Press Release – For Immediate Release

Premier Energies Secures Orders Worth ₹ 3,011 Crore in Q1 FY 2027

Hyderabad, 7 July 2026

Premier Energies Limited has received orders aggregating ₹3,011 crore in April-June quarter. The orders comprise supply of a total 1,846 MW solar cells and modules with delivery scheduled across FY 2027 and FY 2028. The contracts have come from a mix of leading power producers, module manufacturers, EPC companies and other customers, reflecting strong confidence in the company's manufacturing capabilities, product quality and execution track record.

The strong order inflow supports Premier Energies growth strategy as the company is undertaking significant expansion of its manufacturing capacities – the module manufacturing capacity was recently enhanced from 5.5 to 11.1 GW, while solar cell manufacturing capacity is expected to grow from 3.6 GW to 10.6 GW by September 2026.

Commenting on the development, **Mr. Chiranjeev Saluja, Managing Director, Premier Energies**, said: *“Premier Energies is embarking on a high-growth strategy supported by booming solar demand and the Indian government's policy commitment to Make-in-India. Timely implementation of ALMM-2 policy, as recently announced, for domestic manufacturing of solar cells is a critical enabler of business growth. These new orders reflect the leadership position built by Premier Energies with investments in new technologies, scale and product quality. We remain focused on delivering reliable, high-efficiency solar solutions to our customers while supporting India's clean energy and self-reliance goals.”*

About Premier Energies Limited

Premier Energies Limited is a publicly listed company and one of India's leading integrated solar manufacturers. With more than 30 years of solar manufacturing expertise, the company is known for its focus on technology innovation, sustainability and an employee-centric culture.

Premier Energies manufactures high-efficiency solar cells and modules and is expanding its integrated manufacturing capabilities across the solar value chain. The company has received Great Place to Work certification for five consecutive years.
