Child Development and Social Welfare Department saw the highest allocation of ₹52,308 crore. The Panchayats and Rural Development Department received ₹51,836.55 crore, while School Education got ₹44,948.21 crore.

Projecting employment generation as a central pillar of governance, Dasgupta announced that one lakh vacancies in government departments would be filled in phases, including 20,000 posts in the police department and 50,000 teaching and non-teaching jobs in schools.
