Prestige Group and Autodesk Announce Enterprise Partnership to Accelerate Digital Transformation Across Real Estate Development

Enabling enterprise-wide digital execution, integrated project delivery, and sustainable development across Prestige Group's portfolio

14 April 2026 - Bengaluru, India - Prestige Group, one of India's leading real estate developers, today announced a three-year strategic partnership with Autodesk, the global Design & Make platform company, to deploy Autodesk Forma, formerly known as Autodesk Construction Cloud (ACC) and the Autodesk AEC Collection across its enterprise. This landmark engagement marks one of the largest new enterprise collaborations and underscores Prestige Group's commitment to digitally transforming its end-to-end project lifecycle.

Through this landmark partnership, Prestige Group will standardize on Autodesk's complete Design and Make platform – spanning industry-leading design authoring tools and Autodesk Construction Cloud – to create a unified, connected ecosystem across its portfolio of residential, commercial, retail, hospitality, and mixed-use developments. The transformation will also introduce process standardization, ecosystem-wide digital alignment, and capability-building initiatives for partners – redefining how projects are designed, managed, and delivered across the organization. Beyond technology deployment, it signals a structural shift in operating models – bringing consultants, contractors, and stakeholders into a digitally integrated framework designed to support scale, transparency, and long-term resilience.

As part of its broader digital transformation initiative, Prestige Group will additionally implement advanced 4D and 5D capabilities at scale – integrating design, scheduling, cost, and execution workflows within a unified digital environment. This enterprise-wide approach positions Prestige among the first real estate developers globally to pursue 4D/5D implementation at this scale using Autodesk technologies.

“Prestige Group has always believed in setting new benchmarks in quality and execution. As we scale our portfolio and vision, digital transformation becomes central to how we operate,” said **Mr. Vishesh Kaul, Chief Information & Digital Officer, Prestige Group**. “By partnering with Autodesk, we are building a connected digital backbone that unifies design and execution across our enterprise. This move enables greater collaboration, improved efficiency, and stronger control across our projects while positioning us for a more sustainable and future-ready growth journey.”

“We are seeing strong momentum for Autodesk Forma as developers increasingly prioritize connected workflows and data-driven decision-making to drive efficiency at scale,” said **Ms. Kamolika Peres Gupta, Vice President, Autodesk India & SAARC**. “Partnerships of this scale are a testament to the strength of our solutions and reinforce Autodesk’s position as a trusted and preferred Design and Make partner for the real estate sector. Our collaboration with Prestige Group further strengthens our engagement with leading developers and underscores the growing shift toward design-led, technology-enabled transformation. By embracing integrated, cloud-based platforms, the industry can revolutionize how projects are delivered – enabling sustainable, design-driven, and cost-efficient developments to be completed in significantly less time.”

About Prestige:

Prestige Group is one of India’s most respected and diversified real estate developers, with a legacy of almost four decades and a portfolio spanning residential, commercial, retail, hospitality, and integrated townships across major cities. As at December 2025, the Group has **delivered 313 projects spanning 206 mn. sft. and currently has a pipeline of 128 projects across 195 mn. sft.**

About Autodesk:

The world’s designers, engineers, builders, and creators trust Autodesk to help them design and make anything. From the buildings we live and work in, to the cars we drive and the bridges we drive over. From the products we use and rely on, to the movies and games that inspire us. Autodesk’s Design and Make Platform unlocks the power of data to accelerate insights and automate processes, empowering our customers with the technology to create the world around us and deliver better outcomes for their business and the planet.
