Paisalo Digital Takes a Big Step towards Sustainable Tech Innovation with the Installation of Energy-Efficient Liquid-Cooled Server in Mumbai

Mumbai, 13 November 2025: In a significant step towards its environmental and sustainability goals, Paisalo Digital Limited has installed a high-efficiency liquid immersion cooling server at its Mumbai office.

Paisalo Digital's new server infrastructure will support its ongoing efforts to scale its ongoing developments in Generative AI capabilities across operations. This move also underscores the company's ongoing commitment to integrating sustainable practices into its operations while enhancing data efficiency and reducing carbon footprint.

The new server setup is projected to avoid approximately 55.8 tonnes of CO_2 emissions annually at a 14 kW IT load by improving the Power Usage Effectiveness (PUE) from 1.8 to 1.15. This reduction is equivalent to the annual carbon absorption of around 2,536 mature trees. In addition, the initiative will result in an annual electricity saving of nearly 79,716 kWh at peak load, marking a substantial contribution toward operational energy efficiency. Aligned with the United Nations Sustainable Development Goals (SDGs) 6, 7, 9, 11, 12, and 13, this initiative reflects Paisalo Digital's forward-looking approach to responsible innovation and environmental stewardship.

Santanu Agarwal, Deputy Managing Director, Paisalo Digital Limited, said, "At Paisalo, AI and sustainability is integral to how we grow and innovate. The installation of our new high-efficiency liquid-immersion-cooled server in Mumbai is not just a technological upgrade; it represents our commitment to building a future-ready, environmentally responsible organization. By embracing such energy-efficient solutions, we aim to contribute meaningfully to global sustainability goals while setting new benchmarks in the BFSI industry."

The company plans to integrate the ESG benefits of this installation in its Q3 sustainability reporting, further reinforcing its mission of driving inclusive and responsible growth through innovation.
