Press Release

Tech Mahindra unveils new strategy for Network Services business

Centered around themes RUN Better, CHANGE Faster and GROW Greater, move will further strengthen Tech Mahindra's Leadership in Network Services

Pune – September 27, 2016: Tech Mahindra Ltd., a specialist in digital transformation, consulting and business reengineering today announced its latest Network Services Strategy which will enable communication service providers to transform and modernize their networks faster. The move further solidifies Tech Mahindra's leadership in the Network Services space and strengthens the company's global footprint and market-leading technology capabilities.

Manish Vyas, CEO, Network Services and president of Communications business at Tech Mahindra, said, "In an era where the data traffic is projected to continue to grow at 49% CAGR the industry is poised for disruption. To meet the growing demands our customers will need to create programmable elastic networks, agile operations and new revenue streams. We are uniquely positioned with our global operations, our software skilled workforce, our telecom pedigree and our open source based solutions to be the transformation agent. As trusted partners we will enable our customers to RUN Better, CHANGE Faster and GROW Greater."

At its Network Services Conclave held in Pune on Tuesday, Tech Mahindra unveiled its refined set of offerings bucketed around its unique Run, Change and Grow (RCG) strategy that will enable service providers and enterprises to lower their network TCO (total cost of ownership) with most efficient network operations, transform their networks with best-of-breed technologies and create new revenue generating service.

Tech Mahindra, through its unique 'Software Within' approach, will enable operators 'RUN' Better through use of tools, analytics and automation to drive operational excellency, 'CHANGE' faster by leveraging partnerships and open-source platforms to deliver cost-effective disruptive solutions and finally 'GROW' greater by collaborating with its larger enterprise business to create end-to-end monetizable solutions in the areas of smart cities, connected cars and mHealth among others.

Network Services is a key part of Tech Mahindra's Communication business which accounts for nearly half the company's overall business.

Being the only vendor agnostic and an integrated IT and Network Services provider, Tech Mahindra has deep expertise spanning across all Network domains including RAN (Radio Access Network), Fiber, Core Networks, IMS (IP Multimedia Subsystem) and Enterprise.

Tech Mahindra's network services offerings span across the entire network lifecycle starting from consulting, planning, network architecture and design, network planning and rollout, network testing and certification, network operations and EoL (End of Life) management to RUN networks better. Tech Mahindra's exposure through early trials, labs and partner ecosystem to upcoming technology like SDN, NFV, Cloud RAN, Edge Computing, etc. add the appropriate technology dimension to enable customers to CHANGE faster and, when taken together with our customer intimacy across several industry verticals, to enable customers to find new monetization opportunities to GROW greater.

With over 30+ years of proven track record of delivering best-in-class services to major telecom service providers across every continent, Tech Mahindra has extensive capabilities in designing and running network, enabling adoption of new technologies and coming up with new monetizable solutions.

About Tech Mahindra

Tech Mahindra represents the connected world, offering innovative and customer-centric information technology services and solutions, enabling Enterprises, Associates and the Society to Rise™. We are a USD 4.2 billion company with 107,200+ professionals across 90 countries, helping over 818 global customers including Fortune 500 companies.
