# Rules Amended: Only 3-Hours for IT Labelling and Takedown of Unlawful Content

**Our Bureau**

**New Delhi:** The Centre on Wednesday notified amendments to the Information Technology rules, formally bringing artificial intelligence (AI)-generated content under the legal ambit and mandating labelling requirements, while sharply tightening compliance timelines for social media platforms.

The amendments have sent shockwaves across the industry by cutting the time for taking down flagged unlawful content to three hours from the existing 36 hours, while imposing new obligations on both users and intermediaries.

Set to come into effect on February 20, the revised rules also reduce the time allowed for resolving user-reported grievances to seven days, from 15 earlier. Platforms will now be required to take down non-consensual intimate imagery (NCII) within two hours, compared with 24 hours previously.

Senior officials from the Ministry of Electronics and Information Technology (MeitY) said the compressed timelines were necessitated by instances of unlawful content going viral within hours of being posted. "We have tried to address the broadly felt concern that the existing timelines were lengthy," an official said.

The measures are aimed at curbing the growing spread of child sexual abuse material (CSAM), AI-generated deepfakes—particularly those targeting women—and NCII on digital platforms, the official added.

The amended rules define a wide range of information as unlawful, including content prohibited under laws relating to national sovereignty and integrity, state security, friendly relations with foreign countries, public order, decency or morality, contempt of court, defamation, and incitement to an offence.

On the feasibility of compliance

with the shorter timelines, Ashish Aggarwal, vice-president at Nasscom, said closer engagement between industry and government would be critical. "If legal obligations are not technically achievable, it creates a risk of unintentional non-compliance. We hope the government has assessed technical feasibility, but this will need deeper engagement with industry," he said, adding that the amendments nevertheless mark a substantial improvement over the earlier draft.

"Earlier, the draft required all content with any AI modification or enhancement to be labelled, which was impractical. The revised guidelines now focus on synthetically generated content intended to mislead or falsify information. That intent-based approach is a very

positive change," Aggarwal said.

Under the updated rules, all social media users will be required to declare when posting AI-generated or AI-modified content. Platforms must deploy technical measures to verify such declarations and prominently label AI-generated images and audio. Intermediaries are also required to inform users of AI-related regulations every three months.

Officials said the move was driven by the rapid rise of AI-based deepfakes. The amendments follow a recent standoff between the Centre and social media platform X over its AI chatbot Grok, which generated controversial images. While X restricted the feature to paying subscribers globally, the government warned that this alone would not curb obscene content and directed the platform to remove such material.

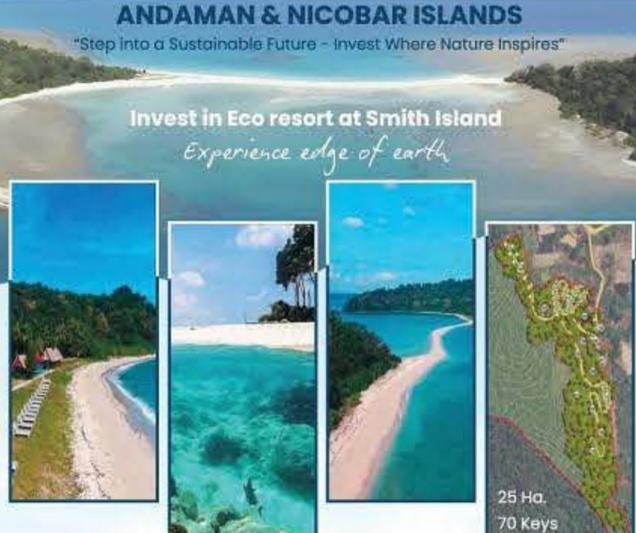

Notably, stricter draft proposals—such as mandating AI disclaimers covering at least 10% of the visual display area of a post or the first 10% of an audio clip—have been dropped. The final rules also exempt good-faith and routine content edits that do not materially alter the substance. Instead, "prominent" AI labelling must be embedded with unique metadata to allow instant identification.

Industry body Nasscom welcomed most provisions but flagged concerns over the 10-day implementation window, calling it challenging.

While AI-related obligations apply primarily to significant social media intermediaries (SSMIs)—defined as platforms with 50 lakh (5 million) or more registered users in India—officials said all technology intermediaries will be required to participate in enforcement efforts.

**ANDAMAN & NICOBAR ISLANDS**  
"Step into a Sustainable Future - Invest Where Nature Inspires"

**Invest in Eco resort at Smith Island**  
*Experience edge of earth*

Andaman & Nicobar Administration through ANIIDCO invites participation from private sector for Design, Build, Finance, Operate, Transfer (DBFOT) of 5-star sustainable eco-tourism resort at Smith Island on PPP basis on long-term concession.

The project requirements, eligibility criteria, selection process, etc. are included in the Bid Documents, which can be downloaded from
