Q2 & H1 FY16 Performance Review

- Revenue growth impacted by shorter sales season and higher than expected returns
- EBITDA margins :
 - Lower royalty payments – calculated on the prices submitted by recommended institutions to relevant state governments
 - Focus on non-credit markets has protected realizations – better than industry average
- Company adopts a strategy of contracted employees to optimise costs and utilisation
- Significant loss due to returns of non-cotton crops
 - Non cotton crops have a much shorter shelf life resulting in higher percentage of write-offs
