Encl.: As above.

Press Release

Pace Digitek Partners with NEC XON to Scale BESS Solutions

*Enables market entry in the African region;
Supports growth of BESS product business through a scalable, partner-led model*

Bengaluru, 24 April 2026: Pace Digitek Limited (BSE: 544550, NSE: PACEDIGITK), together with its subsidiary Lineage Power Private Limited (LPPL) has announced an Original Equipment Manufacturer (OEM) partnership with NEC XON Systems Proprietary Limited, South Africa.

Under this partnership, NEC XON will market, distribute and deploy the Company's product portfolio, including grid-scale Battery Energy Storage Systems (BESS) and related energy solutions, across South Africa, Botswana, Mozambique, Namibia and Mauritius. NEC XON will serve as the go-to-market and deployment partner, while Pace Digitek and LPPL will continue to focus on product development, manufacturing and supply.

This partnership marks a key step in Pace Digitek's international expansion, enabling entry into select African markets through an established regional partner. Africa represents a high-growth opportunity for grid-scale energy storage solutions, driven by increasing renewable integration, grid stability requirements and rising demand for reliable power infrastructure. NEC XON's established presence, strong customer relationships and proven execution track record across the region provide an effective platform for Pace Digitek to address these opportunities.

The collaboration combines Pace Digitek's integrated BESS manufacturing and product capabilities and NEC XON's regional market access, systems integration expertise and project execution capabilities to create a scalable and execution-oriented growth platform.

The partnership will enable Pace Digitek to establish structured demand channels across new geographies and facilitate market entry by leveraging NEC XON's regional footprint. It will also reinforce Pace Digitek's positioning as a product-led energy solutions provider, while strengthening its execution capabilities in international markets, supported by NEC XON's proven delivery track record.

For NEC XON, the partnership expands its energy solutions portfolio with integrated BESS offerings, leverages LPPL's manufacturing capabilities and product quality and enhances its ability to address evolving demand for reliable and scalable energy infrastructure.

Commenting on the development, Mr. Rajiv Maddisetty, Whole-time Director, Pace Digitek Limited, said: *"This partnership with NEC XON marks an important step in our international expansion journey. It provides a strong platform to introduce our integrated energy solutions into high-growth markets, while supporting the ramp-up of our BESS manufacturing capacity. We believe this collaboration will enable us to build a scalable international business, strengthen our product segment and increase our presence in the global energy storage market."*

Magnus Coetzee, Executive Infrastructure & Energy at NEC XON Systems Proprietary Limited, said: *"We are pleased to partner with Pace Digitek and Lineage Power. LPPL's manufacturing capabilities, product quality and focus on integrated energy solutions align well with our requirements for delivering reliable and grid-scale BESS solutions across our markets. This partnership strengthens our ability to offer advanced energy solutions to our customers and supports our focus on enabling resilient and efficient infrastructure across the region."*

About PACE Digitek Limited

Pace Digitek Limited (BSE: 544550, NSE: PACEDIGITK) is an integrated infrastructure and energy solutions company in India, operating across two business segments: (i) Energy and (ii) Telecom & ICT. The Company operates across the value chain, spanning Manufacturing, Engineering, Procurement & Construction (EPC) and Operations & Maintenance (O&M), enabling both project execution and product supply.

In the energy segment, the Company undertakes Battery Energy Storage System (BESS) design, integration and deployment. Through its subsidiary, Lineage Power Private Limited, it also manufactures energy storage systems and related components.

In the telecom segment, the Company undertakes manufacturing of telecom power systems and provides EPC services and O&M for telecom infrastructure and network deployments across multiple circles in India.
