L&T Wins Orders (Major*) for Dhaka Metro

Mumbai, October 27, 2026: The Transportation Infrastructure business vertical of L&T has secured major Design & Build orders for two key systems packages of the Dhaka Mass Rapid Transit Development Project (Line 1), that is Dhaka Metro, in Bangladesh.

The orders comprise Contract Package CP09 - Track Works & Electrical Systems, and Contract Package CP10 - Signalling, Telecommunications & Platform Screen Doors (PSD). These pertain to the first underground metro project in Bangladesh.

Prior to this L&T had won and delivered the integrated railway systems package for Dhaka Metro Line 6, Bangladesh's first metro rail corridor, which is currently in commercial operation.

Commenting on this, **Ramkumar S, Senior Executive Vice President & Head - Transportation Infrastructure, L&T**, said: "The repeat orders from Dhaka Mass Transit Company Limited (DMTCL) are a testament to L&T's capabilities in delivering large scale, integrated urban transit projects globally. With a strong track record of delivering E&M systems for the Dhaka Metro Line 6 with the highest standards of quality and timely execution, and more recently, for the Jakarta Metro, which is under execution, we are well positioned to leverage our experience in seamlessly integrating multiple systems in close coordination with OEMs and stakeholders".

The Dhaka Metro Line 1 project, funded by the Japan International Cooperation Agency (JICA), will provide a modern mass transit system spanning approximately 31 km. It includes the Airport Route from Kamalapur to Airport and the Purbachal Route from Natun Bazar to Purbachal Terminal, with 19 stations and a depot at Pitalganj.

Together, the two packages form the core operational systems of Dhaka Metro Line 1, and will deliver a safe, reliable and world-class urban transit solution for the people of Dhaka.

Under CP09, L&T, along with its Japanese partner M/s Sumitomo Corporation, will undertake the design, procurement, installation, testing and commissioning of the complete track works, power supply & distribution system, traction substations, overhead catenary system and associated electrical facilities across the corridor.

Under CP10, L&T will execute the signalling, telecommunication and platform screen door for the entire network.

The Transportation Infrastructure vertical of L&T is a leading EPC player, which has delivered some of the most complex rail infrastructure projects in India and international markets, consistently maintaining the highest standards of safety, quality and project execution.

About Larsen & Toubro:

Larsen & Toubro is a USD 32 billion Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing, Products and Services, operating across diverse domains and multiple geographies. With a strong impetus towards AI & technology, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.
