#### PRESS RELEASE

### FOR IMMEDIATE RELEASE

# PATEL ENGINEERING SIGNS MOU WITH GOVERNMENT OF ARUNACHAL PRADESH FOR DEVELOPMENT OF 144 MW GONGRI HYDROPOWER PROJECT.

**Mumbai, December 18, 2025:** Patel Engineering Ltd has announced the signing of a Memorandum of Understanding (MoU) with the Government of Arunachal Pradesh for the restoration and development of the 144 MW Gongri Hydropower Project in West Kameng District, Arunachal Pradesh. This strategic initiative marks a significant milestone in advancing clean energy infrastructure in India's Northeast.

The Gongri Hydroelectric Project, located near Dirang town on the Gongri river (a tributary of the Bichom river in the Kameng basin), was previously terminated but has now been revived under the "Arunachal Pradesh Restoration of Terminated Large Hydropower Policy under Special Circumstances, 2025." The Arunachal Pradesh Cabinet recently approved the restoration of this project, making it the first project revived under this framework

The total project value is estimated at Rs. 1,700 crores and would take around 4 years for completion.

The revival of Gongri HEP aligns with Arunachal Pradesh's vision for a "Decade of Hydropower", aimed at making the sector a key contributor to the state's economy. Hydropower projects like Gongri will not only generate clean energy but also create employment opportunities, improve local infrastructure, and contribute to sustainable development in the region.

Under the MoU, Patel Engineering will undertake the complete lifecycle of the project, which includes preparing and validating the Detailed Project Report (DPR), designing and engineering the hydroelectric system, and procuring all necessary electro-mechanical equipment. The scope also covers construction of the dam, powerhouse, and associated civil structures, along with installation and commissioning of turbines and generators. Additionally, the project will involve developing transmission infrastructure for grid connectivity and ensuring efficient operation and maintenance post-commissioning.

The project will be implemented on a BOOT (Build-Own-Operate-Transfer) basis for a lease period of 40 years, after which ownership and operational control will be transferred to the Government of Arunachal Pradesh.

Commenting on the development, Managing Director Ms. Kavita Shirvaikar said: "We are proud to partner with the Government of Arunachal Pradesh in reviving the Gongri Hydroelectric Project. This collaboration underscores our commitment to renewable energy and sustainable development. The project will harness the immense hydro potential of the region while ensuring socio-economic benefits for local communities."

## About the company

Patel Engineering Ltd. ('PEL' or 'Company'), is a 76-year company established in the year 1949 and has a strong presence in hydropower, tunneling and irrigation segments. The Company has a consistent track record in execution of projects in both domestic and international arena. PEL has completed over 85 dams, 40 hydroelectric projects and more than 300 km of tunneling for clients which are mostly central PSUs or state government organizations.
