L&T Construction awarded (significant*) contracts for its various businesses

Mumbai, July 11, 2019: The construction arm of L&T has secured orders from prestigious clients across various Indian states for its varied businesses.

Power Transmission and Distribution:

On the domestic front, the business has secured orders for urban electricity distribution from a state distribution utility. The project scope includes replacing the existing HT & LT overhead lines with underground cables. In addition, new 11kV feeders will also be created for load bifurcation. Such projects improve the overall reliability of the power distribution network and help particularly in avoiding the unscheduled power cuts during rains and windy conditions.

Another order for turnkey construction of a 400kV and 220kV Transmission Lines has been secured from a state transmission utility.

In the international market, an order has been secured for the supply, installation and commissioning of 132kV underground cables in United Arab Emirates (UAE).

In Ethiopia and Uganda, orders have been received for establishing distribution networks involving medium/ low voltage distribution lines and last mile consumer connections. These will improve electricity access in their respective towns and rural areas.

The business has also won an order, in a consortium, for the supply and construction of Battery Energy Storage Systems for 115kV substations in Chaiyaphum and Lopburi provinces of Thailand. These state-of-art elements will mitigate the impact from grid connection of intermittent renewable generation.

Heavy Civil Infrastructure:

The Defence business unit of Heavy Civil Infrastructure has secured order from one of the major Defence PSUs for the construction of a strategic project for the Indian Air Force.

The scope includes construction of under-ground specialized RCC structure along with water proofing, electrical works and other Internal & external services. The project is to be completed within a timeline of 33 months.

Water and Effluent Treatment:

Engineering, procurement & construction orders have been secured from the Gujarat Water Infrastructure Limited for supplying, lowering, laying, jointing, testing and commissioning of a MS pipeline from Brahmani Dam - 2 to Chakampar village (Package II) and from Chakampar village to Nava Sadulka (Package III) including its operation & maintenance for 5 years in Morbi district, Gujarat. The business has bagged repetitive orders from the same client over the past few years.

Background:

Larsen & Toubro is an Indian multinational engaged in technology, engineering, construction, manufacturing and financial services with over USD 20 billion in revenue. It operates in over 30 countries worldwide. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.
