Wipro Recognized as Market Leader in Digital Workplace Services by ISG

East Brunswick, New Jersey, USA and Bangalore, India – December 4, 2017: Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO), a leading global information technology, consulting and business process services company, today announced that it has been recognized as a market leader in Digital Workplace Services by Information Services Group (ISG), a leading global technology research and advisory firm.

According to the ISG Provider Lens™ Digital Workplace Services Quadrant Report, Wipro Limited was among the leading providers in Digital Workplace Consulting, Managed Digital Workplace Services (Large Market), Managed Mobile Services (Midmarket and Large Market) and Workplace-as-a-Service (WaaS).

"Workplace transformation is becoming a top priority for senior management, as newer, digitally enabled workplace services move beyond the domain of the CIO and IT organization and become more closely aligned with the business and with specific industries," said **Esteban Herrera, partner and global head of ISG Research**. "Wipro has demonstrated experience and a highly attractive portfolio of product and service offerings in the digital workplace services space. These strengths, coupled with a track record of innovation and success, have helped make Wipro a leading choice as digital workplace transformation partner."

The report states, "Wipro's services focus is on delivering end-to-end business transformation rather than just cost savings and operational efficiency improvement. Wipro is one of the key players that have developed comprehensive, business-oriented workplace services offerings."

Kiran Desai, Senior Vice President & Head – Global Infrastructure Services, Wipro Limited, said, "We are excited to be positioned as a 'Leader' in ISG's Provider Lens™ Quadrant report, Digital Workplace Services. It is emblematic of our strong workplace portfolio, continuous investment on digital technologies for a superior customer experience and excellent delivery execution."

The ISG Provider Lens™ Digital Workplace Services Quadrant Report evaluates 34 workplace technology and services providers serving the U.S. market across seven quadrants: Digital Workplace Consulting; Managed Digital Workplace Services (Midmarket and Large Market); Managed Mobile (Midmarket and Large Market), Enterprise Social Collaboration and Workplace-as-a-Service (WaaS). Wipro Limited was one of only a small handful of firms to be named a leader in five of the seven quadrants – the most of any service provider.

The ISG Provider Lens™ Quadrant report series is a complement to the ISG Provider Lens™ Archetype reports, which offer a first-of-its-kind evaluation of providers from the perspective of specific buyer types. In the ISG Provider Lens™ Archetype Report for Digital Workplace Services published earlier this year, Wipro Limited was named a leader in the Transformation Oriented Archetype, Cloud Enabled Archetype and Next-Gen Sourcing Archetype.

Wipro's work-place transformation technologies include LiVE Workspace™, which is an end-to-end standardized and integrated workplace offering consisting of pre-defined tools, technologies and processes, enabling users to access their business applications & data, anywhere, anytime through any device of their choice.

In addition, Wipro's VirtuaDesk™, a complete desktop virtualisation desktop-as-a-service offering, enables Desktop virtualization, instantly deliver desktops and applications to any device, empowering mobile end users and increasing business flexibility. It enables clients to create a more collaborative and mobile workforce by easily securing and provisioning applications and data.

Forward-looking and Cautionary Statements

Certain statements in this release concerning our future growth prospects are forward-looking statements, which involve a number of risks, and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in our earnings, revenue and profits, our ability to generate and manage growth, intense competition in IT services, our ability to maintain our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which we make strategic investments, withdrawal of fiscal governmental incentives, political instability, war, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property, and general economic conditions affecting our business and industry. Additional risks that could affect our future operating results are more fully described in our filings with the United States Securities and Exchange Commission. These filings are available at www.sec.gov. We may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. We do not undertake to update any forward-looking statement that may be made from time to time by us or on our behalf.
