Topcoder and ConsenSys Partner to Train and Develop New Community of Blockchain Engineers

Boston, Massachusetts, and Bangalore, India – September 28, 2017: Topcoder, the world's largest workforce marketplace for data scientists, programmers and designers, and ConsenSys, the leading Ethereum incubator today announced that they have entered into a partnership to create an Ethereum engineering community on the Topcoder platform. Topcoder became a part of Wipro Limited (NYSE:WIT, BSE: 507685, NSE: WIPRO) in November 2016.

The partnership between Topcoder and ConsenSys is driven by a growing demand from Fortune 500 companies to leverage Ethereum, one of the fastest growing blockchain technologies, to radically transform themselves. Some of the world's biggest enterprises across government, food & drug, healthcare and finance industries are looking to build out and scale blockchain's potential via Topcoder engineers.

The new community hosted at blockchain.topcoder.com, will provide Topcoder members access to the Ethereum code and tool suite, tutorials, and mock challenges to help them build their familiarity and skillset on behalf of new real-world blockchain deployments.

"Blockchain technology is set to disrupt companies in the same way that cloud and mobile have done, with Ethereum showing the greatest potential among leading corporate innovators," said **Mike Morris, CEO, Topcoder**. "Companies require the best minds working on it, driven by competition-proven performance – and only Topcoder has that depth of talent at scale."

Topcoder's 1.1-million-member global community makes it the leader in competition-based development and data science, a position the company has held for more than 15 years. Its partnership with ConsenSys is a natural fit because of the company's depth of experience as an Ethereum production studio and incubator.

"From day one ConsenSys' mission has been to create the blockchain ecosystem for the developers by building core technology and developer tools like Metamask and Infura, supporting education through ConsenSys Academy, and building up enterprise consortia with the Enterprise Ethereum Alliance," said **Joseph Lubin, CEO, ConsenSys**. "Our partnership with Topcoder takes this to another level, by giving developers the tools and resources needed to discover, learn, and build on Ethereum Blockchain."

"Any industry that requires a transfer of assets or information based on trust sees blockchain's potential to force transparency and security across every transaction, while reducing friction and costs," said **Karim Lakhani, Professor at Harvard Business School and Founding Director of the Laboratory for Innovation Science at Harvard University**. "Blockchain's open,

distributed ledger can record transactions between two parties efficiently and in a verifiable and permanent way. Making it happen will require a skilled base of engineering talent capable of delivering on its promise, at scale, for corporate first movers."

About Topcoder

Topcoder, a Wipro company, is a workforce marketplace with 1.1 million developers, designers, and data scientists around the world. For more than a decade Topcoder has helped organizations including IBM, Honeywell, HPE, BMC, Booz Allen, NASA Tournament Lab, Harvard Medical School, U.S. Dept of Energy, and eBay accelerate innovation, solve challenging problems, and tap into hard to find skills. Enterprises distribute work to our global network through the Topcoder Marketplace, where individuals with the right skills participate in competitions to win money, build skills, and earn recognition. For more information visit www.topcoder.com.

About ConsenSys

ConsenSys is a venture production studio and custom software development consultancy building decentralized applications (DApps), enterprise solutions and developer tools for blockchain ecosystems, focused primarily on Ethereum. Powered by smart contracts and secured through encryption, our applications provide the benefits of transparency, auditability, and immutability that are unique to blockchain-based solutions. About Wipro Limited

Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO) is a leading global information technology, consulting and business process services company. We harness the power of cognitive computing, hyper-automation, robotics, cloud, analytics and emerging technologies to help our clients adapt to the digital world and make them successful. A company recognized globally for its comprehensive portfolio of services, strong commitment to sustainability and good corporate citizenship, we have over 160,000 dedicated employees serving clients across six continents. Together, we discover ideas and connect the dots to build a better and a bold new future.

Forward-looking and Cautionary Statements

Certain statements in this release concerning our future growth prospects are forward-looking statements, which involve a number of risks, and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in our earnings, revenue and profits, our ability to generate and manage growth, intense competition in IT services, our ability to maintain our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which we make strategic investments, withdrawal of fiscal governmental incentives, political instability, war, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property, and general economic conditions affecting our business and industry. Additional risks that could affect our future operating results are more fully described in our filings with the United States Securities and Exchange Commission. These filings are available at www.sec.gov. We may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. We do not undertake to update any forward-looking statement that may be made from time to time by us or on our behalf.
